

# JOHN MASCARO'S PHOTO QUIZ

John Mascaro is President of Turf-Tec International

Can you identify this sports turf problem?

- Problem:** Yellow turf on 40% of field
- Turfgrass area:** Soccer stadium
- Location:** Denver, Colorado
- Grass Variety:** Kentucky bluegrass

**Answer to John Mascaro's Photo Quiz on Page 33**

## You're Always Ahead of the Game with a COVERMASTER® Raincover...

**"Excellent Quality.. Competitive Prices..."**

wrote **Johnson Bowie**, Associate AD, Drexel University, Philadelphia, PA

Johnson's comments confirm what we hear from the many groundskeepers who use a COVERMASTER® raincover to keep their fields dry and ready for play. Call us and we'll gladly tell you more.

### The COVERMASTER® Advantage...

- Superior in strength and UV resistance
- Outstanding heat reflective properties
- Light weight - easy to handle
- Widest materials for least number of seams
- Largest choice of weights and colors
- Backed by truly dependable warranties

### TARP MACHINE VIDEO!

Call, fax or e-mail for a free video, material samples and a brochure.

Covers for football and soccer fields are also readily available.

TARP MACHINE™ lets you roll the cover on and off in minutes.

TARPMATE™ roller comes in 3 lengths with safety end caps.

# JOHN MASCARO'S PHOTO QUIZ

## Answers from page 17

**THE YELLOW TURF** on part of this soccer stadium is the result of a 3-day Phish concert over the Labor Day weekend. The day before the show, the rental flooring was delivered so the turf crew could cover the field that night. Once it arrived, the sports turf manager was informed that 40% of the covering was non-translucent even though 100% clear was ordered. Notice the gray (non-translucent) flooring on the bottom and the clear (translucent) flooring on the top.

By the time it was delivered, it was too close to show time to make any changes so they had to install what was delivered. Originally they thought the biggest issue would be no photosynthesis and yellowing of the plant. Come to find out it got so hot under the non-translucent flooring, the bluegrass turf actually experienced severe leaf tip burn on the field where the non-translucent flooring burned and the grass with the extreme heat of the Colorado sun. The turf actually got so hot that it might have even gone into a mid-summer dormancy. Two days after field was uncovered there was a Rapids home game. Two days after that started a weekend where they hosted two college soccer games, two lacrosse practices, a lacrosse game (USA/Canada) and a season ticket holder party on the field. After all the wear, they solid tine aerated, fertilized and tried to let the field recover. ■
