Base Anchors

New from RMP Sports Inc. is a base anchoring and driving system designed to install and remove base anchors in a matter of minutes. With the CH base

anchor and drive system, there is no need for digging, filling, tamping or concrete. Thus, it is easy to reposition and remove anchors any time, even after erosion, freezing or thawing have affected the ground. The CH anchors will work with existing bases, replacing one-inch or one and one-half inch anchors, and are especially useful for diamonds that need multiple base lengths. The system can also be used on volleyball courts, horse-shoe courts, foul poles or fencing.

What a Drag!

The Drag Lites feature a unique adjustable scarifier blade that breaks up hard-packed surfaces. The attached mat then grooms the surface to a "ready-to-play" condition — all for the price of standard steel-link mats that only smooth the surface. Drag Lite is made from recycled rubber to address today's

environmental concerns and provide exceptional durability. Available in three and six-foot widths, both models feature a structural steel lead bar and blade, industrial-grade fasteners and an extra-long pull chain.

Gas-Powered Marker

Rugged and easy to use, the gasoline-powered Brite Striper 1500 features a simple design and heavy-gauge welded-steel frame for trouble-free operation. Fuel capacity is seven gallons, for fewer refueling stops, and fully pneumatic ten-inch wheels provide smooth rolling even on rough athletic surfaces. The 3.5-hp Briggs & Stratton engine is designed to provide years of dependable service. A three-year warranty and a free 30-day test drive are available.
