How The Average Person Watches A Football Game.

Our Tech Reps have a very difficult time getting away from their jobs. They'd rather see a weed problem get tackled than a running back. And they'd rather look at some beautiful turf than some beautiful cheerleader. And, believe it or not, the people in our research and development department are even more obsessed. But that kind of fanaticism is why...
How A Scotts Tech Rep Watches A Football Game.

we were able to introduce over thirty new products since 1983. Of course, we've noticed our competitors aren't watching so many football games, either. They're too busy watching us.

For more information, just contact your Scotts Tech Rep, or call us at 1-800-543-0006. In Ohio call collect 513-644-2900.

14 ROBBIE'S LAW: BE A STADIUM OWNER, NOT A TENANT

When Joe Robbie and partners created the Miami Dolphins in 1965, they knew how important a stadium was to the success of a National Football League franchise. The Orange Bowl, the team's home for more than 20 years, helped the team become one of the most successful franchises ever. But as the needs of professional football teams began to change, Robbie felt that the city-owned Orange Bowl could no longer meet the Dolphins' needs as a tenant. While others watched in amazement, Robbie obtained private financing for a $100 million stadium by selling skybox and club seat leases in advance. He also insisted on a state-of-the-art natural turf field for his team. Robbie set new standards in stadium construction and ownership for other teams to follow in the future.

24 SPORTS TURF NUTRITION: A SPECIAL DIET FOR HIGH TRAFFIC AREAS

Turf under stress utilizes nutrients differently than turf in a standard lawn situation. Without a special diet, sports turf is unable to recuperate from repeated use and will deteriorate. While fertilization seems simple, it is the most complicated of the basic management practices for sportsturf. Read about the factorsthat reduce the effectives of applied nutrients and the differences between nutrient sources.

35 FIBER TECHNOLOGY: PROTECTING THE OLD WITH THE NEW

Golf courses constructed before the Great Depression remain the foundation of the golf industry. One such course is the Biltmore Forest Country Club near Asheville, NC, designed by Donald Ross in 1922. Superintendent Don Burns has the job of protecting the course from today's greater level of play. To do that, he has utilized some modern solutions to solve wear and drainage problems.

We pack peace of mind into every pound of Par Ex.®
And we call it IBDU® It's pure nitrogen and it's 100% available to your turf in the space of a single growing season.

**You're in charge.**

Ordinary slow release nitrogens are temperature activated. They depend on bacterial activity or coating thickness or other factors which are out of your control. When activated by hydrolysis, nitrogen from IBDU becomes available to your turf. Normal soil moisture is all you need; excessive moisture will not adversely affect IBDU's performance.

**Nitrogen efficiency — the IBDU key to quality turf.**

A nitrogen source is efficient if most of the applied N is absorbed by the plant and not lost in the environment by leaching past the root system, volatilization, or other factors. Studies have shown that IBDU trickles slowly past the root system, increasing total N uptake over time, resulting in better nutrient efficiency and less nitrate pollution of ground water when compared to soluble N sources.

**Late season fertilization — the IBDU advantage.**

Studies have shown IBDU to be a superior slow-release nitrogen source for producing excellent turf in the spring, after application the previous fall on cool season grasses. IBDU is also superior on over-seeded Bermudagrass in southern areas.

Sure, you can buy cheaper fertilizer. But run into a turf problem or two, then check your costs. There’s a good chance they’ll be rising as fast as your blood pressure. So why take the risk when, for a few pennies more, you can take control with IBDU.
Add beauty. Subtract problems.

Otterbine® Floating Aerators from BAREBO, INC. do more than just beautify your grounds. They're the natural, economical way to improve water quality. Eliminate algae and sludge. And, remove odors.

So the next time you need beauty plus brains, contact BAREBO, INC. We have a wide variety of aeration systems to meet your aesthetic and water quality management requirements. Write or call today for your free corporate catalog.

TURF-MAT

THE MOST EFFECTIVE YET LEAST EXPENSIVE TURF PROTECTION AVAILABLE.

TURF-MAT IS SAFE, STURDY AND SIMPLE TO USE.

- **TURF-MAT** is 100% needle-punched polyester, which allows turf to breathe, and lets water, air and sunlight through so turf stays green and healthy.

- **TURF-MAT** protects both natural and artificial turf from foot traffic, food and liquid spills, grandstands, equipment and other heavy loads.

- **TURF-MAT** is easy to put down and repack and takes far less time than any other kind of protective surface. Just unroll and tape seams; no special anchoring is necessary.

- **TURF-MAT** is used by professional and college stadiums throughout the U.S. and Canada, including:
  - L.A. Coliseum
  - Orange Bowl
  - Cleveland Browns Stadium
  - Bowling Green University
  - Veterans Memorial Stadium, Erie, PA
  - Belkin Productions

How to clean up in the turf trade

In a word, the answer is Parker... because there's a product in the Parker line for every turf clean-up job. That's manual and trailing sweepers, including the legendary Estate Master™ with its 8' reach.

That's the powerful Conestoga™ Trail Vac, the rugged VAC-35,™ the versatile Scavenger™... and the new Portable Loader. That's the Hurricane™ Blower and the Thatch-O-Matic™ power rake.

For dependability over a long life, the pros choose Parker. And the choice pays off. Call (513) 323-4901 for details.

The choice of the pros
