Beautify and prevent unwanted weeds and algae in contained ornamental ponds, lakes and lagoons without harm to humans, fish, wildlife or turf.

USE AQUASHADE

Test plot proves: An untreated test plot within a Florida golf course lake teems with algae common to area while the surrounding lake, which received the Aquashade water treatment, remained clearly free of aquatic growth.

Aquashade is simple and proven safe

- Not an herbicide
- Not a pesticide

Aquashade is a photosynthetic inhibitor, which beautifies water and suppresses unwanted aquatic plant growth.

- **Economical** – Lasts up to six weeks
- **Easy to use** – just pour it in and it works

SAFE TO USE IN
FISH PONDS --
USED BY MAJOR ZOOS
AND WILDLIFE PARKS

team up with
**Lebanon and
Team.**TM

Lebanon's premium fertilizers with **Team**TM pre-emergence herbicide let you double-team your turf's toughest competition: annual bluegrass, smooth and hairy crabgrass, goosegrass, and green and yellow foxtail—as they germinate.

Lebanon's fertilizer/control products featuring **Team** have the added strength of two of the most effective defense-oriented pre-emergent herbicides today—benefin and trifluralin. And, the potent offensive power that **Lebanon's** premium fertilizers bring to strengthen northern and southern turfgrasses.

It's double trouble that lasts. **Team** won't leach out, even in heavy rainfall. Once it's activated, it forms a vapor zone to keep weeds from sprouting for several months.

For more information on which **Team** formulation is right for your turf conditions or on custom-blended options, contact your local **Lebanon** distributor or call our Greenline today at 1-800-233-0628 or 717-273-1685.

For a winning season against annual weeds, put our **Team** products to work for you.

There's a Lebanon fertilizer with **Team** formulation to meet every turf care need.
