PRODUCT UPDATE

POWERED STRIPER

Paint an entire football field with one seven-gallon fillup of paint with Advantage Plus/Engine Power Pack line marking machine. The completely self-contained unit features a 1½ hp, four-stroke engine and a 4.25 CFM diaphragm compressor. The spray pattern can be adjusted from two to six inches wide. Other features include welded steel construction and pneumatic tires on ball bearing wheels, the sprayer is made to last. The spray head can be moved to either side of the unit. A single unit can be used for parking lot stripes, field marking and playground design painting.

RAKE LEAVES TRAP

Designed originally as a powered sand trap rake, the 725G Sandkat's new utensils bring it out of the bunker. Ingram has announced two new attachments for the three-wheel-drive unit and more are on the way.

A rake for ball park base paths and skinned infields is the first new attachment. When the infields are finished to perfection, switch the Sandkat over to a new three-drum aerator to cultivate the outfield.

The versatile unit is powered by a 16 hp engine and provides the operator with power steering. The attachments can be raised with a hydraulic lift on the rear. Operator comfort is provided by a shock-mounted seat and operator convenience package.

TALL FESCUE BLEND

Triathalawn is a new blend of four improved tall fescues for golf courses, athletic fields and sod production. The Apache, Bonanza, Falcon and Olympic tall fescues are finer leafed, darker green and more disease resistant than Kentucky 31. Together they have high drought and shade tolerance and adapt well to a wide variety of soil and climatic conditions.

Triathalawn can be mixed with up to ten percent Kentucky bluegrass in northern areas or overseeded into Kentucky 31 to enhance color, texture and density. Roots as deep as four feet help keep Triathalawn green and growing when other grasses have gone dormant in either summer or winter.

The blend has excellent seedling vigor. Since tall fescues do not creep, a seeding rate of six to ten pounds per thousand square feet is recommended. Triathalawn should be mowed at two inches.

POND FILTER

Healthy and attractive ponds benefit from the filtration and aeration provided by the Progressive Pond Filter. Mounted outside the water feature, the filter does not detract from appearance. A pre-filter strainer prevents fish and large debris from entering the system. A coarse filter then removes

particles such as plant parts and fish waste, and a final filter screens out microscopic algae.

The three filters in progression keep the unit from frequently clogging. Both biological and mechanical filtration are accomplished with a single device. The result is clear water even with fish and plants in the water.

The system is constructed of stainless steel and PVC and is powered by a quiet, two-speed pump. High speed allows the pump to provide the extra flow needed for a fountain or waterfall.

Bypass plumbing in the unit prevents excessive pump wear, maintains filtration levels, and adds adequate dissolved oxygen for fish even as the system approaches the full debris load.

FOUR YARD TOPDRESSER

When fairways or athletic fields require regular heavy topdressing, refilling becomes a time consuming, inefficient process. The new Multi Crop Top Dresser is a ruggedly built, four-cubic-yard unit for applying up to one inch of sand or soil evenly across large turf areas.

A unique dual-control system enables the tractor operator to maintain continuous and uniform flow of topdressing material without of calcined clay on baseball diamonds, salt on icy walks in the winter and any pulverized or screened material to large areas. The unit applies a 31-inch-wide swath of material at speeds up to 2½ miles per hour. An adjustable metering controls the flow of topdressing.

INTRODUCING...
MEDALLION™
100% TALL FESCUE SOD

All Fescue is not created equal and you should know why...

Pacific Sod's agronomists sought the top varieties of seed to create MEDALLION with the most desirable qualities possible...Color, Density, drought disease and temperature tolerance.

We have chosen not to tie MEDALLION to any one variety which may in time be outperformed by newer and better strains.

As a result, MEDALLION is a powerful combination of seeds, carefully selected to flourish even under the extremes of California's landscapes.

In short, MEDALLION will always reflect the state-of-the-art in tall fescue technology.

Try MEDALLION, we're sure you will agree.

MEDALLION IS THE BEST—FROM SEED TO SOD.

Use Warren's® TerraCover™

**100% Polyester + Ground Blanket
to cover and protect
your natural or artificial turf.**

It *breathes* naturally . . . assures free passage of oxygen, carbon dioxide, water and some sunlight so turf stays healthy, beautiful and green.

**TerraCover™ . . . for entire Sports
Fields and Stadium Turf Areas**

TerraCover™ is tough, to withstand *heavy* traffic. Protects natural and artificial turf against crowd foot traffic, heavy portable grandstands, light towers, equipment trucks, trailers and TV camera runways.

TerraCover™ is safe because it replaces expensive, hard-to-handle plywood sheets and other materials that can smother, burn or crush natural turf.

TerraCover™ also protects *artificial* turf from being crushed . . . and from being damaged by cigarettes, liquid spills and other 'junk'. And, clean-up is easier and faster.

TerraCover™ is easy to put down and take up . . . can be ready for the crowds in far less time than plywood.

**TerraCover™ Bench Tarp for
Bench Areas, Infield Areas, etc.**

Finally . . . here's a solution for protecting turf against damage from the cleats of football and soccer players, coaches and others moving along sidelines and in team bench areas. Keeps coaches and players cleaner, dryer *and* happier.

TerraCover™ Bench Tarps take only minutes to install. The leading edge has polyester binding tape (lock-stitched in place) and grommets every 3 ft. that help hold it flat to the turf (you also set the team benches right on the TerraCover™ fabric). Each 16 ft. x 75 ft. bench tarp rolls up to an 8 ft. wide roll (custom sizes are available for pro football and other special requirements).

MAXI[®] III... The Choice from Coast to Coast!

Golf's Premier Irrigation Control System

Repeatedly the choice of the world's leading architects and superintendents, MAXI[®] III from Rain Bird is recognized as golf course irrigation's most exciting and versatile computerized control system.

Sophisticated. Reliable. Powerful. MAXI[®] III offers state-of-the-art irrigation technology. An IBM computer, too. Not to mention the ability to handle a wide range of important functions. Lighting—security—and a host of other necessary operations.

Legends in the making—the great golf courses of tomorrow are being built today. And MAXI[®] III is there!

Controllers. Rotors. 50 years of golf course irrigation experience.
