

Low maintenance, high quality mowing

The self-adjusting cutting unit Victory Reel provides quality daily cutting without the hassle of constant adjustments. Four equally spaced contact points across the bedknife allow light spring pressure. The reel assemblies remain in constant pressure and adjustment so blades remain sharp. Rinse off the reels at the end of the day and the unit is ready for the next mowing job.

Four-in-one groomer

Fieldmaster Infield Groomer combines four jobs in one unit to produce firm, safe and attractive skinned areas. The groomer opens infields with spring tines, levels with a double leveling bar, rolls and finishes the job with a 5-inch wide brush that gives infields a professional appearance. Available in 4- and 6-foot widths, the pull behind groomer is constructed of a durable, tubular welded frame for durability.

Skid Steer Loader

T-245 HDK Skid steer loader offers big-machine performance for digging, lifting, loading and pushing. It has a 2,400-pound lifting capacity and an 87-net-horsepower Kubota turbocharged diesel engine. Two 3-inch bucket cylinder are designed to provide high front-end strength and a breakout force of more than 6,970 pounds. In addition, the loader's heavy-duty boom arms are designed

and built to withstand the stress of high-impact shock loading, day after day. A wheelbase of 44.8 inches provides smooth, stable operating regardless of terrain. An optional high-flow hydraulic package is also available to

power attachments such as large cold planers, rock saws and trenchers.

Turf Plugger

The 2-inch Turf Plugger is designed to replace small areas of damaged turf with new plugs. The plugger stores turf plugs cut from any nursery area in the zinc-plated steel tube handle. As damaged areas are cut, new plugs emerge from the top of the tube for replacement. The unit includes an adjustable blade for cutting to a depth of 4 inches.

Sprinkler Pop-Ups

Designed to pop-up when in use and retract, out of sight, when not in operation, the XP Series of micro-spray pop-ups cuts down on potential problems associated with conventional micro-spray poly risers. Available in 2-, 4-, and 6-inch pop-up heights, the series' retractable design accommodates a number of landscape watering requirements. XP pop-ups connect to the water supply via 1/4 inch distribution tubing instead of threading onto conventional 1/2 inch fittings. A protective flange at the bottom of the head protects the barb from possible damage, and a self-flushing, pressure-activated wiper seal assures reliable pop-up and pop-down.
