

ROOKIES

Water Feature

The Fractional Series incorporates many features of other aeration systems but at a fraction of the cost. Three interchangeable patterns make these fountains ideal for small ponds on golf courses or parks. Patterns can be changed from "starburst" to "phoenix" to "rocket" by adjusting the diffuser ring. The 1/2-hp units are manufactured entirely from stainless steel and thermoplastics. Each comes with 100 feet of power cable and a mini power center. Since the motor is cooled by water rather than oil, no maintenance is needed!

Trash Vacuum

The Vigilante trash vacuum cleaner is designed to safely and effectively collect garbage. The diesel- or propane-powered vacuum uses accelerated air flow to clear all kinds of litter such as glass, plastic, cans, paper cups, leaves, etc. Litter is compacted from 70-percent total air content of refuse to 20 percent and is extruded into a polyethylene bag. The Vigilante offers the following features: solo operation, trash compaction that finishes in hygienically sealed bags to eliminate handling and portability — the 1,430-pound unit can be mounted on a trailer or a pickup. The five-meter-long hose can clean a 32-foot-radius area.

Communication Compliance

Hazard Label Advisories Inc. offers a turnkey, do-it-yourself package for hazard labeling of secondary containers that also includes tools needed for complying with the OSHA Hazard Communication Standard. In addition to an IBM PC-compatible DOS software program for printing hazard labels on a dot-matrix printer, the kit contains 300 four-color right-to-know label blanks in four sizes and employer's implementation manual. The kit also contains training aids such as employee guides, wall charts, an instructional video and personnel-file quiz documentation.

Encapsulant Polymers

Environmentally safe H-100 homopolymer encapsulates and permanently bonds petroleum products and other hydrocarbons such as kerosene, gasoline, diesel fuel, crude oil, jet fuel and all types of hydraulic oils. The polymer is insoluble in water and can safely absorb hydrocarbon spills on waterways. It absorbs and fixates more than 82 percent of its capacity in the first five minutes of use and will absorb more than 15 times its weight on most hydrocarbons.

Top-Entry Enclosure

Two models of an easy-access controller enclosure enable irrigation controllers to be mounted at a convenient viewing angle. When the lid is open, the irrigation schedule can be reviewed without bending over. Dual pistons provide smooth, safe lid operation.

The 100-percent stainless steel weather- and vandal-resistant enclosure ensures long-term rust-proof durability. Safety is maximized with a three-point locking system and recessed-access handle. Louvers at the top and bottom provide cross-flow ventilation, and filter screens protect the components from moisture, dirt and insects.
