PRODUCT UPDATE

LIQUID WETTING AGENT

Scotts ProTurf Hydrozyme Wetting Agent is a liquid designed for use by golf course superintendents and professional turf managers. It helps prevent and eliminate localized dry spots in turf areas such as putting greens, and encourages healthy, vigorous turfgrass growth in hydrophobic soils. It also aids water penetration in hard-to-wet soils.

The product is available in 30-gallon

drums or in cases, which consist of four one-gallon containers each.

MOSQUITO CONTROL PRODUCT

Bactimos Briquets are a long-term, sustained-release mosquito larvicide. Their active ingredient, *Bacillus thuringiensis israelensis*, produces a substance that is toxic only to mosquitoes and has no effect on fish, aquatic wildlife, or any vertebrates. One briquet will control mosquito larvae for 30 days or more.

The product is easy to use and requires no measuring, mixing, or spraying. One briquet is applied per 100 square feet of surface area.

WALKING BOOM

The 80-inch Greensfoil Hosefed Walking Boom has mechanical drift control, which allows spraying in windy conditions. Its advanced airfoil protects the operator and environment and ensures positive drift control.

The unit is equipped with eight nozzles spaced ten inches apart, a handle-mounted valve, three pneumatic wheels to maintain constant boom height for even application,

optional nozzle monitor, and a speedometer. Constructed from corrosion-resistant plastic and aluminum, it also comes in 38- and 40-inch widths.

INNOVATIVE EQUIPMENT, INC.

GANG MOWERS

The Hydraulic Ranger gang mower is available with five or seven gangs. Its powerful hydraulic reel motors cut heavy, wet grass easily. The units can be equipped with six- or ten-blade reels for a beautiful finish on high-quality turf. Vertical cutting reels are also available.

The seven-gang mower has a cutting width of more than 15 feet, and can cut up to nine acres per hour. The five-gang unit cuts an 11-foot path and up to 6.5 acres per hour.

PRODUCT UPDATE

High-flotation tires allow the Ranger to roll gently over the turf with less compaction. For transport, the reels raise quickly to create a compact, 7-1/2-foot overall unit width. Reels automatically shut off when the units are raised and start again when they are lowered, for safety and ease of operation.

TURF INFILTRATION MEASURING DEVICE

The Turf Tec Infiltrometer can make on-site measurements of percolation rates without disturbing the turf. The unit is inserted into the turf like a golf cup cutter, and since no soil is removed it leaves almost undetectable round cuts in the grass.

The unit can determine percolation rates in 15 minutes. The elapsed-time indicator makes it possible to correlate irrigation time to the infiltration rate of the turf. After the infiltration rate has been determined on a given area, irrigation time can be set to deliver only the water that the turf can absorb. Wasteful water runoff can be minimized.

GRASS PROTECTION SYSTEM

Gras-Gard's interlocking 16-by-16-inch tiles allow grass to grow through one-by-one-inch openings. They can be used to protect turf recreation areas from root dam-

Do Not Read This!

Providing you have time and seed to waste.

But if you've read thus far, then give us a call or write for information on our pregermination systems. We provide the equipment (5 models) and technical information that will allow you to pregerminate turf grasses on your own.

Pregermination of turf grasses can provide increased yields, reduced erosion, accelerated establishment, as well as reduced time, cost, and more. (Why would anyone wait the normal time for seed to sprout?)

*** Ask about our newest unit, the BT275, which pregerminates bentgrass and wildflowers.**

The Ultimate Turf Team

CORE MASTER 12

Fits All Tractors

The Ultimate Aerator

GreenCare has combined high-tech engineering and simple design to produce the strongest, most versatile and efficient aerator on the market today. Vertical aeration combined with variable pattern, variable depth and a variety of tine types and sizes provide today's Turf Specialists with the tool they need to tailor aeration to their requirements.

Core Collection System

- Simply attaches to rear of CoreMaster.
- Auto-reset on next aeration pass.
- Removes cores as you aerate and automatically dumps cores at the end of each run.
- One man can do the work of four.
- No other expensive machines or operators required.
- On golf greens, play can continue during aeration.

SPREAD MASTER

The Ultimate Topdresser

GreenCare engineering leads the way in Turf Equipment Innovation again:

- All hydraulic drive.
- Tubular steel and zinc annealed sheet metal construction.
- Roller drum eliminates conveyor belt problems.
- Internal rotating baffle prevents "material surge" at the start of each run.
- Independent control of brush speed, drum rotation and gate opening provide precise rate of application.
- Flared top for easy filling with front-end loader.
