A Revolution in Sports Turf Technology

Broadleaf P4 is a super efficient water-absorbing polymer which absorbs and retains water at the roots of growing plants until it's needed. P4's crystals hold up to 400 times their weight in water, up to *10 times* more than other polymers. Over 95% of this stored water is available to roots "on demand" allowing for healthier plants with less water, less labor, and increased aeration, making your turf and grounds projects easier to maintain.

Cuts plant watering in half or more.

Saves valuable labor time and cuts water usage up to 75% — reducing your costs and adding to your profits.

Great for all species of plants.

Increases shelf life of all plants and minimizes losses and callbacks. Promotes more extensive root mass development. Reduces transplant losses.

Cost efficient.

A cost-saving way to get the optimum effectiveness from water, plant foods and fertilizers, while greatly reducing nutrient leaching.

One application works for 5 years and more! Available in 10 and 25 pound boxes, and 55 pound bags for golf course and sports turf managers.
