### DRY LINE MARKER

The Beacon Streamliner 35 dry line marker features a handle that easily collapses to 29 in., a molded plastic hopper with a semi-transparent cover for monitoring material, and a variable chalk-flow control delivering 2 or 4-in. lines.

Beacon Ballfields/800-747-5985
For information, circle 056 or see www.oners.ims.ca/2908-056

### TORO IRRIGATION RETRO-LINK

The new Sentinel Retro-Link upgrade kit for the MC Plus and Dial Series controllers from Toro provides the water conservation features and benefits of a Sentinel Central Control system at a greatly reduced cost.

The Sentinel Retro-Link kit is for system owners who wish to have the benefits of central control without the significant cost of replacing their existing control product. In addition to central capability, the Sentinel Retro-Link kit provides flow sensing, ET gauge or rain sensor capabilities, as well as two-way, handheld or remote functions.

### You're Always Ahead of the Game with a COVERMASTER® Raincover...

"Very good... Highly recommended..."

wrote Dunham Wright, Facilities Supervisor, Northeast Louisiana Univ., Monroe, LA

Dunham’s comments confirm what we hear from the many groundskeepers who use a COVERMASTER® raincover to keep their fields dry and ready for play. Call us and we’ll gladly tell you more.

The COVERMASTER® Advantage...

- Superior in strength and UV resistance
- Outstanding heat reflective properties
- Light weight - easy to handle
- Widest materials for least number of seams
- Largest choice of weights and colors
- Backed by truly dependable warranties

Airlessco FIELD STRIPE piston powered airless sprayers are capable of spraying undiluted paint at up to 3000 psi to put down solid straight lines on sports fields and spray paint field stencils, backstops, buildings, or cover graffiti. With models starting at $1795, their flexibility makes them a smarter investment for universities, schools, parks departments, and sports programs.

FIELD STRIPE+®

FIELD STRIPE+® couples our proven "LP" series piston powered paint pump, a dependable Honda engine, clutch actuated paint system, and electronic pressure controls. Delivers paint for striping or spraying with a professional airless spray gun at up to 3000 psi. LP pump features Airlessco’s patented triple-life packing system which results in reduced maintenance, lower operating costs, & longer equipment life. Rated to paint 1700 gallons per year.

FIELD STRIPE PRO from $4595®

FIELD STRIPE PRO has striped stadiums hosting events from Pro Football to Women’s World Cup Soccer. With 1.5 gallon per minute spraying at up to 3000 psi, it supports two spray guns capable of laying down a 24" wide stripe in one pass. Combine the power to paint or stripe with any coating with our patented micro adjustable front swivel wheel with “Radius Memory”, and you can stripe rings around the competition. Rated for 5000 gallons per year of use, it offers perfect balance and easy rolling. It’s also the most user adjustable stripe available today.

MULTI-INSECTICIDE

FMC’s TalstarOne multi-insecticide is labeled for lawn, ornamentals, trees, and general pest control applications. Controls chinch bugs, mole crickets, leaf-feeding caterpillars, mites, mosquitoes and fire ants. Has no odorous or plant-damaging solvents.

WHITE MARKING PAINT

Game Day 8090 Ultimate White Athletic Field Marking Paint is a new product by Suntec Paint that is specifically developed with the needs of the sports turf professional in mind. This paint is very highly pigmented with concentrated amounts of titanium dioxide and optical brighteners to give an extremely brilliant white finish. The pigment loading contains no calcium carbonate, eliminating a limestone buildup on the field and drastically reducing settling after mixing.

CUSTOM COMMAND

Toro’s Custom Command 36- and 48-station controllers now have optional hand-held remote for programming and maintenance convenience. New features mean you can conduct irrigation checks, make changes, and operate the system without opening field satellite enclosures. Remote also acts as a 2-way voice radio.

SOFTBALL INFIELD SURFACE

Hilltopper Infield Mix is the waterless premium soil compound that incorporates a combination of long lasting polymers and coatings with natural clay, sand and crushed stone mixes to produce a flexible yet stable all weather surface for today’s best performing softball infield.
"We had one of the driest, hottest summers on record in Kansas City, and Bull's-Eye thrived all season. It's the best bermuda I've ever dealt with."

Let's Talk Turf.

