Affordable Topdresser

For about 1/5 the price of a typical large-area topdresser, the Millcreek Topdresser/Spreaders will spread 2 cu. yds. in 7 minutes and topdress a football field in less than a day.

- Rugged construction, built to last.
- Adjustable spread pattern, 3 ft. to 10 ft. wide.
- Unsurpassed for compost, clippings and more.
- More versatility - simple, safe operation.

The Millcreek Topdresser/Spreaders will let you do more kinds of spreading jobs with less labor than ever before. Plus, you never pay too much for quality turf equipment from Millcreek.

Top Dressers

Turfco manufacturing is known best for its production of the Mete-R-Matic line of topdressers. The line includes the large area topdresser for fairways and athletic fields, the non-hydraulic tow-behind topdresser and the self-propelled walking topdresser. All three units utilize the revolutionary chevron design belt to handle both wet material and light applications. Other products that Turfco produces include sodcutters, an edger, aerators, a soil processor and a sod harvester.

T-Tek Synthetic Turf System

The Alternative Turf Surface

Too wet? Sterile soil? Too shady for grass? An indoor complex? Maintenance headaches? T-TEK is the answer. Designed by Mohawk Carpet, T-TEK incorporates u.v. stabilized synthetic grass fibers along with silica topdressing to create a realistic surface. Whether the application is golf greens or tee areas, soccer fields, tennis courts, pool side landscaping, and so on, you can count on T-TEK to perform. For a FREE catalog, call 800-327-8795.

CYGNET "48"

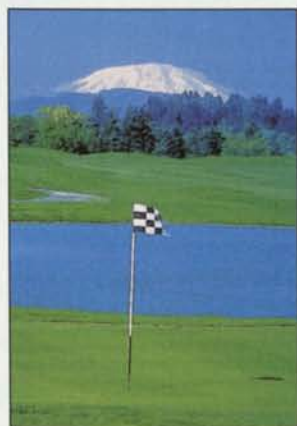

CYGNET is able to harvest 48" wide rolls consistently from very thin to over 2" thick. We can install these rolls without pulling or pushing them along the ground (no stretching or tearing). Our patented machines carry the rolls, turn them at ground speed, and install down a controllable slide for tighter seams. *NO ONE ELSE CAN MAKE THIS CLAIM.* U.S. Pat. #5,215,248 & 5,307,880.

Aeration

EP Aeration utilizes nature's own oxidant, ozone, as an adjunct to bottom laid, fine bubble air diffusion. This combination eliminates thermal stratification, and decreases nutrient loads, thereby reducing nuisance algae blooms. Systems are custom designed for optimum turnover rates, and oxygen transfer efficiency. EP Aeration

systems operate on 120 volt, single phase electrical power, and have no moving parts in the water, minimizing operational and maintenance costs.
