EXPRESS MOUNT KIT
SnowEx introduces its Express Mount Kit for its line of poly bulk spreaders, designed to simplify the process of truck bed mounting and removal of SnowEx Vee pro models. The steel subframe mounts directly to your truck bed base so the frame surrounding the spreader slides into the subframe and locks the unit into place.

TRIMMER HEAD
“Smooth,” “durable,” “super easy to load,” and “glides while trimming” are just a few of the positive comments from end-users field testing Shindaiwa’s new Speed-Feed trimmer head. The head can be reloaded without dismantling. Simply line-up the eyelets, thread the line through the trimmer head until it exits the opposite eyelet and pull a couple of arms lengths of line. The line is quickly and easily loaded on the spool by turning the large knob on top of the trimmer head.

Most turf pros understand that proper maintenance during the season is critical to the performance of cutting equipment, but did you know that how you store your mowers during the off-season can impact long-term durability? After spending a little time cleaning and preparing mowers and other turf equipment for extended winter storage, you can go a long ways toward ensuring easy starting and strong performance in the spring.

The first step to this, or any mower maintenance, is to acquire a copy of the owner's manual and factory maintenance schedule for each different mower in your fleet. If you've lost manuals for your mowers over the years, don't worry, most manufacturers make manuals available on their websites.

* Perform a thorough cleaning and inspection of each mower. It's typically best to avoid using high-pressure washers, or water at all for that matter. Instead, use compressed air whenever possible, as moisture in mower components can lead to corrosion and premature wear that can shorten mower lifespan. If you do choose to use water, be sure to lubricate the grease points on the mower to expel any moisture that may have entered during cleaning.

* While cleaning, it's important to give each machine a thorough inspection, noting any obvious fluid leaks, loose fasteners or damaged components. This inspection will help you establish before storage.

* The cutting deck demands particular attention. Remove all grass and debris that has built up on the underside of the deck. This keeps trapped moisture from corroding the cutting deck during storage, and will allow the cutting deck to perform as designed next spring without any additional work.

* Once the mower is clean, inspect to verify that all guards, shields, safety devices and interlock switches are in-place and functioning properly. Also be sure to check for and replace any parts that are obviously worn or deteriorating.

**Engine prep**

The end of the season offers a great opportunity to catch-up on maintenance items that may have been neglected during busy summer months, and to prepare the engine for the unique challenges presented by extended storage.

* Changing the engine oil and oil filter (if equipped). An oil change flushes any water or other contaminants from the engine that can cause corrosion inside the engine during storage.

* Replace other regular maintenance items such as spark plugs, fuel filters and air filters. Replacing these inexpensive items now makes it much easier to hit the ground running next spring.

* Clean and maintain the engine's cooling system. Over the course of the mowing season, debris and grass clippings can accumulate in the cooling fins of air-cooled engines, and in the radiators of liquid-cooled engines. This build-up compromises the efficiency of the cooling system, which can lead to overheating, as well as decreased engine performance and longevity.

On liquid-cooled units, check to verify that the cooling system is filled with the proper mixture of antifreeze and water (typically a 50:50 ratio). This is critical for locations that regularly see freezing temperatures, as an improper mixture can allow the coolant to freeze inside the engine, which can cause extensive engine damage.

Use compressed air to thoroughly clean dirt and debris build-up in the cooling fins or radiator. Inspect and clean the cooling system again in the spring, when the mower is pulled out of storage, as insects, mice and other small rodents can make their home in stored equipment, and the nests need to be removed.

* Maintain and charge the battery. Before storage, be sure the battery is completely filled with distilled water, and clean all battery posts, connections and cables. Disconnect the battery from the negative post for any storage of more than 30 days. It's also a good idea to give batteries a full charge using a trickle charger before storage. This will ensure the battery has enough charge remaining to start the mower when it is pulled out of storage.

* Stabilize the fuel and fuel system. Use a fuel stabilizer in the tank of any equipment to be stored for more than 30 days. Run the mower for at least 5 minutes after the fuel stabilizer has been added to make sure stabilized fuel is present in the fuel lines and fuel system of the engine.
Chassis and deck prep

* Lubricate the chassis and cutting deck. Virtually all commercial mowers provide grease zerks at critical bearing areas on the chassis and cutting deck, which allow periodic lubrication without disassembly. Use a grease gun to lubricate bearings with a high-quality waterproof grease before storage. This will flush any moisture and/or contamination build-up from the bearing, and will allow extended storage without concerns about bearing corrosion and/or freeze-up.

