COMPACTION TESTER

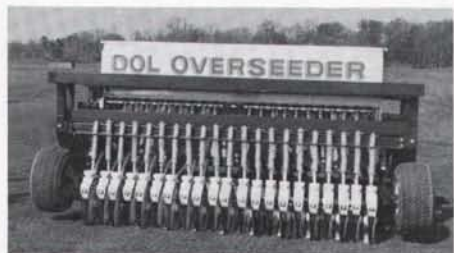

Soil compaction problems can be detected and identified easily with the Soil Compaction Tester from DICKEY-John Corporation.

The tester features a handle-mounted pressure gauge and a stainless-steel probe with depth markings at three, six, nine, 12, 15, and 18 inches. Compaction in pounds per square inch is displayed on an easy-to-read, color-coded dial as the probe is pushed into the soil by hand.

LARGE OVERSEEDER

Up to 20 acres can be overseeded in one day with the OV 200 Commercial Overseeder by Dol Brothers. The ground-driven, two-meter-wide seeder can be pulled by a 35hp or larger tractor at speeds up to six mph.

Two staggered rows of discs cut through thatch and soil for precise placement of seed or granular material in bands 1-1/2 inches apart. All 43 double-disc planters are individually sprung to provide a constant

seeding depth regardless of ground contours. The seeder adjusts to ground speed to maintain a constant rate of application.

The machine is easily calibrated for different types of turf seed. It has also been used for subsoil placement of pesticides for mole cricket control. The discs do not disturb the playing surface so the turf area is ready for use immediately following application.

DUMP TRAILER

Cushman's hydraulically operated fifth wheel dump trailer can haul up to 20 cubic feet of cargo and is designed to be towed behind the company's Turf-Truckster vehicle.

The unit's fifth wheel configuration provides excellent maneuverability. Turf-Trucksters must be equipped with a special quick-attach fifth-wheel hitch and live hydraulics package to utilize the trailer. It attaches to the Turf Truckster with a two-inch ball hitch.

Even with a trailer box capacity of 2,500 lbs., ground pressure is kept at 12 psi for the trailer and slightly less for the Truckster. The trailer is equipped with 24-x-13-inch turf tires on 12-inch rims.

The trailer box is 48 inches wide, 60 inches long, and 12 inches deep. Hydraulic dumping of the trailer is controlled from the Turf-Truckster seat. Dumping height is 16 inches.

KENTUCKY BLUEGRASS

Marketed by Peterson Seed Company, Monopoly is a fast-emerging Kentucky bluegrass. According to the company, 65 per-

cent of the variety emerges in five days.

The bluegrass has also been recognized for its low-maintenance performance in the USDA's five-year National Turfgrass Evaluation Program for "no irrigation" practices.

WALK-BEHIND POWER ROLLER

The Brutus A-3 1/3-ton walk-behind power roller is designed for use on freshly seeded areas, athletic tracks, golf course greens, and tennis courts. It can also be fitted with a sprinkler reservoir and cocoa mat for blacktop patching.

The unit is powered by a three-hp Briggs & Stratton engine with a 6:1 gear reduction. It features a forward and neutral drive transmission, a 24-x-24-inch drum fabricated from 3/16-inch steel plate, and a front safety bar to prevent accidental flip-over.

DURABLE BENTGRASS

Developed by the University of Arizona, SR 1020 is an improved creeping bentgrass designed for use in warm areas of the desert Southwest. It features excellent upright growth habit, fine leaf texture, a dark-green uniform color, excellent heat and drought tolerance, tolerance of low fertility levels, and improved resistance to pythium and brown patch disease.

PRODUCT UPDATE

COMPACT AERIFIER

Mounted to a 13- to 45-hp tractor, the Model TC 11 Yeager-Twose Compact Greens Aerifier can be fitted with six optional attachments.

The unit employs hydraulic blade vibration to aerify. Its deep running blades create no plugs and penetrate areas with tough clay. Bullets create air and water circulation caverns.

A bottom dresser places granule polymers, fertilizer, sand, and insecticide at or below the root level. This helps prevent surface water runoff and promotes deeper roots.

Fitted with a sod cutter with clean-cutting adjustable coulters and a vibrating lift blade, the unit can cut 18-inch-wide rolls of sod. Pipe puller, cable layer, and root cutter attachments are also available.

