## Super-Topper

Sounds like a big job – to top dress the entire playing surface in the coliseum. Customer supplies material and requests a uniform spreading depth of 5/8-inch. Two men on the job – one spreading with the Super-Topper and one working – in new material with the Ballpark-6 Groomer. This is only two of Bannerman's line-up of sports turf equipment. Why not take a look at THE WHOLE KIT AND CABOODLE by checking your Reader Service Card.

## AerWay Turf Aerators

AerWay turf aerators give grounds managers more options for treating sports field compaction. A typical playing field can be

treated in less than 2 hours, ideal for working within a narrow "window of opportunity" on heavily used fields.

AerWay relieves soil compaction 7" and deeper. Patented AerWay Shattertines twist in the soil, cracking it sideways, and gently lifting it, to relieve even the most severe compaction. Play or practice can resume following a mowing pass.

Starting under \$3,000, AerWay units are extremely rugged, need very little maintenance, and minimize labor requirements.

## InvisibleTurf

InvisibleTurf is a new and improved way to achieve fast draining, durable sports turf surfaces with the ability to store and recycle nutrient-laden irrigation water back through a sand based root zone. InvisibleTurf has a high-void drainage layer below every square foot of the field, moving water away faster than the old perforated pipe method.
