JOHN MASCARO'S PHOTO QUIZ

Answers from page 17

The black area and turn turf on this soccer field is a result of a rocket landing on this infill artificial turf field. With the long standing conflict between Israel and Palestine, unfortunately, it is almost common for rockets to be fired from the Gaza Strip into Israel. On this occasion, at 7:30 am, some 18 rockets were fired at Beersheba, of which the Iron Dome (Israel's newly implemented mobile all-weather air defense system) intercepted at least 12. A building suffered a direct hit, one rocket hit a traffic island and caused damage to a bus, and a third rocket hit a car and caused damage to cars and buildings in the area. The remaining rockets landed in open areas and on this athletic field. Thankfully, no injuries were reported in this attack. The artificial turf pitch was totally renovated after the incident.

FASTEST SPORTS TURF DRAINAGE IN THE INDUSTRY!

“Maumee Bay Turf Center is a quality builder of Synthetic and Natural Turf Fields and we use the Hydraway 2000 drainage system because of the quality that our customers demand. It's easier to do the job right the first time, rather than taking short cuts with lower quality systems. We like the compressive strengths and the ease of installations. This is by far the best system on the market; we have been very pleased with the performance and quality of the Hydraway systems we use.”
