

## Look at the Past

by Dr. Kent Kurtz

Very early motorized mower by Ransomes. The first such model was built in 1902. It was a model like this that won the competitive demonstration against steam mowers in 1905.

The first tractor-drawn tri-aerifier, developed by Tom Mascaro and used on athletic fields-circa 1950's.

 F (800) 888-0457 or (615) 793-9525

An early walk-behind aerifier developed by Tom Mascaro, circa 1950's

Mixing chemicals, circa 1940-1950.  
Note: no protection (but what an outfit!).

The world's first electrically operated mower, circa 1926.

A Leyland steam-powered mower designed for sports turf.

An early out-front reel mower (low rider).  
Note the steel tires on the tractor (circa 1930s).

## Earth&Turf

# Finally!

A

topdresser designed to scoop up its own load

## Scoop & Spread™

The new concept for spreading dry, flowable materials.

- **Labor-Saving!** One-person operation from beginning to end of topdressing.
- **Affordable!** Simple, exclusive design and simplified components makes the *Scoop & Spread* cost effective to operate.
- **Economy!** Self-loading, hydraulically operated hopper eliminates the need for a second tractor to load materials.
- **Profits!** Using *Scoop & Spread* helps boost profits and reduce budget costs.
