Q&A with Dr. David Minner

Continued from page 50

speed establishment. The strongest recommendation I can give you and the factor that will likely impact your success the most will be the seeding date. Construction projects are notorious for being delayed if you don't stay on top of the progress. Get the irrigation in as soon as possible even if it means seeding and watering some fields before others are completed. Set a seeding date of August 20

and hope for September 1. There is a huge difference between seeding the first of September compared to the end of September. Your target should be 100% turf cover by mid-October; more specifically no soil showing, two or more tillers on plants, and grass at a height that would require mowing. In my opinion you've got a fun project and a good plan; now make it happen. ■
