

# How to Avoid Water Hazards

Unightly algae blooms. Suffocating sludge build-ups. Excessive weed growth.

All these problems can now be a thing of the past by simply adding a Rain Jet Aeration System. From a

*Eight interchangeable nozzles with three different lighting combinations available.*

wide selection of pump sizes to meet your specific needs, you'll get the cleaner, clearer water you've always wanted. With the added benefit no amount of chemicals can offer - a beautiful fountain display from your choice of eight interchange-

able spray patterns and lighting combinations.

Keep your water hazards from multiplying. With one simple, and very beautiful
