Denser, darker green Manhattan II takes the bruises for your athlete

What goes up must come down... and that goes double for athletes' knees and elbows.

Improved Manhattan II perennial ryegrass has a built-in cushion developed through genetic improvement. The greater tiller density of Manhattan II takes the punishment athletes dish out, then springs back to retain its great-looking appearance. All that toughness... with improved mow-ability to boot!

Manhattan II also provides a darker green color than the old standard Manhattan; improved disease resistance, drought and shade tolerance as well as fertilizer savings.

Manhattan II was developed to save on maintenance costs... but the real saving is on knees and elbows!

What is "Quadra-Tine"?

Very simply, Quadra-Tine is a totally unique system of turf aeration. Quadra-Tine offers the most advanced features of any system on the market—the others do not even come close!

What system has a 3/4" tine that produces a 1/4" core, 1/4" apart or more, with a quick release core?

What system offers variable configuration patterns, as well as depth control and delivers up to 92 cores per sq.ft.?

What system is great for overseeding practices, reducing costs and plant injury, without putting the green out of action?

Only the Coremaster QUADRA-TINE!

Only the Coremaster offers these Quadra-Tine features. Your pros and players will love the convenience of uninterrupted play!

The Total System

The complete Coremaster system offers additional superior and unique features:

- More sq. ft. per hour in core patterns, closed, extended, and other patterns.
- Deeper adjustable core depths.
- More tine choices.
- Up to 49" swath width.
- Up to 9 MPH-mechanical transport speed.
- Operator rides, forward!
- No wheel core compaction.

The experts at Greencare have designed the state of the art aeration system. The Coremaster system removes compaction, controls thatch, increases plant respiration, increases plant vigor, reduces plant injury, and provides a safe, effective process of minimizing pithium and other diseases. The Coremaster system is efficient, effective, and economical.

For more information and your nearest distributor contact the aeration pros at Greencare, they'll be happy to share the news.

12 BEHIND THE SCENES AT SUPER BOWL XXI

National Football League teams train all year for the opportunity to play in the Super Bowl. It's the job of George and Chip Tomato to make sure the field meets the expectations of NFL Commissioner Pete Rozelle, the two best football teams in the world and 130 television viewers. This year the Super Bowl returned to the Rose Bowl in Pasadena, CA. The Toma crew, working with the Rose Bowl crew under Richard Gonzales, spent five busy weeks preparing the Rose Bowl and two practice facilities for the champions of football, the New York Giants and the Denver Broncos. Despite bothersome rain and unusually cold temperatures, the field for Super Bowl XXI was a shining example of the skill involved in being a professional sports turf manager. The steps necessary to make the field spectacular are covered in this detailed article.

20 WEED CONTROL IN COOL-SEASON ATHLETIC FIELDS

Dr. Thomas Turner, specialist in athletic field weed control at the University of Maryland, provides the latest word on herbicides for cool-season grasses as well as the keys to preventing and controlling weeds in heavily-used athletic fields. Effective weed control involves proper drainage, grading, soil texture, turf density and proper timing for overseeding and weed control. But, it's only possible with the proper financial support and sensible use of athletic fields.

Nourish Your Turf With NITROFORM®

Nourishing your turf with NITROFORM® assures better root development and healthier turf by providing six important benefits.

1. Consistent 38% nitrogen.

2. Sustained, predictable release by soil bacteria to provide nitrogen when needed most by roots and vegetative parts.

3. Provides organic nitrogen and carbon to enhance bacterial activity, even in sandy soils.

4. Non-burning to turf, trees, or ornamentals when used as directed.

5. Environmentally sound...resists leaching, even in porous soils.

6. Fewer applications a year are required.

For a complete information kit on nourishing and protecting your turf, join the NOR-AM Turf Management Program. Write to the Communications Department, NOR-AM Chemical Company, 3509 Silverside Road, P.O. Box 7495, Wilmington, DE 19803.

NITROFORM® is available as BLUE CHIP® or GRAY CHIP™ for dry application, or as POWDER BLUE® or POWDER GRAY™ for liquid application.

IMPORTANT: Please remember always to read and follow carefully all label directions when applying any chemical.
There's nothing like a steep slope to give you a new slant on front mower performance. Especially when you compare a John Deere front mower to the leading competition.

So what makes a John Deere front mower climb better? A combination of two things. Sure a lot of front mowers have what they call a traction assist device. But only John Deere has a true differential lock for positive pulling power.

Standard equipment on the F930 and F935 (optional on the F910, F912, and F915), John Deere's exclusive hydraulic weight transfer valve lets you shift the weight of the deck to the drive wheels for added traction on the go.

Only John Deere gives you a true locking differential for positive two-wheel traction assist in slippery conditions.

It's also true that some front mowers have weight transfer control. But once again only John Deere puts the control at your fingertips. So you can hydraulically dial in more traction on the go.

And since a John Deere lets you engage both these features at the same time, our front mowers give you the most efficient pulling power in the business.

Power that adapts to a lot of everyday
John Deere's view of front mower performance is slightly different from the view held by the competition.

jobs, too. Like mowing in wet conditions. Or pulling straight along sidehills. And because king of the hill isn't the only game in town, a John Deere front mower comes with a lot of exclusive features a flatlander will appreciate, too.

Take our power steering for example. No other front mower gives you two turn lock-to-lock steering with such ease. Such control in tight areas.

Two turn lock-to-lock power steering gives John Deere front mowers highly responsive control for excellent maneuverability in tight areas.

Or compare our straight forward two-pedal speed and direction control to some of the backward controls you've been behind.

The more you compare, the more you'll see that when it comes to front mower performance, we're doing more than spinning our wheels. Ask your dealer for a demonstration soon.

Nothing Runs Like a Deere®

IF YOUR GOAL IS TO BE THE BEST IN THE FIELD...

You need RegalStar™

The Atlanta Falcon Complex in Suwanee, Georgia is acclaimed by experts as the finest facility of its type in the world in every respect. The turfgrass practice field, even after the tremendous abuse given to it by pro football players, is lush, green and weed free. Such results are enhanced by sound turf management and twice a year applications of RegalStar™.

There’s absolutely no better, easier way to control annual weeds such as crabgrass, goosegrass, crowfoot, chickweed, oxalis and many others. Plus, one application of RegalStar provides sufficient nitrogen for an entire growing season.

Call or write for complete details on Regal’s MAXXUM program. Get started today and you too can have results like these on any patronized turf fields.
