

The McFarland Experience

BY CHRIS BRINDLEY

McFarland School District was the host of the June 12 Wisconsin STMA Chapter Meeting. The weather cooperated and the educational demonstrations were superb, providing the 60 attendees with an outstanding day.

Rich Miller and Paul Buchholz opened the meeting with greetings and introductions. The first speaker was Patricia Kandziora, the IPM programs specialist from the Wisconsin Department of Agriculture, Trade and Consumer Protection. Her topic was the legal requirements for pesticide use at Wisconsin schools. Two of the issues that became mandatory as of August 2001 are: 1) a person has to be certified in the appropriate category to apply pesticides to school grounds, and 2) posting of treated school areas at the time of application and 72 hours thereafter. Patricia also was available throughout the remainder of the day to answer questions for the attendees.

Dr. Wayne Kussow introduced the next speaker, Kevin Hensler. Kevin is new to the staff of the University of Wisconsin Extension and has many exciting things in the works for the turf industry. His main objective is to form an integrated turf management program for individual sites. This entails evaluating the site and developing a turf program tailored for that site. Kevin also is working on a monthly Internet newsletter to inform people about turf issues.

After Kevin's talk, the group split up into two groups to better view the demonstration

sessions. One group started with an excellent presentation by the duo of Paul Zwaska and Craig Schlender on how to properly build a pitching mound. Both brought great tools to make the job easier and more efficient. Paul demonstrated his idea of grinding down a garden rake to form a sharp edge. It was unbelievable to see how it raked in clay and how it cleaned where lips were forming along the infields. It's amazing to see the improvement a simple change to a tool can make. Craig brought a template to form the flat area around the pitching rubber, a simple but very useful tool.

The second group started with a demonstration geared toward football field improvements. Vince Johnson and Rich Miller brought and demonstrated the equipment that included core aerifiers, topdressers, a verti-drain, and a verti-cutter. They showed how aeration will open thatch areas, allow for better water infiltration, reduce compaction, and increase rooting into the underlying soil. They also demonstrated topdressing and discussed the functions of a topdressing program to maintain a high quality turf. Some of these functions include smoothing the turf, filling in damaged areas, reducing thatch, and filling in holes left by core aeration. After an hour, the groups switched so all could get the full benefit of both demonstrations.

Once again, WSTMA had a successful meeting with each person learning or seeing at least one new thing. The Chapter expresses special thanks to Jim Crawford and his crew at McFarland School District for being such great hosts. The Chapter's next event is the summer field day at the Noer Center on August 13. **ST**
