## PRODUCT UPDATE

### FUEL TANK

The ConVault above ground fuel storage tank rests four-inches above ground on a concrete slab for monitoring and visual inspection. The six-inch thick reinforced concrete shell of monolithic design provides physical and ballistic protection and a two hour fire wall around the tank. The thermal mass formed by the concrete exterior minimizes temperature changes and vaporization of the tank contents.

It is designed with a low center of gravity to withstand tipping during earthquakes and other natural disasters. Earthquake-resistant hardware is available.

#### CONVAULT

### MARKING PAINT

Turf Coat athletic field marking paint can be used for striping baseball diamonds, football, soccer, lacrosse, and polo fields. It can be used on virtually any natural turf surface and comes in three different price ranges.

#### JS SPORTS TURF

### AUTO-SEEDER

The SISIS Auto-Seeder is a highly maneuverable, self-propelled machine for rapid overseeding of small areas of worn turf such as golf tees.

Tines cut shallow open grooves two inches apart. In the same pass, grass seed is metered from a specially designed, positive feed, seeding mechanism directly into the grooves. Disruption of the surface and disturbance of existing grasses is minimal. Germination and re-establishment is rapid.

The Auto-Seeder has an 18-inch working width and seeding rates are variable between .2 ounces per square yard and .75 ounces per square yard. Optional seeder units are available to give rates of .3 ounces per square yard to .86 ounces per square yard for applying fine seeds.
