TURF DIAGNOSTICS & DESIGN
“Managing the Elements Through Science”

Field Stability & Hardness Testing for Artificial and Natural Turf
ASTM F355A
ASTM F1936
ASTM F1702

Construction Quality Control Testing
Annual Audits

Gmax Testing, Impact Testing, Hardness Testing, whatever you want to call it, we provide it. Most experts recommend Gmax testing for construction quality control, then annually to verify field integrity.

You spend a lot of money on your fields, shouldn’t you be using our cost-effective services to ensure they’re in proper condition?

Subgrade testing also available!

We are an independent testing company, not affiliated with any suppliers.

WaterWick’s patented gravel-vein injection system creates a permanent answer to chronic wet turf problems. So the game goes on without delay.

- Improves drainage and aeration
- Fundamentally non-invasive. Treated turf is immediately ready for play
- Proven in golf course, sports turf and landscape applications

Low-compaction WaterWick unit is ideal for golf greens and other fine turf. Or choose our innovative 3-point hitch system for your tractor — it injects WaterWick drainage, trenches, pulls pipe, lays wire and more.

Don’t let wet turf bog you down. Contact WaterWick.

Fence Guard® protective covers for chain link fencing from Partac Peat Corp. are available in six colors—safety yellow, dark green, red, white, blue, and orange—as well as two grades—premium and standard. These UV-resistant, polyethylene covers protect players from injuries and provide a distinctive look to your fencing.

Fence Guard® comes in cartons of ten 8-ft. sections with fifty 8-in. UV-resistant ties for securing every 2 feet to fence. With a 5-year manufacturer’s limited warranty.

For safety and uniform appearance, you should remove crowns from the tops of fence posts so that the entire fence top is covered; ends can be butted or overlapped, and the product is easy to cut.

Bottom Guard®, which serves the same safety and appearance purpose, also reduces erosion and eases weed cutting.

**TURFACE**

**KEEPS AMERICA PLAYING**

50 Years of Leadership

For more than 40 years, PROFILE Products LLC has been the leading manufacturer of soil modification products, including the TURFACE® line of infield and sports turf conditioners and mound clay products. Patented TURFACE Pro League® conditions infield soils for exceptional moisture absorption, increased safety and maximized athletic performance. PROFILE also offers TURFACE MVP®, which eliminates compaction, bad ball hops and rainouts on skinned infields; TURFACE Quick Dry® is designed to absorb excess water during wet conditions and to become a part of the infield mix; TURFACE Gray and TURFACERed are infield conditioners that are manufactured in gray and red tones for non-glare surfaces and greater ball visibility; and TURFACE Mound Clay is the clay used to build mounds on leading professional fields in the major leagues.
