Turfgrass Management Information Directory: Third Edition
by Dr. Keith Karnak,
A mandatory reference for all turfgrass instructors and practitioners, the Turfgrass Management Information Directory: 2nd Edition is loaded with helpful information, is completely revised, and has six entirely new sections. Perfect for all turfgrass practitioners and golf course superintendents! 300 pgs.

4097 $19.95

Sports Fields: A Manual for Design, Construction and Maintenance,
by Jim Puhalla, Jeff Kraus, and Mike Goatley,

4084 $79.95

Picture Perfect: Mowing Techniques for Lawns, Landscapes, and Sports
by David R. Meller,
Picture Perfect gives you first-hand, step-by-step guidance on creating your own unique lawn patterns. You’ll learn the basic patterns—checkersboard, stripes, diamonds, waves, arches and circles—in simple step-by-step instructions, along with practical advice on equipment selection and use. Patterns are demonstrated in simple instructions followed by dozens of detailed photographs. 160 pgs.

4191 $34.95

Turfgrass Soil Fertility and Chemical Problems Assessment and Management,
by R.N. Carrow, D.V. Waddington, P.E. Rieke,
Turfgrass Soil Fertility and Chemical Problems is the best single-source, practical management tool that will help you overcome every fertility management challenge you face! 500 pgs.

4192 $95.00

Color Atlas of Turfgrass Weeds
by L.R. Hurt Mccarty, John W. Everest, David H. Hall, Tin R. Murphy, Fred Teleperta
Weeds can cause many problems in turf situations. One of most undesirable characteristics of weed infestation is the disruption of turf uniformity—so vital to the golf, sports field, and managed landscape industry. This book explains why, and helps you problem-solve for effective management.

4189 $95.00

The ABC’s Grounds Maintenance: Volume III Soccer/Football Field Refurbishment,
by Grounds Maintenance Service,
Features setting/rebuilding homeplate area; rebuilding pitchers mound; sodding dugout walkways; application of crushed brick; rounding infield crecent; complete infield; repair of turf; fertilizing & overseeding pattern; reducing infield lips; removal of dew from grass; water removed in clay areas; edging the running track. VIDEO. 55 Minutes.

LOADER/TOOL CARRIER

This compact articulated wheel loader/tool carrier features tool visibility, pilot control hydraulics, ergonomic operator’s station, universal tool carrier, and 2-speed auto shift drive-train, says the manufacturer. The VersaDyne has a 3,000-lb. lift capacity with its 85-hp Cummins turbo diesel engine and an integrated rear axle/transfer case with 10-degree oscillation. Front and rear axles include 45 percent limited slip differentials for skidless operation on turf.

Axles feature planetary reduction hubs to reduce driveline stress and internal sealed wet brakes for uncontaminated operation.

Maintaining the Grounds

TURBO MOWER

John Deere's 1600 Turbo wide-area mower provides power, maneuverability, traction, and cut quality, it says. Powered by a 64-hp turbo-charged Yanmar diesel engine, the unit can operate all day at a clipping rate of 8.5 acres an hour at 6.5 mph without refueling. The mower includes a hydrostatic, dual-transaxle that achieves a mowing speed of up to 8.6 mph. Transport speed is 14.5 mph.

With a cutting width of nearly 11 ft., the mower accommodates three commercial 7-gauge mower decks, a 62-in. center-mower deck and two 42-in. wing decks. The mower's anti-scalp rollers included on the center mower deck help ensure a clean cut. A standard water temperature gauge as well as a hood and air intake system reduces downtime in dry, dusty conditions.

Standard features include: turn brakes for additional traction on side hills and tight trimming areas; electronic cruise control; cup holder; and toolbox.

Our innovations in sport and recreational surfaces, are born of experience, research and testing.

Stabilizer Solutions, Inc. is the developer of Stabilizer™ the all-climate, natural cohesive for crushed stone and native soil infield mixes. Other product innovations in sport surfaces include TurfGrids® and Hilltopper™. TurfGrids® fibers stabilize turf for baseball, football or soccer fields, equestrian venues and golf courses. Hilltopper™ is a polymer coated clay for baseball or softball mounds and home plate areas.

