Problem: Irregular brown areas, some in straight lines
Turfgrass area: FirstEnergy Stadium
Location: Reading, PA
Grass Variety: Kentucky bluegrass

Answer to John Mascaro's Photo Quiz on Page 33

You're Always Ahead of the Game with a COVERMASTER® Raincover...

“Excellent Quality... Competitive Prices...”
wrote Johnson Bowie, Associate AD, Drexel University, Philadelphia, PA

Johnson’s comments confirm what we hear from the many groundskeepers who use a COVERMASTER® raincover to keep their fields dry and ready for play. Call us and we’ll gladly tell you more.

The COVERMASTER® Advantage...
• Superior in strength and UV resistance
• Outstanding heat reflective properties
• Light weight - easy to handle
• Widest materials for least number of seams
• Largest choice of weights and colors
• Backed by truly dependable warranties

**John Mascaro’s Photo Quiz**

**Answers from page 17**

**THESE IRREGULAR BROWN AREAS** were the result of a sleepover event after a Friday game at this stadium. The event attracted about 150 campers and 50 tents for this warm summer night out. The Sports Turf Manager started to see the grass die on Saturday night where one of the stadium’s high ranking supervisors had been camping with his kids. The grounds crew suspected the brown areas were caused by bug spray but the patterns were oddly shaped, with some in straight lines. The sports turf manager could make out some small green footprints surrounded by death from the overspray confirming their suspicions.

As it turned out the straight line of death was caused by spraying mosquito repellent while standing next to the tent. The bug spray must have hit the outside wall of the tent and then run off the tent damaging the turf. Another baseball game was also scheduled to be played that Saturday afternoon on the stadium field before the damage could grow out. Next year they will make sure the ALL the campers are instructed to go to the warning track to apply their insect repellent.
