Session LE22
Managing Healthy Sports Fields
Tom Samples, Ph.D., University of Tennessee
Paul Sachs, North County Organics

Maintenance of high quality sports turf, including golf courses, rely on the adequate use of pesticides in order to protect against pests, and restore the competitive balance in favor of the turf. This session will cover two facets of pesticides on turfgrass. One will be the fate of pesticides in the environment and strategies for minimizing pesticide runoff and offsite movement. The other will cover cultural and chemical practices for managing specific weeds in turfgrass with various stressful conditions. Examples will be drawn from golf courses and professional sports fields, all the way down to your children's kick-up soccer fields, with suggestions on how you can help create and maintain a safer and better performing turfgrass.