- Deep Blue Green Color
- Resists Scalping
- No Seed Heads
- Better in Shade
- Excellent Wear Tolerance

Just ask the pros!

LINES FOR LIFE
No more painting or chalk-ing baseball foul lines! Save money, time, and crooked lines with PermaLine, the patented permanent marking system for natural grass athletic fields. A 5-year warranty covers premature wear/UV with an expected life span of 10-15 years.
PermaLine/866-546-3787
For information, circle 074 or see www.oners.ims.ca/2908-074

LARGE LINE MARKER
The Fastliner Line marking system by Broyhill is for athletic fields, streets, and parking lots. The Fastliner mounts onto most popular turf utility vehicles and performs at speeds up to 15 mph. A new 25-gal. tank ensures the same consistent paint application via a 12-volt diaphragm pump.
Broyhill/800-228-1003 ext. 34
For information, circle 065 or see www.oners.ims.ca/2908-065

PERMANENT MOUNDS, BATTERS' BOXES
Partac/Beam Clay has available permanent pitchers' mounds and batters' boxes for rec fields. Bury 2 in. below the surface and eliminate holes to give feel of properly packed clay. On-deck circles and fungo pads also available.
Partac/Beam Clay/800-347-2326

SPORTSTURF • http://www.greenmediaonline.com
Add Up to the Best Fields and Facilities in the Sports World.

From staying on top of the latest research in the industry to maintaining the safest playing fields in the world, our members strive to be the best and most knowledgeable in their field.

Our members come from all areas of the sports turf industry including professional organizations, park and recreation departments, colleges and universities, other schools, and from top commercial and academic leaders in the industry.

They use their professionalism and expertise to maintain sports fields around the world as well as to manage people and facilities, and to stay knowledgeable on the latest trends in the industry.
Safety for players is your number one concern. Instead of ending up with turf that looks like it's been ground up and spit out, build lush springy turf from the ground up with LAUNCH® Biostimulant.

LAUNCH® combines the best of Gordon's FOCUS® and BOV-A-MURA® into one powerful formulation that encourages strong healthy roots, increased density and wear resistance. When used regularly, it also encourages quick germination, vigorous establishment and the rapid recovery of damaged sports turf, from soccer and football fields to golf greens and fairways.

- Latest surfactant technology for maximum soil penetration
- Ideal for seeding, sodding, sprigging and hydoseeding
- Contains humic, fulvic acid extract and kelp extract
- Enhanced with deodorized dairy manure slurry base
- Root and foliar uptake

Pioneer says its Quik Stripe is the brightest aerosol field marking paint in the industry because it is fortified with Halogen 2000 and OPTIWITE optical brighteners. Product comes in aerosol cans that pop into the Quik Striper machine for clean lines. Won’t harm turf. Pioneer Manufacturing/800-977-1500

Tru Mark’s Model E-100 lets you line foul lines, home plate, paint a field stencil, and spray fence lines and infields. The integrated spray boom accessory ensures precision application of pest controls, fertilizers, and fungicides. Easy attachment and four quick release spray tips spaced at 16 percent means quick set up, 100 percent coverage, and low wind drift.

Supaturf’s Topline line marking system includes lightweight machines and purpose formulated paints that make great lines on both turf and infields and eliminating painting and chalking lines. The TXE/Stadia package allows significant savings over aerosol, the Easymix/Stadia package is self-mixing and self-cleaning.

Airlessco’s Field Stripe has “Slow Stroking” piston powered airless spraying that eliminates paint dilution. It's small, compact, and the reversible REV-TIP makes it easy to use. Multi-use capability can make it easier to get budget approval for purchase.

**BATTING TUNNELS FOR HIRAM BITHORN**

BP International (BPI) recently manufactured two specially designed batting tunnels for Puerto Rico's Hiram Bithorn Stadium, current home away from home for the Montreal Expos. The tunnels are 13 x 18 x 90 feet and are fenced in and covered with windscreen to minimize outside distractions.

"Knowing the kind of high quality major league baseball that was going to be played at there," explained Dennis Carrigan, president of Equipe International, Inc., the company responsible for upgrading the field for the 2003 season, "we wanted the facility to be top notch in all particulars. The batting tunnels have a clear cover for daytime use, they are waterproof for use in all weather.

