PRODUCT UPDATE

WETTING AGENT APPLICATOR

The Pro-Ap, a hose-end applicator for applying Hydro-Wet Turf Wetting Agent, has been introduced by Kalo, Inc. It is designed especially for use on golf courses.

The sprayer will accurately apply the wetting agent to tees and greens, and can be used to apply micronutrients and other additives. The Pro-Ap metering system mixes small quantities of chemical with large volumes of water, and offers a variety of chemical dilution rates.

Molded from chemical-resistant Celcon, the Pro-Ap connects to one-inch water service and adapts to 3/4-inch. Its pistol-grip design and light weight reduce operator fatigue. A shower-type nozzle ensures gentle application to turf.

FERTILIZER-CHEMICAL INJECTOR

Operating solely on water pressure with, no need for external energy, the Amiad Fertilizer-Chemical Injector requires only two 3/4-inch outlets from the main water line. The 11-pound injector can be connected to the main or sub-main line and the fertilizer or chemical tank with union couplings in minutes, permitting application of fertilizer or chemicals to specific areas.

The operating injector does not break line pressure. Its linear hydraulic motor provides an efficient and accurate injection rate of two to 80 gph which is easily controlled through a ball valve or a flow regulator. The unit is equipped with an automatic cutoff that shuts down the injector when materials have been expended.

ANTI-WASH® / GEOJUTE® Is The Natural For Tough Erosion Control

- Absorbs almost five times its own weight in water, which straw and wood fiber cannot do.
- Hugs tightly to ground surface, molding well to contours of land and reducing washout.
- Simple to install and easy to reposition before permanent installation, if necessary.
- Attractive natural appearance while vegetation is growing in.
- Highly compatible with hydroseeding and other landscape planting techniques
- No non-degrading artificial materials to interfere with wildlife or later use of maintenance equipment.

To find out more about ANTI-WASH® / GEOJUTE®, the natural in erosion control, please write or call us today! (Distributor inquiries invited)

PRODUCT UPDATE

LIQUID WETTING AGENT

Scotts ProTurf Hydrozyme Wetting Agent is a liquid designed for use by golf course superintendents and professional turf managers. It helps prevent and eliminate localized dry spots in turf areas such as putting greens, and encourages healthy, vigorous turfgrass growth in hydrophobic soils. It also aids water penetration in hard-to-wet soils.

The product is available in 30-gallon

drums or in cases, which consist of four one-gallon containers each.

MOSQUITO CONTROL PRODUCT

Bactimos Briquets are a long-term, sustained-release mosquito larvicide. Their active ingredient, *Bacillus thuringiensis israelensis*, produces a substance that is toxic only to mosquitoes and has no effect on fish, aquatic wildlife, or any vertebrates. One briquet will control mosquito larvae for 30 days or more.

The product is easy to use and requires no measuring, mixing, or spraying. One briquet is applied per 100 square feet of surface area.

GREENSMOWER ROLLERS

Presenting the NEW industry standard

Here's why:

- **Roller Bearings** – separate radial and thrust bearings
- **Double Seals**
- **Stainless Steel Wear Sleeves**
- **No Wear Surfaces on Shaft**
- **Removable End Pieces**
- **No Springs** – grooved roller segments are clamped rigidly

Toughness for the most rigorous use

WALKING BOOM

The 80-inch Greensfoil Hosefed Walking Boom has mechanical drift control, which allows spraying in windy conditions. Its advanced airfoil protects the operator and environment and ensures positive drift control.

The unit is equipped with eight nozzles spaced ten inches apart, a handle-mounted valve, three pneumatic wheels to maintain constant boom height for even application,

optional nozzle monitor, and a speedometer. Constructed from corrosion-resistant plastic and aluminum, it also comes in 38- and 40-inch widths.

INNOVATIVE EQUIPMENT, INC.

GANG MOWERS

The Hydraulic Ranger gang mower is available with five or seven gangs. Its powerful hydraulic reel motors cut heavy, wet grass easily. The units can be equipped with six- or ten-blade reels for a beautiful finish on high-quality turf. Vertical cutting reels are also available.

The seven-gang mower has a cutting width of more than 15 feet, and can cut up to nine acres per hour. The five-gang unit cuts an 11-foot path and up to 6.5 acres per hour.

PRODUCT UPDATE

High-flotation tires allow the Ranger to roll gently over the turf with less compaction. For transport, the reels raise quickly to create a compact, 7-1/2-foot overall unit width. Reels automatically shut off when the units are raised and start again when they are lowered, for safety and ease of operation.

TURF INFILTRATION MEASURING DEVICE

The Turf Tec Infiltrometer can make on-site measurements of percolation rates without disturbing the turf. The unit is inserted into the turf like a golf cup cutter, and since no soil is removed it leaves almost undetectable round cuts in the grass.

The unit can determine percolation rates in 15 minutes. The elapsed-time indicator makes it possible to correlate irrigation time to the infiltration rate of the turf. After the infiltration rate has been determined on a given area, irrigation time can be set to deliver only the water that the turf can absorb. Wasteful water runoff can be minimized.

GRASS PROTECTION SYSTEM

Gras-Gard's interlocking 16-by-16-inch tiles allow grass to grow through one-by-one-inch openings. They can be used to protect turf recreation areas from root dam-

Do Not Read This!

Providing you have time and seed to waste.

But if you've read thus far, then give us a call or write for information on our pregermination systems. We provide the equipment (5 models) and technical information that will allow you to pregerminate turf grasses on your own.

Pregermination of turf grasses can provide increased yields, reduced erosion, accelerated establishment, as well as reduced time, cost, and more. (Why would anyone wait the normal time for seed to sprout?)

* Ask about our newest unit, the BT275, which pregerminates bentgrass and wildflowers.
