KAFMO

Helps Little League

The stadium field of Little League Inc. in Williamsport, Pa., was in top condition for the 50th Anniversary of Little League Baseball's Championship series in August of 1996. By the final out, members of the Keystone Athletic Field Organization (KAFMO) had donated 782 volunteer hours of service.

The story begins in late September of 1995, when representatives from KAFMO met with County Extension personnel and representatives from Little League Baseball Inc. (LLB) to discuss the project. At that point, the sod had been stripped from the field.

After the meeting, Kurt Nilsson of Blue Mount Quarry contacted Hummer Turfgrass Systems Inc. and Alpine Services Inc. about the project and received positive responses.

Two days later, Grove Teates of Alpine Services met with a retired extension agent and KAFMO member, Don Fowler, at the field. Within three days, both Hummer and Alpine Services had signed contracts with Little League Baseball, and the ball was rolling.

Dan Douglas, of the Reading Phillies Baseball Club, visited the field on September 28 to discuss the existing drainage system and the additions needed. Plans were developed to properly channel runoff from both the stands and the field.

By October 9, Alpine Services began the renovation. Don Fowler accepted the responsibility of coordinator, keeping track of on-site developments and making the contacts to get volunteers to the site when their help was needed. Despite wet conditions, the work went on. Drainage system additions were made. With only a half-day lost to weather, Alpine Services completed the soil work, crown preparation and regrading. The field was ready for resodding by October 25. But wet con-

# Action

ditions prevented Hummer from cutting the sod.

On November 8, Hummer was able to cut and delivered 70 skids containing 32,500 square feet of sod.

KAFMO volunteers and LLB workers joined the Hummer crews on November 9. The 15 person team worked straight through from 7 a.m. to 5:30 p.m. until all sod was properly in place, the field was rolled and fertilizer had been applied. By November 11, the field was covered with four inches of snow, KAFMO volunteers had chalked up 300 hours, and the wait for spring began.

On May 7, 1996, twenty KAFMO volunteers edged, topped the infield with 3/4 inches of infield mix to meet the grade of the sod, finished the mound and home plate area, and mowed the field. Add another 90 volunteer hours.

On June 12, KAFMO addressed infield mix "gravel contamination" problems and launched a weed attack. Fowler worked with LLB crews on June 25 to put the final finish on the infield.

On August 7, five KAFMO members met at the field to evaluate the results of six weeks of summer camps and plan the final pre-Series grooming procedures. The remaining gravel contaminated mix was replaced.

On August 15, the field was edged. An additional 66 hours of volunteer labor provided the pre-Series preparations over the next two days. On August 18, the LLB field crew was joined by four KAFMO volunteers to finalize field preparations and paint the logos.

Four games were held each day for the next four days with KAFMO volun-

teers assisting the LLB crews and totaling up another 160 volunteer hours.

There were no games on August 23. KAFMO members again converged on the field. They resodded wear areas, rolled and edged the skinned area, and toppedressed the infield.

During the final game on August 24, LLB personnel, international competing teams, coaches and the crews from ABC Sports and ESPN all declared the field "a mini-major league facility."

And even better, according to Fowler, is that, thanks to the dedicated LLB crews and the ongoing consulting support and occasional helping hands from KAFMO, it's staying that way.

**STMA Chapter News**

**Minnesota Chapter:** The Minnesota Chapter has elected its 1997 officers and board members. President is Shannon Hendrickson, Farmington Schools; Past President is Ken Dehkes, Hamline University, St. Paul; President-Elect is Paul Griffin, City of Woodbury; Secretary/Treasurer is Connie Rudolph, Midway Stadium, St. Paul; Minnesota Turf & Grounds Foundation Representative is Tom Rudberg, University of St. Thomas, St. Paul; and Director at Large is Mike Kelly, Glen Rehbein Companies, Inc., Blaine, MN.

By the end of week two, compost had been added to half of LLB's field. Photos courtesy: Don Fowler.

The refurbished field proved a real hit with both players and spectators during last year's Little League Series.

KAFMO volunteers worked from 7 a.m. to 5:30 p.m. until all sod was properly in place.

*continued on page 32*

**STMA in Action**

*continued from page 31*

The events schedule for 1997 is in the planning stages.

For information, contact: Connie Rudolph at (612) 644-0639.

**Iowa STMA:** The Iowa Sports Turf Managers Association's Annual Membership Meeting was held at 3:00 p.m. on January 28 at the Des Moines Convention Center in conjunction with the 63rd Annual Iowa Turfgrass Conference and Trade Show.

Those elected at the meeting include: Southwest Representative, Charles Vance, AVP Construction, Oakland; Central Iowa Representative, Bill Antons, Boone Community Schools; and At-Large Representatives, Ron Crooker, of Upper Iowa University, Fayette; and Kevin Vos, Muscatine Soccer Complex. Vos, who served as Vice-President in 1996, will serve as President in 1997. Rick Simpson, South Tama Schools, becomes Past President.

