

ROOKIES

Riding Mower

The new Encore PRO-Line rider is user-friendly. This compact hydrostatic rider with zero turning radius is so easy to operate it eliminates the need for small trim mowers. The floating deck allows rough terrain mowing without scalping. The 52" cutting deck features three blades for faster ground speeds.

The Encore PRO Rider utilizes a Kawasaki FD620D 20 hp liquid cooled engine and an Eaton 771 dual path hydrostatic drive system, giving smooth control with a wider neutral band. For maximum strength with minimum weight, the main frame is heavy wall steel tubing. Controls are fully adjustable.

Water-Soluble Packaging

American Cyanamid Company has announced a new water-soluble bag for Pendulum WDG. This new packaging is part of the company's effort to address the environmental concerns of its customers.

The Pendulum WDG water-soluble package has been designed to eliminate container disposal problems, provide premeasured quantities in an easy-to-use packet and eliminate product exposure during mixing and loading. The packets are made of inert ingredients that completely dissolve within minutes after being added to the tank.

Pendulum® WDG is effective in controlling most annual grasses and certain broadleaf weeds as they germinate and before they become a problem.

Primed Seed

Whether your concerns are problem areas, or getting the course into playable condition faster, RediSeed™ could be the product for you. Through a patented process known as Solid Matrix Priming (SMP™), RediSeed enhances seed performance.

The SMP process actually primes the seed to a point where the seed is ready to germinate, then "freezes" that condition for periods up to a year. When RediSeed is planted and water added, the seed completes its germination like any other seed, but starts sprouting in hours rather than days. RediSeed has a calcined-clay carrier with biologicals that fight damping-off diseases and nitrogen-fixing bacteria to provide a more efficient nutrient supply.

Field Marking Machine

The Brite Striper 1400 by Pioneer Manufacturing is so simple to operate, anyone can do a professional job. Just fill up the tank, turn on the CO₂ pressure and start striping. The 10 lb. CO₂ cylinder will last through 30 paint-tank refills. A dual gauge regulator tracks operating pressures in the paint and CO₂ tanks.

Standard with the BS 1400 are a fully adjustable spray box and 12' hand-hose with wand. The spray box switches line width from 2- to 8-inches and is offset to prevent straddling freshly painted lines. With the handhose, users can quickly spray large areas such as end-zones and yardline stencils.

Pioneer is now offering an exclusive 30-day free trial for those interested in the BS 1400.

Electronic Pump Control

Water Works Irrigation has developed Inter-Pump, an innovative, inexpensive unit that solves most any pumping problem that you will encounter. Time delays, latches, fluid level detectors and many other functions can be programmed into electronic components at a fraction of the cost and space of their mechanical equivalents.

Inter-Pump is user friendly. You don't have to program it. You don't have to assemble it. You simply hook up the

ROOKIES

inputs, hook up the coil on the pump starter and its done—one hour installation. It is designed to work with existing equipment wherever possible. It can coordinate one or more pumps from a central location or control pump operations at each pump house.

Fire Ant Bait

Ciba Turf & Ornamental Products announces that Award® fire-ant bait is now available in a new one-pound jug. The newest Award package features the same pop-open shaker top as Award's popular three-pound jug in a size more convenient for smaller properties. The Recyclable plastic jug features a vertical handle, which simplifies pouring and triple-rinsing.

Award contains the advanced insect growth regulator fenoxycarb. Foraging

workers pick up the bait, deliver it to the mound and dispense it as food throughout the rest of the colony, including the queen(s). After the queen ingests Award, she lays eggs that will not develop into workers. In addition, female offspring will not produce viable eggs, preventing the start of new colonies.

TurfGrids®

"Tough Stuff for Sports Turf"

The TurfGrid system is patented, simple, logical and long overdue. It combines specially designed synthetic fibers into the natural grass field and increases the shear strength of the playing surface by 100%. This means sure footing and safety with less divots and injuries...just what good teams expect from their playing surface.

From football to baseball, to soccer, to polo, to golf, TurfGrids can replace or upgrade any surface.

ROOKIES

Utility Vehicle

The G-11 Yamahauler is Yamaha Golf Cars' rugged utility vehicle designed to handle almost any light hauling job. The Yamahauler has a dual-purpose design that enables both box- and flat-bed applications from a single, convertible vehicle.

The drop-side utility box permits almost immediate removal of both its sides and tailgate for flat-bed hauling. The bed is 4 feet by 4 feet, has 13.4 cubic feet of space and a 500-pound capacity. A frame-mounted trailer hitch with a towing weight capacity of 150 pounds is also available. Powered by Yamaha's 8.6 hp., four-stroke, overhead valve engine, it offers a maintenance-free, transistor-controlled ignition that ensures reliable operation. Bench seats raise to provide easy access to the engine for servicing.
