

Workshop draws 70 to upscale local fields

BY JERRY ROCHE

"Build it and they will come." Not groundskeeper Tim Lewis's exact words, but close. What Lewis actually said was: "Our new fields have already started to pay for themselves in rentals."

Lewis's fields at Bohlken Park in Fairview Park, OH, were the site of an October 2002 workshop sponsored by Baker Vehicle Systems, Macedonia, OH. More than 70 Cleveland-area sports-turf managers attended.

"This year, we ran baseball games from mid-March to mid-October," Lewis said. "We had 91 games on Field No. 1."

The park (four baseball fields, one girls' softball field and one soccer field) was shut down in June 2000, and re-opened in June 2001, after crews had laid 600 yards of new sod. When the park re-opened, it featured a baseball field with one of the few grass infields in the area.

"The four baseball fields have 31 irrigation zones with 150 heads," Lewis told the gathering. "The infields are a mix of sand, silt and clay, topdressed with Diamond Pro and Turface, which do a tremendous job when mixed together. There's also a strip of sod around the outside edge of the three dirt infields to keep the infield mix from going onto the concrete and going down the drains when it rains."

Lewis spent 19 years as a groundskeeper at old Cleveland Municipal Stadium, which was home to the MLB Indians and NFL Browns. "When the kids play here, I want them to feel like they're at Jacobs Field," he said, referring to the Indians' current home field.

Rob Palmer of Weed Pro, Sheffield Village, OH, said

that the fertilization schedule is based on a late-fall application. "We apply three pounds of nitrogen from September to late November," he said. "And we check the soil pH twice a year, because if the pH is off, you don't get the result you want from the fertilizer. As a general rule of thumb, the program we use at Bohlken Park would work on a number of clay-based fields."

Greg Elliot, head groundskeeper for the new Lake County Captains Class A minor-league baseball team, suggested urea. "It's the cheapest fall fertilization product, and it's quickest [to green up] when it heats up in the spring," he said. "If you don't have irrigation, one pound of organic nitrogen in the summer might be the way to go. But you should rotate the products you use frequently."

Paul Gillen of Aerway, Ontario, Canada, demonstrated his aeration equipment. He was pleased with the turnout. "Athletic-field managers should do more of this thing," he said, "where they can meet and learn from each other at the local level. There are plenty of distributors who are glad to sponsor this kind of event."

Fairview Park Rec Department director Tim Pinchek and Rick Baker and Ron Wolf of Baker Vehicle Systems organized the event. Test equipment and product information were provided by Aerway, National Mower, Jacobsen, Steiner, Excel Hustler, Turfco, Smithco, Cushman, Broyhill, Soil Reliever, Ryan, Kioto, Diamond Pro, ProSource One, Harmony Products, and Ryan/Textron.

Jerry Roche is editor of Landscape & Irrigation.

Diamond Pro and Turface do a "tremendous job when mixed together," says groundskeeper Tim Lewis.

BOXES ARE WATERPROOF

Vista Professional Outdoor Lighting's 120v HID (high-density discharge) ballast boxes now feature waterproof compartments for all above ground fixture installations. Made of glass-reinforced polymer, the boxes are designed to withstand extremes in sea air, moisture, and high temps.

Injection-molded covers have a textured finish and a 1/2-in. NPSM hub for direct fixture mounts, or blank for remote mounts.

SCARE THOSE GEESE

GatorGuard is a life-sized floating replica of an alligator head designed to scare geese, ducks, fish-eating birds and small animals from water areas. The GatorGuard moves and bounces around, and its mirror-backed flashing eyes reflect the sun from constantly changing angles so birds think this predator is watching their every move.

The product works in areas where gators aren't natural because it is based on instinctive fear rather than experienced fear.

good things
come in
small packages

When it comes to precision grading, bigger isn't always better. At LaserLeveling we understand this important fact. The Super CourtMaster has been engineered to work on nearly any traction unit available on the market today. This compact system allows to automatically grade your material within a remarkable $\frac{1}{4}$ of an inch.

The Super CourtMaster also gives you the benefits and features you have come to expect from LaserLeveling.

