Problem:
Perfect circles void of grass
Turfgrass Area: Lawn of Performing Arts Center
Location: Oxford, Mississippi
Grass Variety: 419 bermudagrass

Answer to John Mascaro’s Photo Quiz on Page 34

You’re Always Ahead of the Game with a COVERMASTER® Raincover...

“Excellent Quality... Competitive Prices...” wrote Johnson Bowie, Associate AD, Drexel University, Philadelphia, PA

Johnson’s comments confirm what we hear from the many groundskeepers who use a COVERMASTER® raincover to keep their fields dry and ready for play. Call us and we’ll gladly tell you more.

The COVERMASTER® Advantage...
• Superior in strength and UV resistance
• Outstanding heat reflective properties
• Light weight - easy to handle
• Widest materials for least number of seams
• Largest choice of weights and colors
• Backed by truly dependable warranties

The circles that are void of grass on the lawn at the University of Mississippi's Gertrude C. Ford Center Performing Arts Center were caused by the first presidential debate in September 2008. Ole Miss was the site of the first televised debate and preparations began over a year in advance of the event. The University spent over $5 million dollars not only to host the event, but also on event preparation as well as campus improvements. In addition to installing a fence around the entire campus, a bulldozer flattened the top of this hill half the size of a football field. Next a large portable building was erected on the site for the media. When finished it had 800 work stations, TV monitors, phone lines, high speed internet access and was fully air conditioned. The circular areas on the front side of the hill are where the outrigger feet had rested to level out the temporary foundation. You can still see the temporary electrical hookup left behind in the upper left corner of the picture.
