TURF PRIDE with RONSTAR®

Better Than DNAs for Pre-emergence Weed Control. Ronstar's unique chemistry provides longer-lasting weed control without impairing turf root development. Instead of root entry like DNAs, Ronstar is absorbed into weed shoots, killing germinating weed seedlings as they move upward through the soil surface. New root growth

from existing plants is never affected.

- Quicker turf comeback from winter stress, pest damage or traffic-injured spots
- Safe to use with sprigs
- Better control on DNA-resistant goosegrasses
- Allows faster recovery following nematode damage

Contact your Howard Fertilizer representative for a sample to test on your turf.

The Right Tool for Clay & Turf

On grass sports fields aeration is possible without tearing the established turf. Guaranteed penetration in your hardest areas. (Play can resume immediately.)

The AERA-VATOR® provides excellent results by reconditioning skinned areas or mixing top dressing. Penetration is controlled by varying PTO & ground speed. (Total

infield reconditioning or scarify only.)

Creates much softer playing area increasing absorption and reducing run off. The quality of a highly maintained playing field significantly reduces the potential for injury to players.

Diamond Demon

A pioneer in field grooming is proud to present the Diamond Demon Big Boy and Varsity models three point hitch series. These models plow, pulverize, drag, roll and brush finish. The Big Boy will furnish a big 76" wide finish to your ball diamond and will even work on tractors with a 6' tire span. The Varsity model offers a 54" working width and includes the same five functions as the Big Boy, but is designed for tractors with a 48" wheel span. (Kubota, Small Ford, John Deere, etc.)

Marking Machine

The Jaydee Drive Liner is a self-propelled riding line marker. The 35-gallon paint tank carries enough marking material for a complete game field, or several practice fields. The 2-gallon flush tank cleans the discharge lines for work breaks, travel, or overnight. The center or side-mark spray shields are always operator-visible. A nearly zero turning radius reduces or eliminates back-and-turn maneuvers.

Play Ball!

"The Best Infield Conditioner I've Ever Used."

Turf managers love new Play Ball! Infield Conditioner because it's made from lightweight, highly porous diatomaceous earth that absorbs more water than clay conditioners, and keeps infields playable in wetter conditions. Play Ball! stays absorbent through repeated wet/dry cycles without breaking down into mud and dust. Grounds crews love the way it mixes in, and players appreciate the improved playing conditions. Don't get rained out - Play Ball!

PRODUCT SHOWCASE

AerWay Turf Aerators

AerWay turf aerators give grounds managers more options for treating sports field compaction. A typical playing field can be

treated in less than 2 hours, ideal for working within a narrow "window of opportunity" on heavily used fields.

AerWay relieves soil compaction 7" and deeper. Patented AerWay Shattertines twist in the soil, cracking it sideways, and gently lifting it, to relieve even the most severe compaction. Play or practice can resume following a mowing pass.

Starting under \$3,000, AerWay units are extremely rugged, need very little maintenance, and minimize labor requirements.

Affordable Topdresser

For about 1/3 the price of a typical large-area topdresser, the Millcreek Topdresser/Spreader will spread 2 cu. yds. in 7 minutes and topdress a football field in 2 to 3 hours.

- Rugged construction, built to last.
- Adjustable spread pattern, 3 ft. to 10 ft. wide.
- Unsurpassed for compost, clippings and more.
- More versatility - simple, safe operation.

The Millcreek Topdresser/Spreader will let you do more kinds of spreading jobs with less labor than ever before. Plus, you never pay too much for quality turf equipment from Millcreek.

Finn's High Performance HydroSeeder

Finn Corporation has introduced the T90 Series II HydroSeeder®, with not only additional power and fuel efficiency, but improved mechanical design and durability, added operational design benefits, and extra safety features.

Improvements include a new 4 cylinder, 34 horsepower Kubota diesel engine, reducing emissions and increasing fuel efficiency; direct drive pump/clutch configuration; and a full platform tower enabling increased maneuverability for the operator.

The new Finn T-90 II is designed for a wide variety of mid-size hydroseeding projects and is capable of seeding, fertilizing and mulching up to a one-quarter acre per load in an easy one-step process.
