Bush Hog

Three-Gang Reel Mower

- * Bush Hog's Reel Mowers provide the consistent quality cut of reel mowers at a fraction of the cost of self-contained units
 - * Reels can be operated behind tractors with minimal horsepower
 - * Requires only 19 to 30 horsepower
 - * provides 3/8 to 3-1/4 inch mowing heights and cutting width of 83, 138 and 192 inches
 - * Mowers carry a two-year limited warranty against defects in material and workmanship, including the belts
 - * Reels carry a lifetime warranty against bending and breaking
- Selection of four to nine blade reels are available

* The heavy-duty rollers have wear points that are durable, greaseable and replaceable.

* Features heavy-duty gearbox, plated jackshafts to reduce rust, cast hubs on tires and wheels, easy to replace blades, tires that can be changed easily without removing reels and V-belt guard that can be removed without removing the head

Toro

Groundmaster 3500-D Rotary Mower

- * Full roller behind each deck to provide field striping patterns
- * Independent, full floating 27-inch decks provide excellent cutting performance with a 68-inch width of cut
- * Optional 72-inch cut for less undulating turf, such as sports fields

* Cutting system slides decks 12 inches left or right of center (24 inch full travel) to achieve varied tire tracking with the same field patterns

* Powered by a Kubota 35-horsepower turbo-charged, liquid-cooled, three cylinder diesel engine.

* Three-wheel drive traction system provides traction by supplying power to two of the three wheels at all times.

* Power steering, tilt steering, adjustable seat and easy to use controls.

Woods Equipment Co.

Batwing 3180 Series 3 Cutter

- * Heavy-duty 15-foot flexible wing rotary cutter offers exceptional cutting performance
- * Features bottom side, heavy gauge, high strength steel box frame construction
- * Top deck sheds water and debris, preventing corrosion
- * Gearbox shield redesigned into one piece that flips up intact for easy maintenance.
- * Deck protection plates prevent deck damage from a bent blade
- * Constant Velocity input driveline is upgraded to Category 6 Heavy, the highest in the industry
- * One-piece ductile iron spring-loaded wheel arm increases durability
- * Other features include a 180-inch cutting width and a blade tip speed of 16,000 feet per minute
