

Utility vehicle overview

If your budget has you thinking "new UV" here's a good place to start shopping:

TORO WORKMAN E2050

The Toro Company announces the introduction of its first electric product for sports turf managers, the Toro Workman e2050 utility vehicle, based on the Toro Workman mid-duty 1100/2100/2110 platform. When the battery levels become significantly low, the unit limits top speed and acceleration, alerting the operator to

locate a charging location.

The Toro Company/800-803-8676

BOBCAT'S TOOLCAT 5600

Bobcat Company has added two options to its Toolcat 5600 utility machines, a turbo-charged, diesel engine and high-flow auxiliary hydraulics. Other attachments, including a high-flow snow blower, wood chipper and stump grinder, are compatible with the new high flow option. An optional 56-hp, turbo-charged, Kubota diesel engine is Tier-II emissions-compliant. The turbo model has an additional fuel tank, providing a 92 percent increase in fuel capacity and improved performance in high altitudes.

JOHN DEERE GATOR TX TURF

Part of the new T-Series Gators, these models were designed with turf professionals in mind, featuring turf-friendly tires, improved operator comfort, and quieter operation. With all-wheel suspension and all-wheel hydraulic disc brakes, the Gator TX Turf can go anywhere on or off turf. And with a frame-isolated engine and exhaust system, a large-volume muffler and quiet foot-pedal operation, it's quiet.

BROYHILL'S NEW TERRASPORT

The new TerraSport utility vehicle boasts a 1500 lb. total capacity and robotic-welded tubular steel frame construction. With a 16-hp Briggs and Stratton engine, continuously variable transmission (CVT), power steering, and multi-leaf spring, dual shock suspension, the units provide a smooth ride at speeds up to 20-mph. Optional rear cargo box offers a 1/3 - 2/3 design, making room for a toolbox, sprayer tank, or line marker paint tank, and is located behind the seat. Steel or wood boxes (with removable 10-in. sides) convert to a 48 x 48-in. flatbed.

TIFSPORT

Why Does This Certified Bermudagrass Variety Make Such Good Sense for Sunbelt Playing Fields?

Closer Mowing Heights

Research conducted in Tifton GA shows that TifSport can tolerate closer mowing heights than Tifway and Midiron. With TifSport, mowing fanatics can mow away to their heart's content.

Superior Turf Density

TifSport has a greater density than Tifway - about a 1 point difference on a 10 point scale. And it's about 3 points better than common bermudagrass.

Good Lateral Growth

TifSport is more aggressive than genetically pure Tifway, especially during the cool weather months. This may account for TifSport's rapid grow-in and repair time.

Superior Sod Strength

TifSport's superior sod strength means quicker installation with less waste, and that's got to be good for your bottom line.

Excellent Traffic Tolerance

TifSport's turf density, sod strength and good lateral growth rate give it a high ranking for traffic tolerance.

Upright Leaf Blade Orientation

TifSport's leaf blade stiffness is being touted by many turfgrass professionals. With TifSport players seem to get better bounces.

Impressive Leaf Texture

TifSport has a similar leaf texture to Tifway, and a finer leaf texture than most other grasses. TifSport will deliver excellent footing for sports fields of all stripes.

Dark Green Color

Pastel green is passé. TifSport's dark emerald green color will make your fields the envy of the neighborhood.

Drought Tough

All grass has to have water, but TifSport can help you make it through those summer water restrictions. It stays healthier and recovers faster from drought than most other bermudas.

Cold Tolerant

TifSport has expanded the northern limit for warm season bermudagrasses. It has survived multiple winters as far north as Stillwater OK & Lexington KY.

Pest Resistant

Research has shown that mole ceickets just plain don't like TifSport. That's just one more reason why you should.

Vigorous Root System

This inside view of a typical TifSport plug shows TifSport's impressive root system, stolons and rhizomes.

REDEXIM CHARTERHOUSE'S OVERSEEDERS

Two new models from Redexim Charterhouse's OverSeeder line, the 1575 and the 2075. With its unequal disc slitting system, the OverSeeder plants the seed firmly in the ground, providing seed to soil contact. A tight spacing under 3 inches, so that each seed coulter is individually suspended and follows terrain. The new seed box uses a roller design allowing the machine an infinite range of feed rates with all seed types, from the very large to the very smallest bentgrass seed.

KROMER CONSOLIDATES OPERATIONS

Kromer (www.kromerco.com), the manufacturer of field maintenance products since 1945, has consolidated three manufacturing locations into one to maximize its manufacturing efficiency and output. The company also added a new Field Paint Mixing Station, with a 175- or 300-gal. capacity. This allows you to mix paint in bulk and store your "ready to use" mix for weeks. Also, Kromer products are now powder coated. This improves the finish and prevents rust better than wet paint.