When greasing pivot points that are tensioned, such as the idler arms or bearings on the cutting deck, release the tension from the system before lubrication. This allows the grease to be more uniformly distributed within the mechanism. Consult your owner’s manual to find the exact number and locations of grease zerks on your mower, as well as the manufacturer’s recommended grease type.

* On hydrostatic-drive mowers, check the level of the hydro oil and replace the hydro oil filter at the end of each season. On gear-drive mowers, inspect the drive belts and pulleys for signs of wear, cracking or deterioration. Also inspect the belts that drive the cutting deck, replacing as necessary.

* Put a fresh edge on the cutting blades. Sharpen and balance cutting blades before storage. Sharp, balanced cutting blades restore full cut quality and efficiency to the deck, and doing so in preparation for storage means it’s one less item to maintain before next spring.

* Check mower fasteners. Since nuts and bolts can loosen over the course of a cutting season, it's especially important to check these fasteners often, especially at the beginning and end of cutting seasons. This will ensure that mower safety, performance and durability isn’t compromised.

7-IRON DECK WALK-BEHIND
John Deere offers a gear-driven 7-iron commercial walk-behind mower for 2005. With an 18-hp Kohler engine and 48-in. cutting deck, the 7G18 makes the industry-exclusive 7-iron deck available to cost-conscious professionals. With a new 5-speed Dana Spicer transmission and floating deck system, the 7G18 also features redesigned steering control levers to reduce handgrip reach and tension.
All John Deere 7-iron decks are stamped from a single sheet of 7-gauge steel (.177 inch), so there are no welds to wear or break.
John Deere/800-537-8233

MOW LINES WITH STRING WINDERS
Tru Mark Athletic Field Marker’s two field marking string winders save time when mowing field marking lines. Both come standard with a 3/8-in. steel post for a cordless drill and a free wheeling handle (holds 1500 ft. plus of twine). The all-steel and ball bearing model can be posted in the ground. The “light weight” model features a sturdy plastic frame reel.

RIDE-ON SPREADER SPRAYER
Perma Green Supreme has the next generation of their flagship product, the all-new 2005 Ride-On Magnum Spreader Sprayer, now available. New features include a Honda engine with built-in wet clutch, a new heavy-duty transmission, a 150-lb. capacity hopper and 12-gal. spray tank. The MAGNUM also sports a larger 2 GPM pump and improved spray system and spreader mechanism for easier and more reliable calibration and product control.

EXMARK TURF TRACER

The Turf Tracer features Exmark’s Enhanced Control System (ECS), which allows instant forward-to-reverse control as well as infinite speed adjustment, and topside, inward control positioning increases control and comfort, while keeping hands further from obstacles. Three engine options, including a 23-hp Kawasaki V-twin, and 20- or 23-hp Kohler V-twins, are available. Also feature patented Insta-Track on-the-fly tracking adjustments.

WALKER’S 1ST WALK-BEHIND

Walker Manufacturing introduces Walker by Walker, a compact, mid-size, walk-behind mower. The 15-hp Kawasaki engine with full-pressure lubrication delivers the power needed to run all Walker side-discharge and mulching decks up to 56 in., the same full-floating decks that are run on the Walker Rider also mount on the walk-behind, including the deck tilt-up function. A castering tail wheel on the tractor allows the deck to move independently with flexible deck suspension and spring counter-weighting allowing the deck to “float” and follow ground contour.

The Foundation for a Safer Athletic Field Environments (SAFE) needs your help for this year's STMA Conference Raffle. As in previous years, SAFE is conducting a Live and Silent Auction at the Conference in Phoenix on January 19-23, 2005. We need prizes for the raffle and will accept almost anything. Donations in the past have included team gear and logo items such as shirts, hats, jackets, autographed baseballs and footballs and industry suppliers' products such as mowers, field rakes, fertilizer, etc.

Be creative; any donation is appreciated. To help us plan and appropriately promote your donations, please call Tom Curran, Raffle/Auction chair at 954-786-4138, or Steve Torske at 402-472-4778. Send your donations to our STMA Show Office, 28 Pelham Street, Newport, RI 02840.

Have you ever wanted to work on a crew preparing for a major event? If you have any type of sports field work experience, you have a chance by participating in the SAFE raffle. One lucky person will be selected to work at Comerica Park, the home of the Detroit Tigers, for 4-5 days preparing for the All-Star Game July 12. Experience first hand everything that goes into the All Star game, including media events, entertainment rehearsals, and of course, the field preparation. You will be part of 2005 baseball history!

