Fence Guard

Fence Guard is a yellow vinyl safety cover that attaches to the top of a chain-link fence surrounding athletic fields. The vinyl cover is designed to protect against injuries resulting from full-force contact with a chain-link fence during play.

The cover is made from rugged, weather-resistant heavy vinyl and secured to the fence with sturdy vinyl fasteners. Its highly visible color helps players judge the distance between themselves and the fence.

Colors available include yellow, orange and white, and come in 8-foot sections.

Three in One

With the Regenerator, it is possible to combine a well-kept lawn with efforts to recycle and reduce yard debris. The Regenerator is a chipper, shredder and lawn vacuum in one.

An important feature is that it discharges shredded debris into an enclosed container instead of on the ground, saving time and effort.

The chipper self-feeds limbs and branches up to 3 inches in diameter. The shredder utilizes free-swinging flail knives to produce finely ground compost material and mulch.

Micronutrient Fertilizers

Feature is part of a new generation of turf and ornamental micronutrient fertilizers under the Turgo label from United Horticultural Supply. Feature and Double Feature are a combination of fully chelated micronutrient elements, including iron, sulfur, manganese and magnesium. Compound breakdown is 12-percent nitrogen, 6-percent iron, 5-percent sulfur and 0.5-percent magnesium.

Double Feature is specially formulated for soils that are deficient in zinc, particularly those west of the Mississippi River.

PRODUCT UPDATE

Warm-Season Herbicide

Confront™, a post-emergence herbicide, was recently approved for use on warm-season turf. It controls up to 35 species of broadleaf weeds, including narrowleaf plantain, henbit, prostrate spurge and other broadleaves.

The herbicide can be used on Southern turfgrasses, including bahiagrass, Bermudagrass, centipedegrass and tall fescue. As a non-phenoxy herbicide, it can be used on all turf areas, including lawns, parks, golf courses, commercial grounds, residential areas and other public facilities.

Cutless Growth Regulator

Cutless 50W turf-growth regulator is now available from LESCO Inc. It is a foliar-applied and root-absorbed growth regulator that slows the growth rate of most commonly grown warm- and cool-season turfgrasses, many ornamental ground-cover species, herbaceous and woody ornamental plants and deciduous tree species. Its unique chemistry reduces growth rate without sacrificing development.

Quality of turf is improved by increasing density, color and inhibiting weed growth. This also reduces water requirements and mowing, which results in up to a 50-percent clipping reduction.