Who's telling your story?

Your work results in more available oxygen and fewer allergens, noise reduction and lower cooling bills, thicker turf that filters pollutants and landscapes that increase property values. There are endless environmental, economic and lifestyle benefits that green spaces provide—yet consumers don't know about them. They don't understand the true value of your products and services.

Join us in telling the whole story of what you do. Project EverGreen is an organization dedicated to educating the public about the value of green spaces and encouraging responsible practices.

To make a contribution or find out more, call 877-758-4835 or visit www.projectevergreen.com.

TURFCO'S TM-62 AERATOR

Available in both tow-type and three-point hitch mounted models, the TM-62 aerator from Turfco Direct can aerate a football field in 35 minutes or less, says the company. Independently mounted tine wheel sets allow turning without tearing the turf, and the TM-62 provides deep four-inch coring action to maximize aeration quality. The hitch mounted has built-in storage legs, which allow storage without a pallet. Turfco/800-679-8201
For information, circle 073 or see <http://www.oners.ims.ca/5064-073>

SIDEWINDER POWER RAKE

Turf Teq, LLC has introduced a SideWinder Power Rake for all types of seedbed preparation. The unit features a 36-in. wide drum. The pivot angle of the drum can be adjusted to the left or right from the operator position. The unit also features a hydrostatic transmission, 13 horsepower Honda engine and on-the-go differential lock. Turf Teq, LL/866-503-8873

TY-CROP'S NEW SPINNER TECHNOLOGY

Ty-Crop has developed a new twin spinner for its ProPass 180 that has the ability when topdressing heavy and narrow, to see a clearly defined edge. This allows for easy matching of spread on your next pass. Also, the new spinner is designed to fit both the exiting and new ProPass, allowing all ProPass owners to take advantage of this new technology.

Also, the ProPass 180 tow model now has a new self-contained hydraulic power pack. This option allows a wide variety of work vehicles to tow the ProPass, since the tow vehicle does not need to have auxiliary hydraulics. This power pack was designed to optimize weight distribution; the weight of the power pack has been split front to back, with the hydraulic tank mounted on the rear and the engine/pump combination mounted on the front.

Ty-Crop/800-845-7249

STRIPING KITS FROM FERRIS

Ferris Industries now has striping kits, available for all IS 1500Z and IS 3000Z series zero-turns. The kit, which consists of a rubber flap system, lays the grass down to create patterns across the landscape. When paired with Ferris' exclusive suspension systems the consistency of cut and stripe pattern are precise. Ferris Industries/800-933-6175

CORONA CLIPPER'S IRRIGATION SHOVEL

Corona's SF 77020 Shovel with a small, 7x9-in. forged, one-piece tempered head and a large forward turned step. Perfect for working in close quarters among tightly spaced plantings, this shovel also has a solid core fiberglass handle with a thick molded poly jacket. The SS 65500 irrigation shovel has a blade made of 14-gauge steel that is connected to the handle with doubled rivets. The blade has a forward-turned step and a straighter lift angle, bringing the handle closer to the worker for more efficient digging.

Corona Clipper/800-847-7863

CLASSEN SELF-PROPELLED TURF SEEDER

Infinite speed from 0-3.4 mph eliminates fatigue on operator; units operate in forward and reverse, and the constant speed means more consistent seed placement. Engine options include 5.5-hp Honda or 5.5-hp Briggs & Stratton Intek for 237-lb. units, which can be converted to dethatcher or verticutter in minutes.

Classen products are now available through over 3,500 Little Wonder commercial sales and rental equipment dealerships nationwide.

DITCH WITCH MINI SKID STEER

Ditch Witch has released the SK350 mini skid steer. Combining compact size with power and versatility, the SK350 is engineered to work longer without refueling, run more compact utility attachments, and provide greater overall power and efficiency than other machines in the 20-hp class. The 7.5-gal. fuel tank means the machine can run for 5 hours or more without refueling. The entire unit is powered by a 20-hp Kohler engine, which comes standard with a heavy-duty air filter.

THE ROTADAIRON SOIL RENOVATOR™ ...

