

“The Pro’s son triggered the sprinklers during today’s tournament. My brother wants me to co-sign a loan. And I just found out both my kids need braces. But what really concerns me is Pythium.”

There’s one sure way to avoid worrying about Pythium. Use Subdue® fungicide. Subdue stops Pythium on contact. And once absorbed by grass roots, Subdue protects your turf against further attack for up to three weeks. So don’t let Pythium get you down. Get Subdue. Because you’ve got other things to worry about. CIBA-GEIGY

## The Golf Course Superintendents Toolbox™

**NEW AND POWERFUL!**  
Computer software tools to assist in managing your grounds and equipment.

- Budget & Expense Reporting
- Irrigation Management
- Maintenance Schedules
- Chemical Application Guide
- Sprayer Calibration
- Chemical & Parts Inventory
- Equipment Maintenance Records
- Labor Hour Accounting
- Purchase Orders
- Work Orders

Use the TOOLBOX to reduce the time required to prepare budget reports, irrigation estimates, and help keep your grounds & equipment in top condition.

The TOOLBOX is designed to run on any PC/XT compatible computer.

Please call (602) 481-9710 or write for more information.

## PRODUCT UPDATE

### IRRIGATION WARNING

An electronic warning device, Syringe-Alert, is designed to forewarn golfers of the opening of any electrically controlled irrigation valve.

Installed in line between power source and solenoid, with its built-in time delay it will operate a high-intensity strobe light for two minutes prior to the valve opening.

The frequency of the flash is once every second. The device can be remotely located. Installation is simple, requiring no special tools. The entire unit is encapsulated in epoxy to ensure that it will not be affected by the elements.

With Syringe-Alert, golf course superintendents will be able to syringe automatically, direct from the master controller, without fear of causing inconvenience or discomfort to the golfer. In many cases, it will reduce labor costs, since many superintendents have syringed manually, despite having the automatic capability, just to avoid wetting down their golfers.

## ARE YOUR MAINTENANCE COSTS GROWING FASTER THAN YOUR GRASS?

If so, we'll help you plan and implement a customized grounds care program designed to reduce your costs and improve your turf.

We're the OPTI-GRO Division of Mantek, specializing in advanced grounds care technology.

Our representatives are experts who can offer you technical advice as well as the highest quality maintenance products. They'll take soil samples from your grounds, have them analyzed and come back to you with computerized proposals recommending treatments and a 12-month application schedule.

Your OPTI-GRO program will be supported with special seminars. Individualized training will update your staff on the latest techniques and show them how to improve results and save time and labor.

For more information about how OPTI-GRO™ products and services can help you meet your turf maintenance needs, call 1-800-241-3302. In Georgia, call 404-952-0228.

# Let Dy'on be your guide...

Dy'on puts an end to damage from overlaps and complaints from skips. With Dy'on, you can see where you have sprayed and where your spray is going. At one pint per 100 gallons, Dy'on will impart just enough blue/green color to guide an operator while spraying.

When mixed with pesticides and or liquid fertilizers, Dy'on will not interfere with the chemical biological functions. Used on dormant winter grasses, Dy'on will create a rich blue color and is recommended for use with the Richway Foam Marker to color foam balls and leave a residual color spot.

Dy'on colored spray solutions also show the operator if he has chemical on his skin and should wash. And the colored spray solution indicates whether a tank is clean of previous sprays.

Operator can easily see exactly where he has sprayed

Dy'on being sprayed on dormant bermudagrass

Home of RegalStar™

Dy'on is excellent for use on all types of growing green grasses. At the standard ratio, the color change is less, but still plenty adequate to guide an operator while adding a rich, luxurious look to green grass. This makes Dy'on excellent for use by lawn maintenance companies too. The customer has an instant dark green and healthy looking lawn.

## PRODUCT UPDATE

### TRIPLEX GREENSMOWER

New from Bunton, this triplex greensmower is available with a cool-running, 18-hp, twin-cylinder, aluminum-block Onan engine with cast-iron sleeves, or with an optional 16.5-hp, three-cylinder, water-cooled Kubota diesel engine.

The reels are independently operated to

allow back lapping or raising the individual cutting units completely off the ground, to prevent turf damage by dragging during multiple mowing patterns.

All reels, carriage frames, catchers, and reel motors are interchangeable. Bedknife-to-reel adjustment is very easy. Frequency of cut is .23 inch at 3.5 mph.

The drive is a true hydrostatic closed circuit. It requires fewer valve banks and hydraulic pumps for lower maintenance, according to the manufacturer.

### FIELD MARKING PAINT

Mautz 8-30 athletic field marking paint has been used for many years at Super Bowls, Pro Bowls, and at numerous NFL stadiums and universities. It is now available worldwide from Missouri Paint Supply.

This paint is specifically designed for

marking lines, numbers and logos on all types of athletic fields, for football, baseball, soccer, and track-and-field events.

It is easily applied by brush, roller, airless spray, or line-marking machines, and is absolutely safe to use. It will not harm grass, eyes, or skin, and will not stain uniforms.

The product actually stimulates root growth and development, and allows photosynthesis and respiration to continue, the maker reports.

It will not blur with rough usage, and is long-lasting and inexpensive to use. It is said to offer "the brightest whites and sharpest matches to team colors for vivid television appearance."

