

Hunter® SPRINKLERS

IN PURSUIT OF PERFECTION

Like the champions of your favorite sports, Hunter Industries is dedicated to the constant pursuit of perfection. Our efficient, hard-working I-40 sprinklers are a good example. Already the choice of many world-class stadiums and sports fields, our I-40s offer progressive new features for 1990.

Hunter's engineering team has made the I-40 sprinkler adjustable to any arc from 40 to 360 degrees. This versatile new model is called the I-40 ADS. For full-time, full-circle applications, the fixed-arc I-40 36S is the right choice. These two sprinklers can now do all the work of last year's line-up of 18 different fixed-arc I-40 sprinklers.

For you, these improvements mean simplified ordering and inventory control, and easier installation and maintenance. For us, it's just a few more steps toward perfection. At Hunter Industries, we will never achieve perfection, but we'll continue leading the irrigation industry in its pursuit.

The New
I-40 ADS
Adjustable from
40° to 360°
