Fertilizer with Growth Regulator

A controlled-release fertilizer and growth regulator are combined in Scott's Fertilizer with TGR Poa Annua Control. The fertilizer reduces *Poa annua* populations in greens, fairways and tees of bentgrass, Kentucky bluegrass and perennial ryegrass.

Developed by O.M. Scott & Sons Company, the fertilizer selectively slows the growth of the *Poa*, thus diminishing its ability to compete against actively growing desirable grasses. This results in a gradual, more natural transition to desirable turf without a sudden decrease in playing surface quality.

The fertilizer is available in 31-3-9 and 15-0-29 formulations.
