TURF TYPE TALL FESCUES

Now, more than ever, the choice of professionals

Join the rapidly growing number who select Tall Fescue for:

- richer, darker, dense green turf
- requires low maintenance
- adaptable to a wide variety of soils
- achieves healthy, full growth in all normal climate conditions
- tolerance to heavy shade
- tolerance to heat and drought
- resistance to disease
- durability and longer wear
- year-round beauty and performance

Rich, green and luxurious Turf Type Tall Fescue gives you the beauty you want with a minimum of care.

Excellent for play areas, parks, airfields, roadways, industrial sites and golf courses.

Proven disease-resistant, Oregon Grown Tall Fescue seed produces an adaptable, weed-free turf that not only persists through summers and winters, but maintains its beauty.

Insist on Turf Tall Fescue Seed grown in Oregon!

PRODUCT UPDATE

MANAGEMENT SOFTWARE

LABB Systems/Software has released a new version of its TRIMS Grounds Management Software designed specifically for golf course and grounds maintenance superintendents.

Included in the software are programs for seed/chemical cost estimates, sprayer calibrations, labor hour reporting, personnel records, project cost analysis, budget reporting, spare parts/fuel inventory, work orders, purchase orders, maintenance scheduling, and irrigation management.

Program screens are selected from a menu and perform their functions by guiding the operator through each process. Pop-up "help" screens and a comprehensive, easy-to-read manual assist the user.

INSECTICIDE EXPOSURE TEST

Golf course superintendents can monitor applicator exposure to insecticides in three minutes with a test kit from EnzyTec, Inc. Originally developed by Midwest Research Institute under contract from the U.S. Army, the test detects 80 percent of the insecticides registered for use in the U.S.; namely the carbamate, thiophosphate, and organophosphate insecticides.

42 *sportsTURF*

The product is a simple, compact "testing ticket" which—within three minutes—can detect the presence or absence of these pesticides in a range of one to ten parts per million, or parts per billion if so desired. The "ticket" detects pesticides in air, water, soil and other surfaces, depending on the technique used.

The system can be purchased in kit form with varying quantities of testing tickets, from ten to 100. Tickets are also available in bulk quantities, and instructions are included with each kit.

According to Elizabeth Burke, marketing manager for EnzyTec, the system can be used several ways by golf and grounds maintenance personnel. For example, it offers an efficient way for workers applying

insecticides to monitor the need for changing filters in respirators.

"Placed inside the facemask, away from the nose and mouth, the detector disc allows an applicator to check the effectiveness of his respirator filter, and, specifically, lets him know when to change it," said Burke.

The product can be used to test ponds for pesticide runoff, to test for insecticide efficacy in soils, to monitor spills, and to ensure safe storage and handling. The test can also provide superintendents with a method of monitoring exposure of golfers to the insecticide products applied to a golf course during the golfing season.

The Ryan® Mataway® Overseeder is simply better.

Better results begin with the basics, like seed calibration. An easy-to-read chart on the Mataway Overseeder tells you the exact setting for pounds of seed needed per 1,000 sq. ft. Just look it up, load it up, select setting, and you're ready to go.

Two-inch spacing between rows gives you a dense pattern for one-pass application. Gandy® precision metering and an easily removed disc-type seed delivery system places the seed directly into the slits for uniform seed/soil contact allowing maximum germination.

The result is a lusher, thicker lawn.

The Ryan Mataway Overseeder gives you the flexibility to power rake, overseed, or to do both at the same time. Call today or contact your nearest Ryan dealer for more information and a free test drive demonstration.

Call toll free 1-800-228-4444 for all the details.
