

1 Toolcat 5600

1. Bobcat's Toolcat 5600 utility work machine has four new attachments, rear hydraulic and power take-off (PTO) kits, and an enhanced drive system. The company says the unit combines all the best features of a utility loader, pickup truck, and attachment carrier. A Brushcat rotary cutter, sweeper, landscape rake, and combination bucket join more than 25 attachments already approved for the machine.

4 Tougher electric UV

4. Club Car has incorporated the high-performance power source into its line-up of utility vehicles. Known as IQ Plus, the powertrain enables electric utility vehicles to handle the same tough jobs that once required the strength of gasoline-powered vehicles. The system's high-output charger and eight 6-volt battery configuration gives vehicles a best-in-market range of 80 miles on a single charge. This gives users confidence that the vehicle can run all day without worrying about down time to recharge.

6 Newest Gator models

6. A new standard Operator Protective Structure (OPS) with lap and shoulder belt and expected Deere durability make the Gator HP Series among the toughest and most robust utility vehicles on the market. Customers will also benefit from an improved suspension that offers a smoother, more comfortable ride during "normal" off-road use. An optional heavy-duty front suspension kit is also now available for full cab machines and/or front-blade use. A redesigned Tier II diesel engine that offers performance and a quieter ride for operators of the Gator HPX 4x4 Diesel.
