**ROTARY STRIPING MOWER**

The I-Stripe 22 features a 22-in. self-propelled rear roller drive, similar to those used on walking greens mowers, to create a striped finish to your field. The ribbed rear roller has a differential for extra maneuverability. The cutterbar has a fitted friction disc to protect the crankshaft from bending, which is backed up by a lifetime warranty.

OVERSEEDER ATTACHMENT
Turfco's Meco-R-Matic III overseeder attachment for tow-type topdressers features a four-pin attachment with a quick clamp system. Its stainless steel plated metering system and neoprene rubber rotor bar are easily removed for service, says the company. The attachment's hopper has a 2.5 cu. ft. capacity and is fully adjustable for all types of seed. The seed delivery system has 24 2.5-in. outlets and clear plastic tubing so you can seed blockages.

FIELD MARKING MACHINE
Newstripe has added the NewRider 1000 to its field marking and maintenance equipment line. The company says this machine can outperform those costing twice as much; it can paint up to 12,000 ft. of 4-in. line with its 30-gal. tank and can line up to 23,000 ft. per hour.

The units feature an easy-to-see front-center mounted spray head with opposing bi-directional nozzles for maximum coverage.

WHEN YOU’RE RESPONSIBLE FOR SETTING THE STAGE FOR EVERY GAME, YOU NEED A PARTNER YOU CAN COUNT ON.

For every job on your field, there’s a John Deere made especially for it. A full-line of quality equipment, born out of the suggestions and critiques of sports turf managers and their crews. From quality mowers and tractors to aerators and utility vehicles. But it doesn’t end there. We follow it up with the industry’s best operator manuals, tech literature, and support hotline. We deliver quality parts 365 days a year, with a 99.5% fill-rate overnight. And we offer the JDC™ MasterLease, the most cost-effective way to acquire turf equipment.

For more on how John Deere can make a difference on your field, call your local John Deere distributor or 1-800-537-8233.

Caterpillar introduces the new Machine Security System (MSS), a product designed to help owners manage machine access and deter equipment theft. MSS is available as a factory-installed machine attachment and as a dealer-installed retrofit kit for both current and non-current machines.

The MSS system uses special electronic keys, each having a unique digital ID. These keys fit all existing Cat machines. However, on MSS-equipped machines, only keys programmed into the system will start the machine. MSS can reduce owning and operating costs by preventing unwanted or unauthorized machine use, and possibly decrease insurance costs.

The players are safer
When the roots are deeper and the grass is greener.

All turfgrass starts with the root system, where it develops strength, resistance, and the ability to come back week after week. Strong roots grow dense turf and grow it back after every game. If you want the best stand of grass for hardness and consistency, you need the ROOTS® turf program:

- ROOTS® Turf Food, 3 or 4 applications. This is the organic based fertilizer that grows grass better than any chemical fertilizer.
- 1-2-3® Premix for color, turf health and soil condition. The secret weapon of the top fields and stadiums.
- StandUp for the best play. It makes every blade of grass stand up and toughen up, for the best play and the safest play.
- endoROOTS every spring after aerification, to provide the beneficial Mycorrhiza spores that maximize root growth.
BOB-CAT HAS KAWASAKI OPTION

Textron Golf, Turf & Specialty Products now has available a Kawasaki V-Twin, OHV, air-cooled 25-hp gas engine as an option for its ZT-225 zero-turn mower. The ZT-225 features the 61-in. fully floating ContourCut cutting deck constructed of welded 10 gauge steel with heavy-duty 7 gauge steel skirts. The mower features a deluxe suspended seat with arm rests, steel frame, electric clutch and deck lift handle.

It's hard to go wrong when you're choosing between two new warm-season turfgrass varieties as outstanding as SeaIsle 1 Seashore Paspalum and TifSport Bermudagrass. These two new patented cultivars can only be sold as certified sod or sprigs, and only by a member of a select group of licensed growers. Our top-quality producers have agreed to a stringent set of production practices. This means the grass you buy from a Florida, Georgia or South Carolina grower is going to be the same grass you buy from a Texas or California grower. And it'll be the same 10 years down the road. If you're involved with the installation or on-going maintenance of a sports field, you'll really appreciate how these turfgrasses compare to Tifway 419 and the other older varieties in use today.

While SeaIsle 1 is similar in texture and wear tolerance to hybrid bermudas, it may offer a number of important advantages. First and foremost, it can handle multiple stresses: prolonged drought, high salt levels, waterlogging and extremely high or low soil pH levels. Secondly, SeaIsle 1 can tolerate most types of alternate water sources, including wastewater, effluent, gray water, brackish water, and even ocean water. It requires less irrigating, less fertilizer and only minimal pesticide applications when compared to other warm-season cultivars. It also handles cloudy conditions and the low light intensity of domed stadiums extremely well. That's why it was such a good choice for the Houston Astros' new field. Take a look at its pluses and specify SeaIsle 1 for your new sports field or renovation project.

Looking for a bermudagrass that can stand up to the stress and demands of big-time sports, to the wear and tear of football and soccer cleats, to the punishment of baseball slides, dives and spikes? Relax; you've found it. TifSport also has outstanding color, disease resistance and cold hardiness. In fact, TifSport is performing with flying colors in stadiums as far north as FedEx Field in Landover, Maryland, on up to the Ravens' PSI Net Stadium in Baltimore. If you're a sports turf manager, you know what's important for a playing field - outstanding density, turf strength and turf quality. You need a grass that recovers quickly from day-in-and-day-out abuse. That's just what TifSport has been bred to do. Be sure to ask for TifSport by name. It makes an attractive, dark green turf.
ALL-PURPOSE ROTARY MOWER

The Toro Company's Groundsmaster 328-D is an all-purpose rotary mower that offers a choice of four full floatation 72-in. cutting units: rear discharge, side discharge, Guardian recycler, and the Flexdeck. The 328-D is powered by a Kubota 28-hp diesel engine.

Toro's bidirectional overrunning clutch senses traction needs and gives on-demand 4-wheel drive in forward and reverse. Extra large tread tires plus counterbalance system further enhance traction and stability. The unit has optional attachments for more value: cab with ROPS, snowthrower, rotary brush; debris blower; V-plow; fluid deck, and leaf mulcher.

VERSATILE UNIT FOR BASEBALL FIELDS

The SISIS Quadraplay can do four things in one pass to produce a true, level, firm but uncompacted surface, says the manufacturer.

The unit's universal frame connects to any conventional tractor's three-point linkage and also incorporates a carrying platform for line marking equipment, hand tools, etc. It can be used on infield clay areas as well as infield and outfield turf, even warning tracks.

A range of implements is available, including lute, roller, slitter, brush, choice of rakes, seeder, and Diamond Buster for severely compacted surfaces.
