## AerWay Turf Aerators

AerWay turf aerators give grounds managers more options for treating sports field compaction. A typical playing field can be

treated in less than 2 hours, ideal for working within a narrow "window of opportunity" on heavily used fields.

AerWay relieves soil compaction 7" and deeper. Patented AerWay Shattertines twist in the soil, cracking it sideways, and gently lifting it, to relieve even the most severe compaction. Play or practice can resume following a mowing pass.

Starting under \$3,000, AerWay units are extremely rugged, need very little maintenance, and minimize labor requirements.

## TURF PRIDE with RONSTAR®

### Better Than DNAs for Pre-emergence Weed Control.

Ronstar's unique chemistry provides longer-lasting weed control without impairing turf root development. Instead of root entry like DNAs, Ronstar is absorbed into weed shoots, killing germinating weed seedlings as they move upward through the soil surface. New root growth

from existing plants is never affected.

- Quicker turf comeback from winter stress, pest damage or traffic-injured spots
- Safe to use with sprigs
- Better control on DNA-resistant goosegrasses
- Allows faster recovery following nematode damage

**Contact your Howard Fertilizer representative for a sample to test on your turf.**

## Jaydee Drive Liner

The Jaydee Drive Liner is a self-propelled riding line marker. The 35-gallon paint tank carries enough marking material for a complete game field, or several practice fields. The 2-gallon flush tank cleans the discharge lines for work breaks, travel, or overnight. The center or side-mark spray shields are always operator-visible. A nearly zero turning radius reduces or eliminates back-and-turn maneuvers.

## Play Ball!

### "The Best Infield Conditioner I've Ever Used."

Turf managers love new Play Ball! Infield Conditioner because it's made from lightweight, highly porous diatomaceous earth that absorbs more water than clay conditioners, and keeps infields playable in wetter conditions. Play Ball! stays absorbent through repeated wet/dry cycles without breaking down into mud and dust. Grounds crews love the way it mixes in, and players appreciate the improved playing conditions. Don't get rained out - Play Ball!

## Drag Breaks Hard-Pack

Newstripe's Drag Lite, an infield maintaining drag mat, has an adjustable scarifier blade that breaks up hard-packed surfaces. The attached mat then grooms the surface to a "ready to play" condition. Offered in three- and six-inch models, the mats:

- are made from recycled rubber for durability;
- will not rust or kink;
- are backed by an 18-month warranty.

## Affordable Topdresser

For about 1/3 the price of a typical large-area topdresser, the Millcreek Topdresser/Spreader will spread 2 cu. yds. in 7 minutes and topdress a football field in 2 to 3 hours.

- Rugged construction, built to last.
- Adjustable spread pattern, 3 ft. to 10 ft. wide.
- Unsurpassed for compost, clippings and more.
- More versatility - simple, safe operation.

The Millcreek Topdresser/Spreader will let you do more kinds of spreading jobs with less labor than ever before. Plus, you never pay too much for quality turf equipment from Millcreek.

## The Right Tool for Clay & Turf

On grass sports fields aeration is possible without tearing the established turf. Guaranteed penetration in your hardest areas. (Play can resume immediately.) The AERA-VATOR® provides excellent results by reconditioning skinned areas or mixing top dressing. Penetration is controlled by varying PTO & ground speed. (Total

infield reconditioning or scarify only.)

Creates much softer playing area increasing absorption and reducing run off. The quality of a highly maintained playing field significantly reduces the potential for injury to players.

## InvisibleTurf

InvisibleTurf is a new and improved way to achieve fast draining, durable sports turf surfaces with the ability to store and recycle nutrient-laden irrigation water back through a sand based root zone. InvisibleTurf has a high-void drainage layer below every square foot of the field, moving water away faster than the old perforated pipe method.
