SAND TRAP GROOMER

Toro's Sand Pro 2000 has a 12-hp Kohler engine that provides plenty of power for raking, edging, spiking, and grading. Its transport speed is infinitely variable from zero to 10 miles per hour.

The unit incorporates hydraulic lift on all attachments for ease of operation. Its

completely enclosed, self-lubricating hydraulic systems with oil cooler are protected from sand and grit for increased durability. There are no gears to change or belts to adjust.

Many attachments are available. The finish grader, drag mat, and 58-inch spiker, in addition to the dozer blade and renovation cultivator bar that were introduced for 1991, are all interchangeable with the Sand Pro 2000 and Sand Pro 14. In addition, a tooth rake and weed/cultivator have been added to provide a better finish and a firmer surface on all sand conditions.

THE TORO COMPANY
Circle 118 on Postage Free Card

clover combined with low-growing grasses. It is suited to low-maintenance areas.

This self-contained, herbaceous lawn should be mowed every three to four weeks at four to six inches. Supplemental irrigation and fertilizer are not necessary after establishment.

The mix is available in one-pound packages, that cover 1,000 square feet, as well as bulk quantities.

C-LOC[®] The Fore-Forward Looking Solution for Golf Course Landscape Problems

Control erosion in sand traps, water hazards and other fragile areas

Build up low spots, expand tee areas

Use C-Loc to create golf cart paths over drainage ditches

Now there's a simple, economical, beautiful way to improve any golf course.

Introducing C-Loc[®]: the all purpose landscape problem solver. Made from weather resistant, heavy-duty extruded PVC plastic, C-Loc's interlocking panels are lightweight, durable and easy to work with. They're also incredibly versatile, designed to solve a host of typical golf course flaws ranging from low spots and drainage-ditch interference to sand and water erosion.

C-Loc: A Superior System, Any Way You Look at it

Simple Installation—Installs quickly and easily with just a jackhammer or sledgehammer

Economical—Costs less to buy; no heavy construction equipment required with conventional installation

Durable—Used successfully for years in seawall applications

Maintenance-Free—No unsightly rust, corrosion or deterioration

Attractive—Sunlight-stabilized plastic remains new looking through years of use

Environmentally Safe—Nothing to contaminate soil

For more information on the C-Loc all-purpose golf course landscaping system call or write:

PRODUCT UPDATE

FAIRWAY MOWER

The LF-100 five-gang fairway mower delivers a precision 100-inch cut with high productivity. Its hydraulically driven, 22-inch reels follow turf contours for beautiful results even on undulating fairways.

Front placement of wing reels makes it easy to follow cutting lines, and provides access to grass catchers. Power steering and pedal-operated reel lift make maneuvering and cross-cutting simple. On-demand four-wheel-drive is also available. A 22 hp diesel engine powers the mower. Backlapping is standard.

MINI-FLOODLIGHT

The TwiLighter TLX Series MiniFlood can be used for security, accent, recre-

ational sign, and parking lot lighting. To facilitate lamp replacement, it features a lens frame that hinges out easily.

The fixture is available in 35- to 150-watt high pressure sodium or 28-watt compact fluorescent versions. For cold weather starts, the compact fluorescent lamp is rated for -20 degrees F.

Other features include a 1/2-inch threaded arm with serrated teeth to lock the fixture in place and silicone gasketing for long-term weather resistance. A multi-faceted, semi-specular anodized aluminum reflector ensures wide flood distribution.

STONCO LIGHTING

SKID-STEER LOADER

The model 742B skid-steer loader is a gasoline powered version of the 743B loader. The 742B features a four-cylinder, 96 cubic inch, liquid-cooled Mitsubishi gas engine rated at 36 hp at 2,800 rpm. Its rated operating capacity of 1,300 pounds and tipping load of 2,600 pounds make this model ideal for a variety of uses.

The 742B measures 54 inches wide with standard tires, and 76 inches tall, compact enough to work in many close quarter applications, but built for tough digging, moving and lifting jobs.