Stabilizer Pre-Mixes are available from our regional dealers. We have developed Pre-Mixes for Infields, Warning Tracks, Soccer Fields, Pathways, Parking and Recreational Areas. Contact us for a dealer near you.

TurfGrids® are safe, non-toxic, polypropylene fibers that help provide a consistent athletic surface that can be worked and maintained with conventional equipment. These small fibers act as a mass of indestructible roots. Turf roots intertwine and interlock with these "fiber roots" resulting in an extremely strong reinforced turf surface that resists divoting and rutting. TurfGrids® can be used for complete field stabilization or in selected high wear areas. TurfGrids® are a proven performer on all types of turf surfaces including, golf courses, turf race tracks, baseball, football and soccer fields. Improve Stability, Drainage, Divot Resistance, Aesthetics and Durability

Hilltopper™ is a simple solution to improve the flexibility of your mound and home plate areas. Hilltopper needs no water, just spread and tamp. It's ready for play! Installation or repair takes half the time of traditional clay products due to Hilltopper's unique mix of long lasting binders, coatings and natural clays.

This product is available in 50 pound bags (40 per pallet).

SPORTSTURF 53
Maintaining the Grounds

Tif-Way Sports and Tifton Turf teamed up to provide the ultimate in athletic field construction and renovation. The combined strength of these two companies allows us to handle any size of athletic field or facility. Paying attention to details is a big part of a winning athletic team… it is also a big part of a great athletic field. From taking soil samples, determining proper field drainage and laser leveling the field to insure proper slope to selecting the right turf product and installing the turf to our exacting standards we make sure your athletic field is ready for you and your competition. We will also work with your grounds superintendent to develop a specific grow-in schedule. For more information about our athletic field work and field construction steps, call us at 800-841-6645.

SCORE BIG with our ATHLETIC TURF SOLUTIONS

DEBRIS BLOWERS

The Toro Company has introduced two new debris blowers, the 400 and 600. Both have 14-in. steel frames for long life to clear areas of leaves, twigs, pine needles, clippings, and other debris. The 400 also can clear deth in minutes for easy morning mowing; the compact unit goes anywhere your low voltage goes. And airflow direction is easily changed from the tractor’s operator seat.

The 600 has a 36-in. fan diameter that produces an air velocity of 153 cfm; the bi-directional discharge allows you to change the direction of the airflow instantly.

NEW JACOBSEN G-PLEX GREENS MOWER

The new Jacobsen G-Plex Control-Arm triplex greens mower, from Textron Golf, Turf & Specialty Products, combines a lightweight platform, ergonomic design, precise cut, and high performance. Previously marketed under Textron’s Ransomes brand, it incorporates ease-of-operation features and measures up to Jacobsen’s legendary, 83-year reputation for quality.

Three 22-in., 11-blade reels provide an exceptional quality of cut. The patented, parallel-link head system assures level ground contact. Swing-out reels make cleaning, adjustments, and change-outs easier. For simplified operation, an innovative mow-speed system automatically switches back and forth from transport speed to mowing speed.

DINGO'S STUMP GRINDER QUITE A SIGHT

I witnessed a demonstration of Toro's Dingo TX 425 compact utility loader's stump grinder attachment and Toro just tore it up in just a few minutes and maybe a half dozen cuts, this unit had dug a hole big enough for three kegs of beer. The grinder has a 17-in. cutter wheel with 12 cutting teeth, a wheel speed of 2,000 rpm, and a tooth tip speed of 148 ft. per second—all of which combines to dig a big hole while the operator looks like he's comfortable enough to have a sandwich. You can position the wheel index at a 30-degree angle too, to get at those troublesome roots.

The operator showed me how easy it is to attach tools to the Dingo; even I can turn two locking pins and connect two hydraulic lines. Key also is that you can fit the Dingo in places where traditional grinders can't go—that's saving money and time.