TURF ENHANCER

Scotts' Turf Enhancer 50WP (TGR 50WP) can increase the playability of golf course fairways and greens up to six to eight weeks. It produces a dense, tightly knit turf stand that improves turf quality and consistency.

The spray-applied, wettable-powder product is available in water-soluble packets. Used in conjunction with nitrogen fertilizer, it can extend turf greening for as long as 12 weeks. The product helps manage hard-to-mow areas and suppresses *Poa annua* by reducing its growth and ability to compete with more desirable grasses.

TGR 50WP is designed for use on hybrid bermudagrass, bentgrass, and perennial ryegrass fairways, tees, and roughs; St. Augustine and Kentucky bluegrass/perennial ryegrass turf areas; and bentgrass and overseeded bermudagrass greens.

NEW POTASH PRE-EMERGENT POWER.

Country Club 7-3-22
with
TEAMTM

Satisfy your potassium needs and get pre-emergent control of crabgrass, goosegrass and *Poa annua*, using new Country Club 7-3-22 with Team. This premium homogeneous fertilizer with 100% sulfate of potash will help improve your turf's resistance to disease and drought—without increasing nitrogen levels. At the same time, it helps rid your turf of weeds with a time-proven herbicide. And if a higher nitrogen application is needed, try Country Club 19-4-6 with Team. From the source for premium quality turf products—your local Lebanon distributor.

PUMPING STATION

Designed for sports turf projects or boosting water pressure on golf courses, Watertronics' pumping station features a high-efficiency pump and motor, exterior fusible disconnect, interior pump controls, pressure gauge and switch, flow switch, and

check and drain valves.

All components are housed in a weather-resistant steel enclosure with a hinged, lockable access cover. Pump stations from five to 5,000 gpm have internal wiring and can be set in place, with electricity and water run to them.

BIO-FERTILIZER

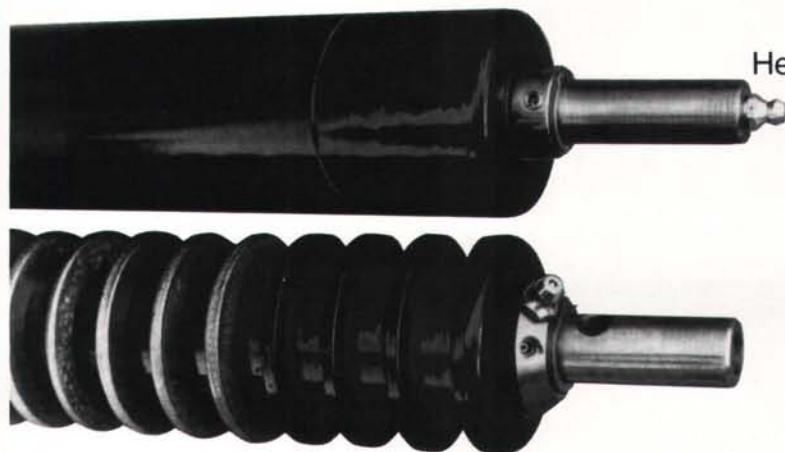

TURF-Tech II, a microbial bio-fertilizer, offers a comprehensive program for managing soil fertility. Consisting of dormant microorganisms in a wettable powder, the product can be used with any type of grass to enhance the soil/plant relationship. When applied to the soil, these legume-like microbes begin producing organic compounds which include nitrogen from nitrogen fixation, polysaccharides, organic acids, and plant growth stimulating hormones.

GREENSMOWER ROLLERS

Presenting the NEW industry standard

Here's why:

- **Roller Bearings** – separate radial and thrust bearings
- **Double Seals**
- **Stainless Steel Wear Sleeves**
- **No Wear Surfaces on Shaft**
- **Removable End Pieces**
- **No Springs** – grooved roller segments are clamped rigidly

Toughness for the most rigorous use

BATTERY RECHARGERS

Accu Power and Ultra Power II battery chargers use precise amounts of energy to bring golf car batteries to optimum levels. These UL-approved chargers have high-efficiency transformers, shorter charging time, and reduced peak demand which results in lower electricity usage.

The Accu Power system safeguards against overcharging and ensures a charge that can power a golf car for 100 holes or

more. However, recharging is recommended on a daily basis to ensure battery life.

The Ultra Power II charger features an LED range indicator that displays exactly how much a battery has been charged, even after the charger has shut off. This feature facilitates golf cart fleet rotation and battery maintenance.