BP International/800-767-2255

**YOUR ULTIMATE SPORTS TURF TOP DRESSER**

**The Mete-R-Matic XL makes top dressing simple and fast**

The new Mete-R-Matic XL, specifically designed for sports turf, features the same technologies that made the Mete-R-Matic III the leading top dresser on turf. The patented Chevron belt allows you to accurately and evenly distribute material, regardless of moisture content. The ground drive system assures that your material will be spread evenly, regardless of vehicle speed. Plus, the XL features a larger, 2.25 cubic yard hopper so you get the job done fast. For more information, a demo, or to learn more about top dressing, call 1-800-679-8201.

Circle 138 on card or www.oners.ims.ca/2908-138
1. **Engine oil.** Check with each use, and change oil (and filter, if so equipped) every 25 hours of engine use. The environmental factors and heavy use that commercial engines are subjected to can break down engine oil quickly. Adhering to a strict oil change schedule will help maximize the life of the engine. Always use the recommended oil for your engine.

2. **Air cleaner.** Air cleaners should be checked and serviced (or replaced, depending on type) every 25 hours. Make sure the filter is re-installed properly so that dirt and debris cannot bypass the filter. Commercial engines are constantly faced with dirty, dusty conditions so proper air filter maintenance is critical. A dirty, clogged air filter not only lowers the performance of any engine, it also increases the chances of dirt being sucked into the engine, which is one of the quickest ways to make a new engine old.

3. **Cooling fins.** The engines on the majority of equipment are air-cooled, meaning that cool air must pass over the fin of the engine to cool the engine. Unfortunately, the same dirty, dusty conditions that make air filter service so critical can also lower the efficiency of the cooling system. This increases engine heat, which lowers performance and accelerates engine oil breakdown, ultimately leading to compromised engine life. Compressed air is the best way to remove debris from the cooling system. Be sure to wear eye protection anytime compressed air is being used.

4. **Spark plugs.** Inspect and/or replace after 100 hours of use. Spark plugs become less efficient with age, so by replacing them regularly, you help to ensure quick starts, and maximize fuel economy and performance. As always, make sure you use the correct plug per the manufacturer's specs.
5. **Engine speed.** Check and reset engine top no load speed at least once per season. This will ensure that the engine is operating safely, and at optimum efficiency. Some applications, such as a reel mower, depend on proper engine speed for a clean cut. Adjust or replace governor parts as necessary to ensure that the engine maintains a consistent operating speed that is consistent with manufacturer guidelines.

6. **Fuel/fuel system.** Verify that the proper fuel has been used in the engine (accidentally using diesel in a gasoline engine, for example). If the fuel used is questionable, drain and flush the entire fuel system and refuel. Inspect the fuel cap, tank, hoses, clamps, filter, and carburetor visually for leaks after each use. Replace the fuel filter annually.

7. **Clean the engine/equipment.** Clean dirt and debris from the engine and equipment after each use. This helps you to visually inspect the engine and equipment for any damage that occurred during use, and can help in locating leaks, missing safety warnings, or other issues that may be hidden by debris. Clean equipment promotes increased efficiency by lowering engine/equipment operating temperatures.

8. **Starting system.** Inspect the manual starter, including the rope, grip and starter operation. Replace parts as necessary if wear is evident. On electric start engines, check the battery (for charge and/or leaks), battery/cable connections, and interlock switches (for proper operation).

9. **Valve adjustments.** Check annually, or every 300 hours, whichever comes first. Properly adjusted valves are a critical determinant of engine performance, startability, and fuel efficiency.

10. **Exhaust system.** Visually inspect the muffler body, deflector and spark arrestor (if equipped) for damage, proper fit and/or leaks. An improperly functioning exhaust system not only lowers engine performance and fuel economy, it can also be a serious safety issue in some situations.

   Always use proper safety equipment, including gloves, ear protection, eye protection, hard hat, long pants and heavy shoes or work boots. Also ensure that all safety guards and mechanisms are in-place on each engine or piece of equipment.

DE-COMPACTOR
The Smarturf De-compactor uses 8-in. solid steel spikes patterned on a hollow steel drum to eliminate compaction on sports fields. Weighing more than 1500 lbs. (2500 filled with water), the unit improves drainage and root growth.
Smarturf/602-697-1149