VERTI-CUT MACHINE

Thatch Master verti-cut machines are designed with managers of sports fields in mind. They need only 25 hp, and are easy to adjust. The thin blades do not leave slow healing grooves. Blades can easily be adjusted shallow for runner control or deep for digging out even heavy accumulations of thatch. Five-foot working width gets the job done fast. The blades are inexpensive and easy to change.

I n 1999 my wife, Teresa, and I made a decision that changed and enriched our lives. We sold all of our household possessions, purchased an RV, secured corporate sponsors, and created the Ace of Diamonds Tour. Three years later, I'm still traveling. I've been privileged to meet some true characters, many of whom have become my teachers and keep me informed of interesting issues and facilities that have deepened my appreciation and love for all things related to baseball.

Each month, "On the Road with the Ace" will profile different people and places that I encounter on my travels. So, sit back and ride along with me for a few minutes while I introduce you to two dedicated colleagues who share your passion for sports fields. I enjoy meeting fellow professionals and learning about your different methods, challenges, and personalities and I look forward to visiting a ballpark near you soon.

Building a strong work ethic

"I'd give an arm and a leg for these work ethics."

Hoover, AL.—Athletic field manager Kenny Shaw of the Hoover Board of Education maintains two very high profile sports complexes, the Spain Sports Complex and the Hoover High School Complex. Both facilities have eight fields each and the $55 million, newly constructed Spain facility includes some $10.5 million in field construction.

Kenny took on this 16-field responsibility a year and a half ago. With no labor force and limited equipment, he tackled the grow-in and maintenance by himself, welcoming volunteer help from industry partners in the evenings and weekends.

Kenny's passion for sports field management comes from a lifelong love of sports. "If it had a ball involved, I played it," Kenny says. "Working these facilities allows me to remain involved in sports every day."

Kenny isn't your typical amateur athlete turned athletic field manager. Plagued for more than 20 years with avascular neurosis, a condition that causes deterioration of cartilage and bone, the 37-year-old married man underwent surgery Feb. 4 to replace his left hip. After missing only 1 week of work, he returned mid-February on crutches to do whatever he could until he recuperates. Six weeks later, the other hip will be replaced. Kenny is more concerned today about the development of his winter ryegrass than he is about his surgeries. In my opinion, Kenny deserves the "Ironman in Sports Field Management" Award.

Nashville, TN—At an early age, most young people have role models they admire. Whether it's a parent, preacher, coach, teacher, or relative, someone instills certain values and sets examples for a good work ethic.

Marty Kaufman, assistant sports field manager for the Tennessee Titans, was raised near an Amish farm community in central Ohio. These devoted farmers and craftsmen set a high standard of discipline and work. When Marty was not involved in school or sports, his spare time was spent at his grandfather's farm, just down the road from his own home.

Grandpa lost his left arm as a young man in a farming accident and had to improvise. When he would do mechanical work on the old tractor or farm implements, Grandpa would use his right hand and anything else, his chin, teeth or chest, to get something done. Marty was amazed watching this as a child, but looking back, amazement has turned to respect for Grandpa and a strong appreciation and understanding for what hard work really is.

During the off-season, Marty spends his time arranging upcoming events for the Tennessee Valley STMA, for which he currently serves as program director under president-elect Bob Elliott of Nashville.

Marty uses his field management experience and his love for sports and agriculture to plan events and workshops. He is also an active member of the Tennessee Valley STMA and serves as the program director for the organization.

Where did you get your work ethic?

Mel Lanford, a 30-year veteran of the groundskeeping industry, is the creator and host of the Ace of Diamonds Tour, sponsored in part by Diamond Pro Professional Groundskeeping Products, a division of TXI. Mel travels across the United States year-round presenting hands-on seminars, demonstrating the proper infield and sports turf maintenance materials, equipment and techniques to athletic field managers. Rutgers' green science pays off

Ken Budd, president of Budd Seed and Dick Olson, president of Pro Seeds Marketing, recently presented Rutgers University a check for $409,186.78 for royalty payments on the 2000 production of Rutgers developed turfgrass varieties. The total royalties are now nearly $500,000.

