PRODUCT UPDATE

TOPDRESSER

The Dakota Topdresser Model 220 can apply seed, fertilizers, chemicals, sand, peat or other soil amendments. It will meter, mix, and topdress four of these products into one application. It has a built-in stacking conveyor to stockpile different mixes for renovations or divet mixes.

The unit has eight independent smooth turf tires to minimize compaction of sports turf facilities or golf greens.

BRUSH

The Zig-Zag six-foot brushing unit consists of four two-foot-long brush sections mounted on a main frame so that each brush is operating at an angle.

The brush can improve the move-

ment of top dressing materials down to the base of grasses with very few passes. It is also effective for "working in" sand on an artificial turf.

HERBICIDE

Pendulum is a new formulation of pendimethalin for use over ornamentals to control most annual grasses and many broadleaf weeds. It offers effective over-the-top weed control for labeled landscape ornamentals, shrubs, delicate flowers, and ground covers. Optimum application time is one to two weeks before weed germination.

Because of its stability on soil surfaces, pendimethalin is capable of working on germinated weeds throughout the season.

It can be applied with a backpack sprayer or a tank sprayer. Currently, the product is available in 2-1/2-gallon jugs as a water-dispersible granule.

TURF MAINTENANCE SYSTEM

The Reveal Turf Disease Detection Kit reduces the amount and frequency of pesticides needed for turf maintenance.

It utilizes traditional immunoassay technology to detect the presence of brown patch, pythium, and dollar spot. Accurate results appear within 10 minutes. By detecting the diseases before they appear, pesticides can be applied only as needed.