A 501(c)(3) corporation, SAFE is the charitable entity of STMA that funds sports field specific research, educational programs, and scholarships. In addition to funding from this raffle, SAFE receives donations from a variety of sources, including the Jacobsen-sponsored golf tournament held annually at the Conference, Toro scholarship funding, from Chapters and from members. Don't forget to indicate a donation to SAFE on your annual membership renewal application, which you will receive this month. Look for a complete listing of those who donated to SAFE in 2004 in the next issue of SPORTSTURF.
New Space, New Faces at Headquarters

Although there are still many boxes to unpack and review, we are settled and would like to introduce our new location and ourselves to you.

The STMA headquarters moved October 1 to its new location at 805 New Hampshire, Suite E, Lawrence, KS. The move from Council Bluffs, IA, involved transporting 8,500 pounds of files, printed materials, and association history. Although the move took place during that day, the headquarters was up and running with phone service and staff at 8:00 AM October 1.

Our offices are located in the oldest existing warehouse in the state of Kansas. The original stone and wood structure was built in 1857 and was among the carnage of burned and destroyed homes and businesses from the infamous Quantrill’s Raid of Lawrence during the Kansas/Missouri border wars.

As the town of Lawrence rebuilt, this was one of the first buildings to be restored. In addition to being a general store, the location was also the long-time home of The Barteldes Seed Co. Friedo Barteldes, the proprietor of a small bakery, decided to add a new line to his business. So he bought a few large sacks of garden seeds, and in his spare time, weighed them out into small sacks that were then displayed next to his bread counter. That was the beginning of the Barteldes Seed Co. In 1875, his nephew took over and established the Kansas Seed House that thrived here until 1962.

In 1998, local investors made the commitment to rehabilitate the historical downtown building. The top two floors of the three-story building were converted to office space. STMA is located on the second floor, with natural stone walls and exposed ceiling beams and ceiling rafters. The building also houses a real estate agency, an architectural firm, and an advertising agency.

Our staff includes Erica Spurling, manager of finance and operations; Leah Craig, manager of member programs; and Kim Heck, chief executive officer. All three come to STMA from the Golf Course Superintendents Association of America.

Spurling worked in the Finance and Member Solutions department at GCSAA as the coordinator for accounts payable and accounts receivable. She was also responsible for exhibitor and attendee registration at the GCSAA annual conference and show. She has 12 years of accounting background is looking forward to meeting and working with the STMA members. She and her husband, Eric, have three children, Adam, Shawn, and Emily.

Craig has five years of association experience in member programs, career development, and market research. Before her employment with GCSAA, she was responsible for researching student loan application denials for the federal government, and is also experienced in retail sales. She and her husband, Chris, have one son, Logan.

Heck has 10 years of experience in all facets of association management. At GCSAA she created the career development and student services areas and oversaw the scholarship function. She also participated on the membership growth team, conference and show team, and headed up the brand strategy and market research division. Before GCSAA she was heavily involved in marketing engineering and environmental services. Her background includes advertising agency work and several years in the cellular technology industry. She is involved in the Lawrence community where she serves on several boards and committees. Heck has three children, Jessica, Madeline, and Andrew.
announces the incoming 2005 Executive Board: President, Emilio Avalos; President Elect, Carol Gundlach; Commercial VP, Paul Webb; Secretary, Bill Rudometkin, and Treasurer, Tim Isles. For information on the Chapter or pending events, call Eric Johnson, USC at 213/821-6654 or ejohnson@busaff.usc.edu.

**Indiana Chapter:** For information, contact Stan Moscrop, Indiana University at 812/856-2256 or smoscrop@indiana.edu.

**Iowa Sports Turf Managers Association:** Mark your calendars now for the Iowa Turfgrass Conference and Show, January 31, February 18 & 2005 at the Polk County Convention Complex in Des Moines. For information on the Chapter or upcoming activities, contact Jeff Wendel of The Turf Office at 515/232-8222 or fax 515/232-8228 or e-mail Jeff@iowaturfgrass.org.

**Keystone Athletic Field Managers Organization (KAFMO/STMA):** The 9th Annual KAFMO/PRPS Athletic Field Conference will be held Friday, February 18, 2005 at the Holiday Inn - Grantville. Topics to be discussed include grassy weeds, mushroom soil, aeration, worn areas and limited resources. John Mascaro of Turf-Tec International is the featured speaker. There will be vendor exhibits along with “Field of Distinction” and scholarship presentations. For information on the Chapter or upcoming events, email KAFMO@aol.com or call Dan Douglas at 610/375-8469 ext. 212.