So what are you waiting for, try this on for size...

ATV BASKETS

The heavy duty ATV front, rear and rear drop baskets provide extra room for hauling. Baskets are universal fit for most ATVs, mount quickly over OEM racks and have 1/2-in., 16 gauge steel frames and heavy-duty 14 gauge steel mesh. The deeper rear drop basket provides extra room for hauling bulkier items such as fuel cans and coolers.

VIVA LA REVOLUTION

Promats, a leader in stadium field wall padding with more than 350 major installations worldwide, introduces a revolutionary new pad using SKYDEX cushioning materials. PROMATS pads with this technology creates a more durable, almost 60 percent lighter, and superior impact absorbing product, says the company.

Instead of using foam and wood backing, these pads use the same cushioning technology as Nike, Burton and Airwalk to create their footwear. No foams, gels, pressurized air or encapsulated air bags are used to create SKYDEX cushioning.

THATCH MASTER

FINE TURF VERTI-CUTS

Now
available
in 72"
Width

BENEFITS

Along with other management practiced, regular verti-cutting is a tool that can help to maintain or create a World Class field.

It does this in several ways:

1. Cuts booth stolons & rhizomes creating growth and a thick, lush turf.
2. Removes excess thatch allowing gas exchange and facilitating water infiltration.
3. Creates seedbed for overseeding.
4. Helps transition by thinning out overseeded grass and stimulating growth of the underlying turf.

SPRINKLER HEAD TRIMMERS

Kenyon Tools has sprinkler head trimmers in seven sizes: 2 3/4, 3, 4, 6, 7, 8, and 10-in. diameters. Trim grass from around sprinkler heads or utility covers by pressing the head of the tool into turf and twisting a half turn. Saves time plus eliminates risk of yellow bowls often produced by string trimmers. Sickle blades with scalloped edges produce a clean round divot that can be picked up by a mower, says the company.

Scholarships

The SAFE Foundation recognizes that the future of the industry lies in the education, dedication and commitment of outstanding students such as these.

Funding for the SAFE scholarships comes from members of the Sports Turf Managers Association through their participation in the Raffle, Silent and Live Auctions at the Association's annual Conference held each January, and through special contributions to SAFE earmarked for the Scholarship Fund. In addition to the monetary award, all of the SAFE, Fred Grau and Dr. James R. Watson Scholarship recipients are provided with full registration to the STMA Annual Conference and up to \$500 toward their expenses to attend the Conference.

The \$500 Dr. Fred Grau Scholarship, since 1997 designated for the students of 2-year technical programs or community colleges will go to Loyd C. Bowman, Michigan State University.

Four \$500 SAFE Foundation Scholarships, designated for students of 2-year techni-

The SAFE Foundation recognizes that the future of the industry lies in the education, dedication and commitment of outstanding students such as these.

cal programs or community colleges, will be presented to: Elsworth R. Sayre, Jr., Eastern Kentucky University; Luke Hall, Walla Walla Community College; Dustin Hamilton, Owens Community College; and Stephen Wood, Michigan State University.

The SAFE Foundation will award four \$1,000 Scholarships for undergraduate students of 4-year college or university programs. The Scholarships will go to: Nicholas Gow, Iowa State University; Ryan Snead, Oregon State University; Jeffery Hermes, Purdue University; and Jeremy Menna, The Pennsylvania State University.

The first of two Scholarships established by The Toro Company in the

name of long-time green industry researcher and consultant, Dr. James R. Watson, a \$1,000 scholarship will be issued to undergraduate student Matthew Slingerland, The Pennsylvania State University.

Two SAFE Foundation \$1,500 Scholarships for graduate students will go to Dusty Robinson, Texas A & M University, and Gengyun Zhang, Rutgers University.

The second Dr. James R. Watson Scholarship, this one designated for a graduate student for \$1,500, will be issued to Jason Henderson, Michigan State University.

For information on SAFE or the SAFE Scholarship program, please contact Steve Trusty at 800/323-3875 or via email at SAFE@st.omhcoxmail.com.
