

Water-Reel Irrigation for Parks, Sportsfields & Nurseries

A self-traveling irrigation system

Kifco Water-Reels make portable irrigation easy.

The machines are simple to set up and operate unattended. They shut-off automatically when the sprinkler cart arrives back at the machine.

FONT'N-AIRE

FONT'N-AIRE combines the beauty of a romantic fountain with the benefits of an efficient aerator.

Nothing moves water like a propeller. AIR-O-LATOR has been involved in propeller design and the technology of aerating since 1967.

We believe we can honestly claim the most energy efficient fountain on the market.

PRODUCT UPDATE

UTILITY TRUCKS

Jacobsen's gas-powered 810 Express and electric-powered 610 Express trucks can haul up to 1,000 lbs. of passengers and cargo.

The 810 unit has a quiet, 8.5-hp four-cycle two-cylinder overhead-cam engine with electronic ignition. The 610 has an economical 6.5-hp electric motor. Top speed for both vehicles is 12 mph.

Both trucks have rugged steel bodies. Tubular steel chassis and four-wheel hydraulic shock absorbers are standard. Loadbox capacity is eight cubic feet.

The trucks feature thick foam-cushioned bench seats. Rack and pinion steering and an automatic torque converter on gas models make driving easy.

GRINDER

Leaves, branches, grass clippings, and other municipal yard waste can be turned into valuable compost with an HG3000 commercial grinder. Material is ground by a high-speed hammermill rotor with hardened hammers, then discharged up a 16-foot-long rear-discharge conveyor into piles or transport vehicles.

Branches up to one inch thick, leaves, grass clippings, and other materials can be ground into compost or landscape cover. Volume reduction by grinding with the HG3000 is typically two to 10 times less than the original volume, greatly reducing the storage area needed at a compost site.

During grinding, bulk materials are dumped by a front end loader into the tub. An electronic tub speed control automatically regulates infeeding to the rotor and assures smooth grinding under all conditions. The HG3000 can be powered by tractors from 80 to 150 horsepower.

TRENCHER

The T-4 trencher features a rigid digging bar with adjustable tension, which allows the operator to adapt to different soil conditions and reduces the risk of chain jumping. A protector bar provides added protection. The unit's rear ratchet assembly has been redesigned for easy maintenance.

FRAME MOUNT POWER SPRAYERS

Maruyama has developed two new frame mount power sprayers for the professional lawn care industry, pest control industry, and agricultural industry.

The model MS253-50T features a Kawasaki FG150F 3.6 hp engine with electronic ignition, which powers a triplex piston pump, which discharges five gallons per minute at up to 500 psi. The pump has all

ROOKIES

PRODUCT UPDATE

stainless steel wetted parts and a chrome-moly steel crankshaft. The pressure is controlled by a heavy-duty regulator valve and the unit comes equipped with an adjustable spray nozzle which allows the operator to spray a straight stream or open cone type pattern.

The hose reel holds 164 feet of quarter-inch ID hose. The entire system is mounted on a sturdy steel U channel frame which also holds the 50-gallon tank. This tank is equipped with a Spraying System hydraulic jet agitator and includes a standard air gap filler valve to meet all state requirements. The pump has a durable glycerin-filled pressure gauge and is protected on the inlet side with a high-volume strainer.

The model MS153-50T features a Honda G100 2.2 hp four-cycle engine which powers a duplex piston pump. This pump produces three gallons per minute and a maximum pressure of 400 psi. All other features on the MS153-50T are similar to the larger model MS253-50T. This unit is ideal for those sprayer operators who are looking for professional quality and durability in a compact sprayer. Both of these sprayer models have base dimensions of 40.2 inches in length by 37.8 inches width by 25.2 inches height.

MULTI-PURPOSE VEHICLE

Available in gas- and electric-powered models, the Shuttle multi-purpose vehicle has two forward-facing bench seats, Columbia ParCar's clam shell design, and room behind the back seat to carry tools, bag-

gage, and other items. The vehicle features a lightweight, two-cycle engine that requires no oil changes. It also has a lift-out battery pack tray for continuous use and an on-board automatic electric charger.

Speed balanced rack and pinion steering provides agility and maneuverability. The vehicle's front body is constructed of metton, a durable synthetic plastic. Options include a trunk for additional storage, which can also be used as a drink cooler.

ROAD TREATMENT AND DUST SUPPRESSANT

Road Oyl is a high-strength emulsion for road surface treatment, dust suppression, and erosion control formulated from natural pitch and rosin ingredients. The cold-ap-

plied product is not water-soluble and helps to shed water off road surfaces.

The emulsion can be applied by pressurized distributor trucks or by water trucks and conventional water-spray equipment. It has good penetration into soil and aggregate materials, and can be diluted with water when additional penetration is required.

SOIL STABILIZATION PRODUCTS

Circle 182 on Postage Free Card

WATER-ABSORBING POLYMER

WaterWorks crystals are made of a concentrated crosslinked polymer material and are capable of absorbing 500 times their weight in water. They release water to plant roots through normal capillary action.

The non-toxic product helps protect plants from underwatering and drought. It is mixed into the soil and can be used indoors or outdoors.

SLURRY DYE

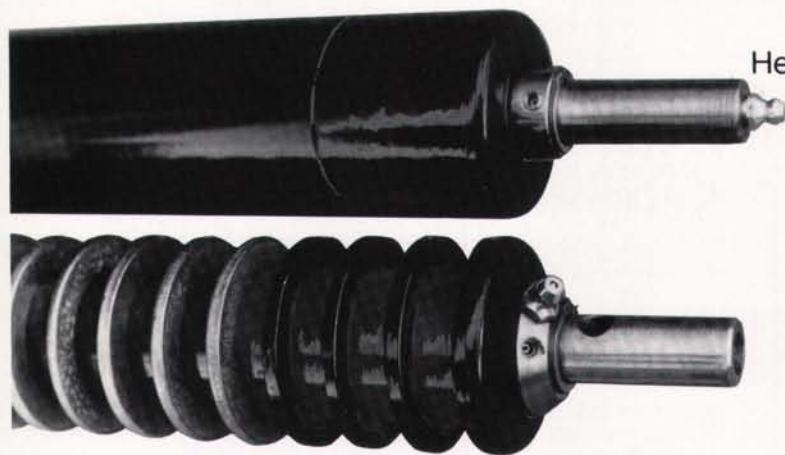

Green Plus is a highly concentrated dye for use in hydroseeding and mulch tacking slurries. It provides improved visibility, so that more uniform coverage patterns are achieved. If hydroseeding slurries are evenly applied, then seed germination will also be more uniform. Green Plus is packaged in one-ounce water-soluble bags for easier handling. Bags are added to the tank as water is being added.