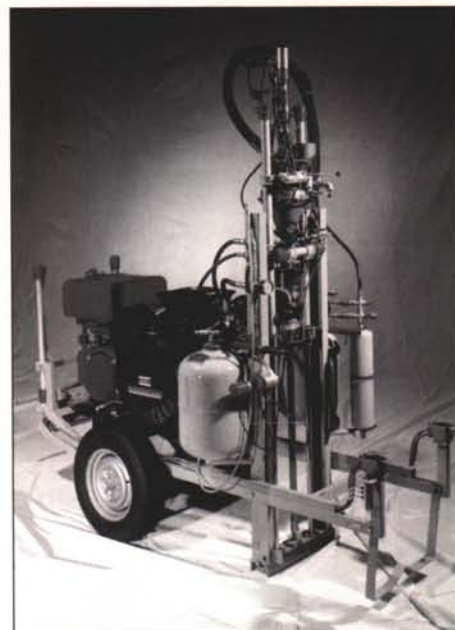

Optional accessories include front and rear working lights, hydraulic bucket positioning, front auxiliary hydraulics and cab interior foam padding. Full instrumentation is standard.

More than 20 different attachments are available for the loader, including angle blade, angle broom, backhoe, box scraper, buckets, earth auger, grader, farm and industrial grapples, hydraulic breaker, hydraulic trencher, landscape rake, pallet and utility forks, scarifier, snowblower, sweeper, tree transplanter, vibratory roller and York rake.

BOBCAT

AERATOR INJECTOR

Terralift's long narrow probe penetrates the soil and uses forced air to fracture the subsoil at depths of six to 36 inches. It attacks problems such as compaction, saturation, and improper drainage without disturbing the turf.

The equipment can inject pelletized materials, such as perlite beads, to maintain passages for the exchange of liquids and gases. It can also inject other natural agents to accelerate the decomposition of organic matter.

CHEWINGS FESCUE

Camaro Chewings Fescue is a fine-bladed variety with excellent tolerance to leaf spot, red thread, summer patch, pink patch, and anthracnose. It also performs well under drought conditions.

Camaro blends well with Kentucky bluegrass, perennial ryegrass, and tall fescue. It is ideal for upgrading all-purpose, shade, and low-maintenance mixtures.

PORTABLE NATURAL TEE SYSTEM

The Porta Turf portable tee platform system is designed for grass to be grown on top of it. The five-square-foot platform is constructed with a perforated plastic base, held together with an aluminum frame. Inside the frame, a three-inch layer of soil is applied where seed will be planted.

The platform can be used individually, or in groups to form a larger tee box area. Platforms can be rotated in and out of service for irrigation and overseeding.

PERMANENT ATHLETIC LINE MARKERS

Safety-Line, a permanent foul line marker designed for outdoor athletic fields, is designed to be an alternative to chalk lines. Its soft, ribbed vinyl non-skid top makes it safe for players as well as landscape equipment.

The product is a highly visible white

marker, installed below the grass at ground level. It is permanently anchored by a six-inch grooved fin that is secured underground by steel stakes, preventing frost heave and landscape maintenance problems.

TISSUE TEST KIT

The Tissue Test Kit from Turf-Tec can be used for on-site determinations of the nitrate-nitrogen levels in turfgrass leaves and stems. A color chart shows low, medium, and high in approximate parts per million, which is used to compare with the test. An analysis of the nitrate-nitrogen can be made in one to five minutes. Full color will appear in approximately 30 minutes.

ORGANIC FERTILIZER

Improved formulations of Granular Humic Plus 9-1-5 and Organic Liquid Compost 1-1-3 are available. Granular Humic Plus contains two percent iron and a 15 percent increase in humic acid for a 20 percent faster turf green up than before, in a variety of weather conditions.

The fertilizer contains agricultural plant tissue and soil minerals. It is 100 percent feed grade. The all active material does not contain any ocean plants, human or animal sewage or animal body parts. It has no odor regardless of the application rate.

Organic Liquid Compost is derived totally from agricultural plant tissue. The concentration of the formula has been boosted by 25 percent. The liquid organic fertilizer will not plug strainers or sprayer tips, a big application advantage. The compost contains seven strains of microorganisms for improved thatch decomposition and nitrogen fixation. Soilaid acts as a catalyst to increase the cation exchange capacity and reduce soil compaction particularly in established turf stands.
