Micro Rain
The simple way to irrigate sports fields!

- Affordable - irrigate several fields with one machine
- Unit sits off the field and automatically travels entire length of field, nothing remains on the field after watering
- Automatic shutdown - unattended operation
- Efficient water powered turbine
- Quality built, computer robotic welded, lasts for years
- Engine booster pump option for one pass coverage
- Inexpensive and safe - less costly to install and maintain than inground and no sprinkler to stop or slip on

CHAIN LINK FENCE GUARDS

Fence Guard protective covers for chain link fencing from Partac Peat Corp. are available in six colors - safety yellow, dark green, red, white, blue, and orange - as well as two grades - premium and standard. These UV-resistant, polyethylene covers protect players from injuries and provide a distinctive look to your fencing.

Fence Guard comes in cartons of ten 8-ft. sections with fifty 8-in. UV-resistant ties for securing every 2 feet to fence. With a 5-year manufacturer's limited warranty.

For safety and uniform appearance, you should remove crowns from the tops of fence posts so that the entire fence top is covered; ends can be butted or overlapped, and the product is easy to cut.

Bottom Guard, which serves the same safety and appearance purpose, also reduces erosion and eases weed cutting.

TURF DIAGNOSTICS & DESIGN
"Managing the Elements Through Science"

Field Stability & Hardness Testing for Artificial and Natural Turf

ASTM F355A
ASTM F1936
ASTM F1702

Construction Quality Control Testing
Annual Audits

Gmax Testing, Impact Testing, Hardness Testing, whatever you want to call it, we provide it. Most experts recommend Gmax testing for construction quality control, then annually to verify field integrity.

You spend a lot of money on your fields, shouldn’t you be using our cost-effective services to ensure they’re in proper condition? Subgrade testing also available!

We are an independent testing company, not affiliated with any suppliers.