Mike Andresen, Iowa State University, had resigned his board position as Central Representative to accept the position as Iowa Turfgrass Institute

Representative, replacing Mike McCaffrey who has given nine years of service in that role.

Continuing their terms as Board members are: Ron Dykstra, Northwest College, Orange City; Dan Wright, Central College, Pella; Todd Garstang, Davenport Schools; Dale Roe, Iowa State University; Luke Yoder, Iowa Cubs; Bryan Wood, Commercial Turf & Tractor; and Mike Grooms, United Seed. The new board is planning an exciting and event-filled 1997.

For more information, contact: Lori Westrum at (515) 232-8222 (phone) or (515) 232-8228 (fax).

**Florida Chapter #1:** The Florida Chapter will hold a Field Day on March 13 at the University of Florida in Davie. CEUs will be offered for the educational sessions at this full-day meeting.

The chapter's next STMA meeting is scheduled for April 8 in Parkland, FL. Included will be a mound building seminar and a tour of the new park facility.

For more information, contact: John Mascaro (954) 938-7477.

**Southern California:** The Southern California Chapter board is in the process of planning special events for

1997 and 1998. For information, contact: Chris Bunnell at (619) 432-2421.

**Midwest Chapter:** The Midwest Chapter of STMA is putting together the 1997 schedule of events. For information, call: The Chapter Hotline (847) 439-4727.

**STMA Chapters on the Grow**

**KAFMO:** The Keystone Athletic Field Managers Organization is currently working toward STMA affiliation.

Their next event, The Athletic Field Maintenance Conference, will be held from 9 a.m. to 3 p.m. on March 20 at Allegheny College in Meadville, Pa. For more information, contact: Dan Douglas, Reading Phillies Baseball Club, at (610) 375-8469, extension 212.

**Great Plains STMA:** For information on the Great Plains Sports Turf Managers Association or pending events, contact: Mark Schimming at (316) 729-5839.

**Arizona:** For information on the Sports Turf Managers Association of Arizona or upcoming events, contact: Bill Murphy, City of Scottsdale Parks and Recreation Department, at (602) 994-7954. □

# Rain Booster

**AN INDUSTRY FIRST!**

- The benefits of big guns are now available where minimal or no water pressure is available.
- Totally self contained unit can be used as a primary pumping unit using surface water or as a booster unit to increase lower pressure available from existing pipelines.
- Irrigation and drainage for golf courses, parks, athletic fields, acreages, nurseries, market gardens, etc.
- Reaches hard to get at and irregular shaped areas.
- Higher water pressure provides uniform distribution/gentle application.
- Trailer mounted with flotation tires for portability. One man operation.
- Self priming high pressure pump.
- Honda or Briggs & Stratton engine.

# Master the Tools to Compete.

**Guide to Golf Course Irrigation System Design and Drainage**, by Edward Pira. • This book covers every important aspect of the subject in an easy-to-understand format. It is perfect for practicing turfgrass manager & superintendent, consultant, sales representative and student. Used in academic courses for years, this is the first commercially available version. Completely revised with new exercises, practical examples, numerous new figures, and expanded sections covering a wide variety of irrigation system components, Guides the reader through every phase of an irrigation program from design to construction- from program scheduling to operation and maintenance. Turfgrass managers and golf course superintendents will refer to this book often to plan effective irrigation systems, ensure appropriate capacity, easy installation and practical operation and maintenance. 400 pp. 4004 Price: \$59.95

**Color Atlas of Turfgrass Diseases**, by Dr. Toshikazu Tani and Contributing Author, Dr. James B. Beard • Presents over 350 high-quality color photographs of all the major turfgrass diseases that occur on both warm and cool season grasses and it is international in scope. This book will become the standard color guide to disease diagnosis and pathogen identification for golf course superintendents and turfgrass practitioners. Maps are included to assist in disease identification by providing geographical locations where each disease/pathogen is likely to occur. It also provides color photos of step-by-step guidance on diagnostic techniques for laboratory analysis which can be used by practitioners. 140 pages. 4005 Price: \$79.95

**The Surface Irrigation Manual**, by Dr. Charles Burt. The text delves in-depth into the proper design and operation of surface irrigation systems. Also covers subjects such as soil types, salinity, surge flow and infiltration. Indispensable aid for farming, educators in agriculture; irrigation design professionals for government agencies working with the agriculture industry. 400 pp 4007 Price: \$49.50

