

## To Sprig or To Seed? That is the question.

The newest elite turf-type featuring finer leaf texture, improved turf density, and significantly improved turf quality. With excellent tolerance to winter survival and reduced scalping, Sunbird is second only to Riviera in performance.

Developed by Pure Seed Testing in North Carolina, Savannah forms a dark green, low-growing turf with excellent turf quality and early spring green-up. Ideal for new turf installations.

Transcontinental represents a new generation of improved turf quality, color, and performance. With improved cold tolerance for winter survival, Transcontinental allows for quality bermudagrass performance in both hot, humid conditions and cooler, temperate climates.
