

## Add life to rubber tracks

Futura Coatings has developed TrackFlex 8903, a sprayable finish for rubber running tracks. It restores texture to worn tracks, and is extremely color stable.

A standard 400-m, 4- to 6-lane track can be sprayed within a few days. After

a short strengthening time, the track is ready for re-stripping and general use. TrackFlex is environmentally safe; it is 78% solids by volume and contains no volatile organic content.

## MVP stripes fields

MVP aerosol field-marking paint from Pioneer provides a fast, economical choice for striping athletic playing fields. The 24-oz. cans hold 22% more paint than ordinary spray cans, so fewer changes are needed to stripe a field.

MVP contains Optiwite optical

brighteners for bright white lines under natural light or stadium floodlights. MVP comes ready to use, dries quickly, won't wash away in the rain, and is guaranteed not to harm grass.

## Lasting fertilizer

J.R. Simplot introduces SuperTurf, a controlled-release fertilizer designed to last up to three months. SuperTurf combines Turf Supreme, of the BEST line, with POLYON polymer and TriKote polymer/sulfur-coated urea prills to create a predictable and long-lasting,

55% controlled-release, 25-5-5 product.

SuperTurf's tough, crack-resistant membrane is not affected by soil pH, microbes or moisture - only soil temperature.

9011	Site amenities
9012	Sod
9013	Turf equipment

## NOW *One pass aerating and clean-up!*

### With Goossen's new *Versa-Vac Aerator Attachment*

Turf can now be aerated and cores harvested in just one pass.

With one single pass, Goossen's 50-inch aerator attachment

penetrates the soil with hydraulically controlled pressure followed by a 70-inch counter-rotating steel flail rake that pulverizes the cores allowing the thatch to be lifted into the trailer while the soil is left behind as a fine top dressing.

Immediate pick-up of cores eliminates the smashing that occurs when the cores are driven over by other methods used for harvesting. A finishing roller smooths the turf where the cores were extracted. The rake has steel knives or rubber fingers which are interchangeable depending upon the type of soil being treated.

Interchangeable decks are also available for mowing, sweeping and vacuuming. Let the Versa-Vac meet all your turf care needs.