**Kentucky Sports Turf Managers Association:** The Kentucky Chapter’s Board members met and determined the dates of their 2005 meetings, they are as follows: February 21-25, The KTC Short Course at the Executive Inn in Louisville - the Sports Turf Workshop will be held on the 23rd. June 30, UK Summer Workshop at the University of Louisville, and November 2005, KTC Annual Meeting and Trade Show in Bowling Green. For more information, check out the website at www.kytsma.org or contact Tom Nielsen at Tnielsen@batsbaseball.com or Donnie Mefford at dbmeffO@email.uky.edu or call him at 859/257-1451.

**Michigan Sports Turf Managers Association (MSTMA):** For information on the Chapter or pending events, contact MSTMA Headquarters at 517/712-3407 or e-mail Amy Fouty, Michigan State University at fouty@ath.msu.edu or go to www.mistma.org to visit the Chapter’s website.

**Midwest Chapter STMA:** The Chapter participated in the Illinois Professional Turf Conference (IPTC) Nov. 30 & Dec. 1, 2004. The Chapter sponsored a breakfast meeting for its members at the conference the morning of Nov 30. Following the breakfast there were sports turf educational sessions, lunch on the tradeshow floor, and a keynote address by Pat Hughes, radio voice of the Chicago Cubs. New to the conference sessions this year was Pesticide Applicator Training & Testing plus Chainsaw Training & Safety Certification, in Spanish and English! For more information visit the Chapter's website at http://mcstma.org or call Libby Baker at 847/263-7603 or e-mail Bake60f16in@aol.com.

**Minnesota Chapter STMA:** For information contact Jeff Hintz, Bethel College & Seminary in St. Paul at 651/638-6075 or by e-mail at j-hintz@bethel.edu, or check out www.mstma.com.

**Missouri-Kansas Sports Turf Managers Association:** For information call Mike Green at 913/888-8055 or e-mail mgreen@865@earthlink.net.

**Northern California Chapter of the Sports Turf Managers Association:** For information call Jenet Gift at 530/788-4200.

**Texas Sports Turf Managers Association:** The Chapter is having our annual lunch and business meeting on December 6th at the Texas Turfgrass Institute & Trade Show to be held at the Gaylord Texan in Grapevine. Topics will include annual elections and chapter plans of consolidation. For more information contact the TXSTMA office at the Phone/Fax number: 866/TXSTMA1 (866/897-8621) or e-mail T.J. Thompson, Treasurer at TXTurfManager@prodigy.net.

**Tennessee Valley Sports Turf Managers Association (TVSTMA):** The Tennessee Turfgrass Association Annual Conference & Trade Show and the TVSTMA meeting is January 4-6, 2005, at the Opryland Hotel in Nashville, TN. For information on the Chapter or upcoming events, contact Chapter President, Bob Elliott, Ticco, at 800/239-8547 or Glenn Lucas at 800/837-8062 or e-mail Glenn@tvstma.org, or visit www.tvstma.org.

**Texas Turf Managers Association:** For more information contact the TXSTMA office at the Phone/Fax number: 866/TXSTMA1 (866/897-8621) or e-mail T.J. Thompson, Treasurer at TXTurfManager@prodigy.net.

**Tennessee Valley Sports Turf Managers Association (TVSTMA):** The Tennessee Turfgrass Association Annual Conference & Trade Show and the TVSTMA meeting is January 4-6, 2005, at the Opryland Hotel in Nashville, TN. For information on the Chapter or upcoming events, contact Chapter President, Bob Elliott, Ticco, at 800/239-8547 or Glenn Lucas at 800/837-8062 or e-mail Glenn@tvstma.org, or visit www.tvstma.org.

**Virginia Sports Turf Managers Association:** The Chapter is holding their Annual Membership Meeting on January 12, 2005 during the Virginia Turfgrass Council’s Conference and Marketplace. For information on the Chapter or other upcoming events, contact Bob Studholme, Fairfax County Park Authority, at Robert.Studholme@FairfaxCounty.gov or 703/324-8590.

**Wisconsin Sports Turf Managers Association:** For information on the Chapter or pending events, contact Chris Brindley at 715/346-3622 or cbrindle@uwsp.edu.