Available in a concentrated paste form for less storage space and lower shipping costs, 8-30 is designed to be reduced with water prior to application. Generally, blending with electric drill and mixer is recommended.

## One bad Fall Could change a Child's whole Life

The National Sports Turf Council

An educational, research, charitable, non-profit, tax-exempt organization

An extension of the Musser International Turfgrass Foundation collaborating with the United States Department of Agriculture

### Young athletes need your help

Let's look at reality... many, maybe even most, of our sports and playground surfaces are in deplorable condition. Many of these are unsafe and even treacherous. We still tolerate this even though we have the finest agronomic knowledge, turfgrasses and equipment at our disposal. Add this to our collective enthusiasm for physical activity... watching and participating... and we have a powerful force to construct quality fields, maintain them, and/or correct existing sports field turf problems. We believe that lack of vital information and blurred focus of intentions have slowed progress. NSTC will take all of this talent, information and material, focus, then project the essence into an active force for sports and playground safety.

Who do we need to get involved? Support from organizations, institutions and associations is essential, but individual efforts from parents, teachers and coaches is mandatory. We need input... emotional, testimonial, technical, statistical and physical. Then we need funds to fuel the mechanism. We need you.

We need community liaison, people who will grab the ball on a local level and run with it. We need people in the right places who can implement a plan to tackle a problem, devise game plans in the community and make them work. We need people of conscience who realize that falling is a part of physical activity and that getting up and shaking it off is a right, and pain and injury are not acceptable. We need you.

### You can help by joining today!

Become associated in some category with NSTC and with affiliated organizations.

Give financial aid to NSTC to assure continuity of Safer Sports Turf operations. Help implement plans on a local/community level.

Talk to others... get them involved. Join today.

## PRODUCT UPDATE

### GOOSEGRASS CONTROL

Sencor 75 Turf Herbicide has established itself for control of goosegrass and certain broadleaf weeds without damaging established bermudagrass turf.

For an even broader spectrum of weed control on actively growing bermudagrass, it can also be tank-mixed with MSMA.

The product can be applied in either a pre- or post-emergent application, with no need for special equipment. Its long residual control helps make it one of the most economical products available for control of these problem weeds—economical enough to use on fairways, athletic fields, or wherever healthy, attractive bermudagrass turf is grown.

#### MOBAY CORPORATION

### LINE MARKER

Keep chalk or paint lines sharp and bright with Line King by Gustafson. The riding line

marker holds up to 125 pounds of chalk or ten gallons of water-based paint to mark large fields or tracks quickly without stopping to refill.

A front guide bar assists the operator in matching existing lines or following string lines. When engaged, an adjustable cutter clears a line of turf up to four inches wide before the chalk or paint is applied. Chalk is fed to the line in a chute which retracts at the end of a row to stop dribble.

A piston pump sprayer can be added to the Line King for painting lines of adjusta-

ble width and for a hand spray gun. A boom attachment is available to paint three lines at once. Pull-type chalk spreaders can be added to the unit to mark four lines at once.

#### GUSTAFSON MFG. CO.

### ORNAMENTAL FERTILIZER

LESCO Arbor-Green is a performance-proven formula for trees and ornamentals. Developed and used by the Davey Tree Expert Company, this very fine dispersible 30-10-7 fertilizer is applied by hydraulic root-zone injection. It provides nutrients for up to two full years.

Arbor-Green is noncorrosive to metals. It is said to have the lowest salt-index rating available, and provides uniform nutrient availability throughout the growing season.

A 40-lb. bag of the product treats 2,000 square feet of the branch spread at the two-year rate and 4,000 at the one-year rate.

#### LESCO, INC.

## DonuTrimmer Equipment, Inc. INTRODUCES The Sprinkler Head & Bunker Edging SOLUTION!

- Edges any sprinkler head in a perfect circle in seconds.
- Edges bunkers perfectly in minutes.
- Easily adapts to Green Machine, Shindaiwa and other weed-trimmers.
- Available in 4 different sizes.

Why use herbicides, nylon trimmers or machetes? These are improper tools for the job, that leave a rough finish and are time consuming.

**DonuTrimmer** is the precision edging tool that does what others can't... in seconds!

**ALIETTE®**  
Fungicide

Only **CHIPCO ALIETTE** fungicide translocates throughout your turfgrass for total Pythium protection.

If you're like many golf course superintendents, you rotate fungicides to reduce the risk of disease resistance. But you still need a "foundation" product you can count on for effective, long-lasting Pythium control. And the name of that product is **CHIPCO ALIETTE** fungicide.

Unlike other turf fungicides, **CHIPCO ALIETTE** fungicide features a unique two-way systemic action. Once applied to turf, its active ingredient translocates downward and upward throughout each grass plant. The result: total disease protection from top to bottom.

In addition, **CHIPCO ALIETTE** fungicide offers you 21 days of Pythium protection from a single application. Even in hot, humid weather, **CHIPCO ALIETTE** fungicide stops Pythium *before* it gets started.

Best of all, **CHIPCO ALIETTE** fungicide delivers long-lasting pythium prevention at a down-to-earth price. In fact, **CHIPCO ALIETTE** fungicide is one of your best fungicide values based on cost per day of control.

This year, discover the fungicide that's in a class by itself. **CHIPCO ALIETTE** fungicide.
