## PRODUCT UPDATE

### COLORED TOPDRESSING

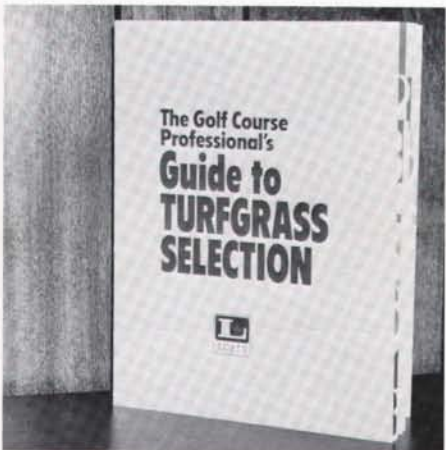

Available in a green color, Super-Green is a field conditioner, drying agent, and topdressing.

The product is ideal for drying and firming wet or muddy sports fields. It provides a green color for damaged turf and can improve its growing medium.

### GOLF COURSE TURF GUIDE

Loft's Seed, Inc., has introduced a reference guide entitled "The Golf Course

Professional's Guide to Turfgrass Selection."

The booklet includes recommendations for golf courses throughout the United States. It is divided into geographical areas for convenience, and includes an extensive section on southern winter overseeding.

**LOFTS SEED, INC.**

### EDGER

Lightweight and maneuverable, the LE 500 shaft-driven edger is powered by a 2.5-hp two-cycle engine.

Features include a ten-inch cutting blade and a lever to adjust cutting depths to three inches, an 88 fluid ounce fuel tank, and a remote air cleaner. The unit is available with optional curb riding and drop wheel kit, which allows replacement of the right rear wheel.

### PREFABRICATED EDGE DRAIN

PDS 20 Edge Drain is designed for areas where less critical flow capabilities are needed. Its high-density polyethylene, .8-

inch-thick core is double cusped to accept equal inflow on both sides of the drain surface.

Standard compression of the product is 42 psi. Applications include golf courses, athletic fields, foundations, and retaining walls.

**PRO DRAIN SYSTEMS**

### SOIL CONDITIONERS

Surface soil conditioners provide puddle protection and water conservation on sports fields. By absorbing water and releasing it slowly, the products help keep turf areas green during drought conditions, minimize dust and blowoff on skinned areas, and virtually eliminate standing water and runoff on both these areas during rainy periods.

Three products are available. Designed for use on skinned areas, Turface Regular eliminates rock hard playing surfaces during dry spells or muddy conditions after excessive rainfall. For turf areas, Turface Plus promotes strong, healthy turf which is ready for play immediately after rainfall. Turface Quick Dry is designed for spot maintenance. It can be used on high-traffic skinned and turf areas when trouble spots occur.

### GOLF CARS

The Yamaha Motor Manufacturing plant in Newnan, GA, is using a liquid molding resin called Metton in the construction of its two newest golf cars, the 1990 G8 Fleet Classic and G5 Sun Classic. Five separate parts—the front storage shell, front lid, headlight frame, front cowl, and rear body part—are made from this durable material.

Metton enables the golf cars to resist the impact of everyday accidental bumps and scrapes, without losing their cosmetic appeal. The resin is lightweight, immune from corrosion, and readily accepts paint.

## PRODUCT UPDATE

### EQUIPMENT ENCLOSURES

Constructed of 3/16-inch steel plate, Safeguard Equipment Enclosures have a polymer coating which resists sun damage, chipping, and vandalism.

Ventilation louvers are placed high to discourage pests. The units have internally hinged, weatherproofed doors, customized insulation, and sloping tops for drainage.

Features include Lockguard padlock shield, a recessed key-lock latch assembly, and an optional internal power source and lights. The enclosures are also manufactured in stainless-steel. A thermostatically controlled fan and air filtration system is available.

**LE MEUR MFG.**