RotaDairon® understands the needs of turf-care professionals: high-quality, maintenance-free machines that do more in less time. It's those needs we had in mind when we designed and developed each part of our Soil Renovator™:

...THE SMART CHOICE FOR YOUR TURF

- V-body blades that dig with the point of the blade to avoid panning and allow for increased drainage;
- Screening rods, constructed from a special allied steel, that are virtually unbreakable to decrease the machine's downtime;
- Offset design to cover one tire track, eliminating the need for costly touch-up work;
- Machines in various sizes that attach to tractors, skid steers and mini skid steers.

Efficient. Flexible. Durable. The RotaDairon® Soil Renovator™. Choose the original single-pass machine for all your soil renovation projects.

To enroll in RotaDairon's dealer evaluation program, call 800/554.4863, fax 570/602.3053 or email rotadaironemrex@aol.com.

GRASSHOPPER'S POWERVAC

This large capacity vacuum collection system moves a high volume of air which carries even wet grass, high-moisture leaves, pine straw and dethatching debris to the collector. Deck-driven PowerVac eliminates the noise and extra maintenance of an auxiliary motor. Trash-ingesting steel impeller withstands abuse from hidden debris while reducing and compacting debris before depositing it into a Grasshopper collection system. Quik-D-Tatch design offers easy, one-step conversion to non-collection operation. For all True ZeroTurn, FrontMount, and MidMount (except models 218 and 220) mowers.

NEW HOLLAND'S SUB-COMPACT TRACTOR

New Holland's new TZ25DA Boomer sub-compact tractor has the most engine horsepower of any sub-compact on the market. All three TZ sub-compact models have the power to handle front or rear-mounted implements, from a snow blower to a tiller to a front-end loader. For traction control, the optional Sensitrak system (TZ22DA and TZ25DA

only) engages and disengages the 4WD automatically and only when required to reduce scuffing the turf, save wear and tear on the tires and increase the life of driveline components.

TURFCO DIRECT'S DETHATCHER 20

Constructed of 10-gauge welded steel, and Dethatcher 20 from Turfco Direct is powered by a 5.5-hp Honda engine. It features 52 heavy-duty flail blades to handle thick, heavy thatch. Offering up to 10,000 square feet per hour productivity, the unit's light weight and ball-bearing wheels provide maneuverability, even on rough turf. Depth is controlled by a micro-screw with large plastic grips for tool-free adjustments. A folding handle facilitates transport.

A never-been-seen-before close-up look at what actually happens under the surface. Each DryJect blast forms a unique aeration channel that fractures the soil three dimensionally and fills it with the amendment you select. At typical 3 inch spacings, you can see how one application substantially modifies the sub-soil root zone all in one process. Excellent for applications on golf courses and sportsfields, anywhere fine turf is grown. See the full animation on our website.

For the first time ever, see the unique aeration and subsurface injection of DryJect®.

Only DryJect Contractors give you this 3 dimensional, dynamic effect.

DryJect does two unique functions at once. First, as an aerator. Most aeration equipment punches, drills or slits; some pull plugs. Only DryJect aerates three dimensionally-side to side, front to back and even connects hole to hole. There's no glazing of hole walls, broken tines on buried rocks, changing tines or depth concerns of cracking drainage or other buried lines. It's a revolutionary concept using powered water - a patented Venturi process - to open the soil for air, water and amendments in high volume without disturbing the surface.

Secondly, it's the only machine that can inject while aerating. Following a water blast into the turf, it instantaneously injects a selection of flowable dry amendments - sand, peat, diatomaceous earth, calcine clay, zeolites, top dressing, seed, wetting agents, insecticides, or biological products, you select the mix. For root zone modification, DryJect can use about one ton of material per green.

DryJect Service Center Contractors eliminate the traditional need for a crew to drag, fill and remove cores; saving a tremendous amount of labor and time. Some have calculated savings into six figures for a year. What's more, DryJect allows you to start a soil modification program even as part of your regular aeration.

Why own equipment when you can contract for it with an authorized, experienced DryJect Service Center Contractor? With over two dozen territories nationally, there's a dependable DryJect contractor near you. Check out the full animation on our website or phone today for more details, pricing.

Nobody has ever seen before the unique, dynamic pattern of three dimensional channels that are created by a typical DryJect application. The aggressive subsurface changes created allow for air, water and nutrients to feed the root zone like no other system on the market today without disrupting the surface. DryJect has been used on some of the nation's top golf venues including Oakmont, Winged Foot and Merion. Also, the Dallas Cowboys Training Center uses DryJect.

Over two dozen Contracting Service Center franchises nationally, DryJect has a location near you.

Contact details for authorized DryJect contractors (franchises) are listed on the web. Interested franchise candidates contact the Administrative Offices at 800-270-8873 or email info@dryject.com.
