STABILIZER

THE NATURAL SOLUTION

Natural and Fiber Reinforced
Sport and Recreational Surfaces

Stabilizer Golf

Stabilizer is a patented non-toxic premium organic soil additive for all soils or hardscape surfaces. It is a colorless, odorless, concentrated powder that is a natural adhesive that binds soil, aggregates or other materials together to produce a firm, yet breathable, drainable surface.

Using native or "local" materials, Stabilizer can be blended to create a stable surface for cart paths, driveways, parking areas, tee approaches, and sand trap basins. Stabilizer actually increases the compressive strength of soils and crushed aggregates.

Also Available: TurfGrids for sand reinforcement of tee and high traffic areas, golf course sand, screened top soil and decomposed granite.