"Rutgers continues to be the world leader in the research and development of improved turfgrass varieties," stated Ken Budd. "We look forward to our firm commitment to the total support of Rutgers to fulfill our customer needs," added Olson.

Based in Winston-Salem, NC, Budd Seed markets several varieties such as Rebel turf-type tall fescue, Palmer perennial ryegrass, and Preakness Kentucky bluegrass. Based in Jefferson, OR, Pro Seeds Marketing has become one of the largest distributors of turf and forage seed in the industry. Included in their stable of more than 300 varieties, including Prelude and Pennant perennial ryegrasses, Falcon, Finelawn, and Shenandoah tall fescues, Reliant hard fescue, and Apollo, Dragon and Princeton P-105 Kentucky Bluegrasses.

Becker Underwood has new president

Dr. Peter Innes has been promoted to president of Becker Underwood, Inc., provider of bio-agronomic products and specialty colorants. Innes formerly directed the company's European subsidiary. Roger Underwood will become CEO. Innes' appointment reflects the company's growing involvement in the discovery, scale-up fermentation, and formulation of a variety of products based on naturally occurring microorganisms that help maximize yield and protect plants from pest and disease.

New Textron turf VPs

Textron Golf, Turf & Specialty Products has named four new vice presidents to lead sales and marketing for its turf and professional lawn care divisions. Jon Carlson, the company's new president, recently announced the team to dealers at a special meeting.

Dennis Schwieger has been named executive vice president of sales and marketing for Turf and PLC (Bob-Cat, Bunton, Cushman, Jacobsen, Ryan). Three other new vice presidents will report to Schwieger: Ralph Nicotera has been promoted to vice president of marketing and product management; Joe Thompson has been appointed vice president of sales; and Joe LaFollette is the new vice president of customer care.

Texans' stadium to have modular turf system

Sports turf specialist StrathAyr Turf Systems, along with Glenn Rehbein Companies and Turfgrass America, will install the StrathAyr ModulAyr System, a removable natural grass field, in Houston's new Reliant Stadium. The retractable roof stadium that will be home to the NFL Houston Texans and the Houston Livestock Show & Rodeo will seat 69,500 and open in August. It is the first retractable roof NFL facility, scheduled to host Super Bowl 2004, 2002 Big 12 Conference Championship and may be part of a potential Olympic 2012 bid.

The system's two unique aspects are its flexibility and enhanced rootzone profile, says StrathAyr. The system incorporates portable turf modules that are 8 x 8 ft., 7 1/2 in. deep and include a metal drainage base. The modules incorporate a growing medium of 4 1/2 in. deep, which is reinforced with ReFlex mesh elements, which are small pieces of nylon mesh, to increase field stability, aid in water and air management, and provide a forgiving (non-hard) surface for the athletes. The modules are designed so that any module can be replaced without affecting the adjacent module. The field will be completely removed to an outside nursery once a year while the Stadium hosts the Livestock Show and Rodeo and other events.
New online resource for turf managers

The Toro Company has a new website, www.TOROsports.com, targeted specifically to the sports turf professional that features advice from other professionals on all aspects of turf care. "We wanted to facilitate a place where sports turf professionals can share information," says Rick Rodier, Toro's director of commercial business grounds marketing. "Our goal is to create a community to bring the sports focused turf professionals together where they can share ideas concerning their daily challenges."

The site can be used to find tips on many subjects, discover other info links, ask questions, and contribute your own advice to your peers.
Work smarter—not harder

BY FLOYD PERRY

In sports field maintenance, there are a few major concerns such as Mother Nature, financing, and personnel issues that affect job performance on and off the field. But our biggest enemy is the time clock.

Progressive groundskeepers are eliminating daily tasks that are not relative to the overall performance of the participants. The athletic contest, regardless of the sport, is played between the lines. Put your best effort where the game is played!

This pictorial lineup shows ideas that progressive groundskeepers have developed to reduce time-consuming daily maintenance tasks on their playing fields.

Floyd Perry, 1997 Sportsturf Manager of the Year, is director of Grounds Maintenance Services, Orlando, FL, 407-648-1332.
