

### WIN AN AGRONOMIC CONSULTATION

How would you like to have your own personal agronomist? Visit [www.torosports.com](http://www.torosports.com) before March 30 to complete a brief survey about your needs and you'll be registered to win a consultation from Toro, with Van Cline, Ph.D., specifically about your sports field.

Dr. Cline will learn the background and history of your turf with an emphasis on: soil conditions; species mix; drainage; and management practices including mowing, fertilization, irrigation, and aeration. Then, when your schedules allow, Dr. Cline will visit and look over your sports field in person, talk over turf problems and concerns, and provide suggestions for improvements.

The winner will be announced on April 1, 2003.

### ELECTRIC WALKING GREENS MOWER

Jacobsen has introduced its new E-Walk all-electric walking greens mower that has no oil, no hydraulic fluids, and no emissions and is virtually noiseless. Independent, weather sealed, 48 V brushless DC electric motors drive the unit. One controls ground speed while the other gives the operator the ability to adjust clip frequency independent of the mower's ground speed.

The unit features a quick-release snap-in/snap-out sealed battery pack with an easy-to-read charge level indicator. The electronically balanced, 11-blade reel can deliver tournament quality height of cut. The ergonomic design of the Operator Presence Control increases operator comfort and control while reducing fatigue.