**Pictorial Guides to Quality Groundskeeping Book I and Book II**, by Floyd Perry. • The only textbooks on the market for the grounds supervisor, athletic coach, little league volunteer, or baseball purist. Over 500 photos in each text with many in color. Book One, "Covering All The Bases" (100 pgs) covers Mound and Home Plate Repair; Edging, Dragging, Lip Reduction; Water Removal; Homemade Equipment and Tricks of the Trade. Book Two, "There Ain't No Rules", (108 pgs.) covers Football, Soccer, Softball, Little League, Minor League, College and High School Facilities. Also covers Curbside Appeal; Tricks of the Trade, New Ideas for Easy Maintenance; Professional Research from Higher Learning Centers and much more. 4008 -Book I 4009 - Book II Price: \$36.60 ea - or 4022 - 2 bk set \$69.90

**Management of Turfgrass Diseases Second Edition**, Joseph M. Vargas, Jr. • Completely revised and updated to provide the latest information on maintaining a healthy turf and identifying turf diseases. Covers cultural, genetic, biological and chemical approaches to turf management and provides practical solutions to everyday problems. Fungal, bacterial and viral diseases; black layer disease; and diseases caused by nematodes are addressed for all major grasses. Tips on irrigation, fertilization, and grass culture w. 72 full-page photos and more than 100 figures. 320 pgs. 4016 Price: \$67.00

## TURF PRIDE with RONSTAR®

### Better Than DNAs for Pre-emergence Weed Control.

Ronstar's unique chemistry provides longer-lasting weed control without impairing turf root development. Instead of root entry like DNAs, Ronstar is absorbed into weed shoots, killing germinating weed seedlings as they move upward through the soil surface. New root growth from existing plants is never affected.

- Quicker turf comeback from winter stress, pest damage or traffic-injured spots
- Safe to use with sprigs
- Better control on DNA-resistant goosegrasses
- Allows faster recovery following nematode damage

## AerWay Turf Aerators

AerWay turf aerators give grounds managers more options for treating sports field compaction. A typical playing field can be

treated in less than 2 hours, ideal for working within a narrow "window of opportunity" on heavily used fields.

AerWay relieves soil compaction 7" and deeper. Patented AerWay Shattertines twist in the soil, cracking it sideways, and gently lifting it, to relieve even the most severe compaction. Play or practice can resume following a mowing pass.

Starting under \$3,000, AerWay units are extremely rugged, need very little maintenance, and minimize labor requirements.

## CH Base-Anchor & Driver System

This patented product allows you to install CH Base Anchors easily into the ground without digging a hole or pouring concrete. **SAVE TIME/SAVE MONEY** – installation takes 5 minutes. CH Anchors will last 5-10 times longer than existing anchors placed in concrete. And the CH Driver provides for easy repositioning and removal of CH Anchors. **DURABLE** – CH Anchors are made out of heavy duty steel,

weight 5 lbs. each. Since the CH Anchors are driven into undisturbed soil they are better secured than your concrete anchors. **COMPATIBILITY** – CH Anchors are designed to fit 1-1/2 inch and 1 inch standard bases.

## Play Ball!

***"The Best Infield Conditioner I've Ever Used."***  
Turf managers love new Play Ball! Infield Conditioner because it's made from lightweight, highly porous diatomaceous earth that absorbs more water than clay conditioners, and keeps infields playable in wetter conditions. Play Ball! stays absorbent through repeated wet/dry cycles without breaking down into mud and dust. Grounds crews love the way it mixes in, and players appreciate the improved playing conditions. ## Tarp Machine Rolls Out Large Athletic Field Covers

Covermaster, Inc.'s Tarp Machine, now at less than half the price of the original model, rolls out large athletic field covers. To use, hook up the portable unit to any standard tractor equipped with a minimum 14 hp and 540 power take off (PTO) unit.

Constructed of heavy gauge tubular steel, the machine rides on two

large, standard turf tires. The direct drive from the PTO rotates the four pneumatic drive wheels which, in turn, move the tarp and its roller over the field.

## Nutrient Enhancers Come in Water-Soluble Packages

Terra Industries' turf biostimulants, BioEdge WSP and BioEdge WSP (Fe), are available in water-soluble packages. BioEdge WSP (Fe) contains fully-chelated iron (a secondary turf nutrient), in addition to the same nutrients found in BioEdge WSP. Both biostimulants have a near-neutral pH for increased tank mix flexibility and do not require heated storage.

BioEdge WSP is packaged in quarter-pound packets, ten per box and four boxes per case. BioEdge WSP (Fe)

is packaged in one-pound packets, five per box and four per case.

## Terra Industries, Inc.

## Soil Aeration Systems Have High-Speed Performance

Verti-Drain's two soil aeration systems help turf professionals treat compacted areas during high peak usage periods. The models offer increased speed and aeration capacity without sacrificing quality construction and durability.

Models 7212 and 7316 provide capacity increases up to 70%, allowing users to treat more ground in less time. Model 7316 has a greater working width and depth than model 7212. Since the weight of both models' moving parts has been decreased, making the products lighter to handle, a lower horsepower tractor may be used.
